Professional Summary

Results-driven **SDET II / QA Automation Engineer with 3+ years of experience** in delivering production-quality software through strong automation and manual testing practices. Proven expertise in building and extending **Selenium-based automation frameworks using Page Object Model (POM)** and validating critical **donation, subscription, and payment gateway flows**. Strong domain experience in **crowdfunding, payments, and fintech**, with a consistent track record of identifying and preventing **high-impact production issues**. Known for **reducing daily manual QA effort by approximately 5 hours** through Jenkins-based scheduled automation execution. Experienced in API testing using Postman with foundational RestAssured knowledge and active participation in Agile delivery models.

Experience

Jan 2025 – Present **Software Development Engineer in Test (SDET I)**, *ImpactGuru*, Mumbai, India

- Designed, extended, and maintained **Selenium + Java automation frameworks** using Page Object Model (POM) for high-traffic crowdfunding platforms.
- Automated **end-to-end donation and subscription flows** covering cards, netbanking, UPI, and wallets across multiple payment gateways.
- Identified and prevented **critical payment gateway redirection failures**, enabling timely fallback to alternate gateways and minimizing business impact.
- Implemented **Jenkins scheduled sanity automation runs**, reducing approximately **5 hours of daily manual QA effort**.
- Performed comprehensive functional, regression, and cross-browser testing for campaign pages including CTA and redirection validation.
- Took **release sign-off ownership** and guided QAs on automation strategy, task estimation, and quality best practices.

Apr 2022–Aug 2024 QA Automation / Implementation Engineer, Engagely.ai, Mumbai, India

- Progressed internally from Intern to Implementation Engineer based on performance, ownership, and delivery quality.
- Worked on **CX center platforms**, validating agent-to-chatbot conversation flows through daily sanity automation and regression testing.
- Built and executed **Selenium-based automation** for critical sanity scenarios during early project phases.
- Collaborated directly with enterprise clients including **Axis Bank and Axis Securities Limited** on BRD/PRD analysis, requirement clarification, and technical feasibility.
- Led implementation planning, owned **UAT cycles**, achieved client sign-off, and supported production deployments.
- Mentored and trained new QAs on testing strategies, estimation techniques, and domain understanding within Agile teams.

Technical Skills

Automation Testing	Selenium WebDriver (Java), TestNG, Page Object Model (POM), Apache POI
API Testing	Postman, RestAssured (Basic)
CI / DevOps	Jenkins (Job creation, scheduling, monitoring)
Manual Testing	Functional, Regression, Smoke, Sanity, Cross-browser testing
Tools	Git, Jira, TestRail, JMeter (Basic)
Databases	SQL (Basic to Moderate)
Methodologies	Agile, Scrum, SDLC, STLC

Education & Certification

2017 – 2020 **Bachelor of Information Technology**, *University of Mumbai*, Mumbai, India

Feb 2024–Jan 2025 Fellowship in QA Automation (SDET), Crio.do, Mumbai, India
