konankivinod@gmail.com

Staff Software Engineer @Visa

PROFILE SUMMARY:

Experienced and results-oriented **SDET/Quality Assurance (QA) Engineer** with over **9 years of hands-on experience** in **manual testing**, **automation testing using GenAI (Github Copilot and Claude Code)**. Proficient in **API automation using Rest Assured**, **Karate**, **UI automation using Selenium WebDriver with Java**, and **performance testing using JMeter**. Strong expertise in **test strategy design**, **test planning**, **test case creation**, **test execution**, and **defect management**. Adept at using **Agile/Scrum methodologies** and test management tools to ensure high product quality. Skilled in **tracking quality metrics**, improving test coverage, and enhancing automation frameworks. Domain experience includes **E-commerce**, and **Fintech**. Committed to delivering high-quality software and continuously improving testing processes.

AUTOMATION TESTING SKILLS:

- Leveraged **GenAI** to generate automation test scripts, significantly improving efficiency and reducing the effort required to write test cases.
- Designed and generated automated test cases and comprehensive E2E test scripts leveraging **Claude Code** to improve test coverage and efficiency.
- Implemented **custom Copilot agents within the IDE** to follow predefined instructions, minimizing repetitive inputs and accelerating script creation.
- Improved productivity by enabling consistent and optimal usage of **Copilot**, resulting in reduced development time and faster test automation delivery.
- Actively involved in end-to-end feature **release processes**, ensuring smooth deployments from lower environments to production.
- Expertise in building, maintaining, and scaling automation frameworks for Web and API testing using Selenium WebDriver and Rest Assured with Java.
- Strong proficiency in **Core Java**, including OOP concepts, control flow, exception handling, and Collections Framework.
- Experience designing and documenting Automation Test Plans aligned with project requirements.
- Hands-on experience with **TestNG**, **Cucumber** (BDD), and **Karate** for creating modular, readable, and maintainable automation scripts.
- Advanced skills in REST API automation and validation using **Rest Assured** and Karate, including complex request/response handling and test data parameterization.
- Strong experience automating complex user workflows using Selenium, including dynamic elements, pop-ups, alerts, and multiple windows or tabs.
- Proficient in web element identification using various locator strategies and synchronization techniques.
- Applied automation best practices such as reusable utilities, clean code principles, logging, and robust error handling for long-term framework stability.
- Experience in data-driven testing using Apache POI for Excel-based test data integration.
- Hands-on experience with Git for version control and Jenkins for CI/CD-driven automated test execution.
- Familiar with Agile/Scrum methodologies, actively contributing to sprint ceremonies.

FUNCTIONAL TESTING SKILLS:

- Strong understanding of SDLC and STLC, with hands-on experience across all testing phases.
- Skilled in creating test plans, test strategies, test scenarios, and detailed test cases from functional and business requirements.
- Extensive experience in manual **testing**, including smoke, regression, UI, system, and cross-browser testing.
- Strong ability to analyze requirements and translate them into **traceable and effective test cases**.
- Proficient in **defect identification, reporting, and tracking** using tools such as **JIRA, TestRail, and Microsoft VSTS**.
- Experienced in collaborating closely with development teams to ensure **timely defect resolution**.
- Knowledge of **black-box, white-box, and gray-box testing techniques**, applied appropriately based on project needs.
- Hands-on experience with **API functional testing** using **Postman and Insomnia**.

konankivinod@gmail.com
Staff Software Engineer @Visa

TECHNICAL SKILLS:

Testing Tools: Manual Testing, Selenium WebDriver, REST Assured, Karate, Insomnia, Postman, Eclipse, IntelliJ, TestNG, SVN, GIT, Maven, Jenkins, Apache POI, Cucumber, RabbitMQ, Splunk, Docker, Kubernetes, Grafana, Nginx.
Languages: Core Java, OOPs Concepts, Basics of Web Services, Spring boot framework.
Databases: MS SQL, MySQL
Bug Reporting & Test Management Tools: JIRA, Confluence, TestRail.

PROFESSIONAL SUMMARY:

Seasoned Software Testing professional with **9 years of hands-on experience** in manual and automation testing across diverse domains and tools.
Currently working as an **Staff Software Engineer at Visa India** (July 2022 – Present).
Previously worked as a **Senior Quality Engineer - II** at **Rakuten** (May 2019 – July 2022).
Served as a **Module Engineer** at **Mindtree** (May 2017 – May 2019).

EDUCATIONAL QUALIFICATION:

Bachelor of Engineering (B.E.) in Electronics and communication engineering @VTU, Bangalore.

PROJECTS UNDERTAKEN:

Company: **Visa India**
Project: **FX, Compliance and E2E Cross Border Payments**
Environment: API and UI Automation using Java, Manual Testing, API Testing, RESTAssured, TestNg, Java, Springboot,
Role: SDET & Developer
Responsibilities:

- Leveraged **GenAI** to generate and optimize automation test scripts, improving execution efficiency and significantly reducing manual effort in test case creation.
- Increased automation coverage using **Github Copilot** and **Claude Code** for FX features from 50% to 95%, enabling full regression execution for all releases.
- Worked as **developer** for few features and fixed bugs in the spring boot application.
- Actively contributed to end-to-end feature **release activities**, ensuring seamless deployments from lower environments to production.
- Analyze system specifications, business requirements, and user stories to ensure clear and testable acceptance criteria.
- Design, develop, and maintain automation scripts using **Java, Selenium, Rest Assured, and IntelliJ**.
- Collaborate in requirement discussions and provide feedback to improve testability and quality.
- Create and maintain comprehensive Test Plans covering scope, objectives, resources, schedules, and deliverables for manual and automated testing.
- Log, track, and manage defects using **JIRA**, ensuring timely resolution and clear communication.
- Work closely with developers, product managers, and stakeholders to ensure quality across the SDLC.
- Actively participate in Agile ceremonies including daily stand-ups, sprint planning, and retrospectives.
- Prepare and present QA reports, test metrics, and quality assessments to stakeholders.
- Identify potential quality risks early and propose effective mitigation strategies.

Company: **Rakuten Inc.**
Project: Rakuten Merchant System - global, Bulk processing Engine.
Environment: Java, Spring Boot, Manual Testing, API Using Insomnia and API Automation RestAssured with Cucumber.
Role: Sr. Quality Engineer – II

VINOD KUMAR K
+91-9036393443
konankivinod@gmail.com
Staff Software Engineer @Visa

Responsibilities:

- Thoroughly analyzed project requirements to ensure clear understanding and proper test coverage.
- Executed Regression, System, Functional, and Non-Functional testing across various stages of the development lifecycle.
- Monitored, reviewed, and tracked defects regularly; summarized findings and ensured timely updates on defect statuses.
- Designed and implemented both generic utilities and project-specific methods to support scalable automation.
- Identified critical and reusable API test cases suitable for automation.
- Led the end-to-end automation of RESTful APIs using Rest Assured.
- Transformed manual test cases into executable scripts using the Cucumber BDD framework.
- Validated API endpoints through methods such as GET, POST, PUT, PATCH, and DELETE, using Rest Assured and Insomnia for verification and exploratory testing.
- Developed a modular and reusable API Automation Framework using Rest Assured.

Company: **Mindtree**
Project: Adidas Click
Environment: Java, Selenium, TestNG and Manual Testing.
Role: Module Lead
Responsibilities:

- Analyzed project requirements and participated in peer reviews of test cases.
- Performed Functional, UAT, Regression, and System testing.
- Monitored and summarized defect statuses to ensure timely resolution.
- Identified key test cases for automation and developed end-to-end scripts using Selenium WebDriver.
- Implemented data-driven testing by fetching test data from Excel using Apache POI.
- Reviewed and maintained test scripts to ensure consistency and reusability.
