JOB OBJECTIVE

With over 3.6+ years of experience in Software Testing & Quality Assurance, pursuing a QA Engineer role to contribute to the enhancement of product quality through comprehensive test strategies, automation frameworks, & effective defect management, while driving continuous improvement in QA processes to ensure the delivery of superior software solutions.

PROFILE SUMMARY

Test Automation: Proven capability to design, develop, and execute automated test scripts using tools like Selenium and TestNG, driving efficiency in the testing process and reducing manual effort.

Manual and Automated Testing: Extensive experience in both manual and automation testing, ensuring comprehensive test coverage and robust product performance.

Risk Assessment and Mitigation: Expertise in conducting risk assessment and implementation preventive actions (CAPA) to address potential quality issues before they impact the end user.

Continuous learning: Dedicated to continuous learning and staying updated on the latest QA tools, trends, and technologies to drive innovation and quality improvements.

Customer Satisfaction: Focused on delivering products that meet and exceed customer expectations, leading to increased customer satisfaction and reduced post-release defects

Education

- **B.Tech** – Mechanical Engineering, Jawaharlal Nehru Technological University, Anantapur Graduated Apr 2022 | Grade: 87.9%
    - Project: Experimental Investigation of Performance and Emission Characteristics of TBC (Zirconia) CI Engine Using Mango Seed Biodiesel
- **Intermediate** – MPC, Sri Chaitanya Junior College, Anantapur Graduated Apr 2018 | Grade: 95.7%
- **Secondary Education**: Sri Chaitanya Techno School, Anantapur Graduated May 2016 | Grade:10 GPA

WORK EXPERIENCE:

Test Analyst (Cognizant) Project: (2022-Present)

Client: Colt Technologies
Team Size: 2
Description: Colt Project, which is Europe's Leading Networking Organization. Siebel is 24/7 available application and used by employees of colt across locations. Siebel application used for Customer care and Order Management for Colt Products.

Responsibilities :

- Working as a Test Analyst in QE&A domain, Experience in Functional (Sanity Testing, Regression Testing, Re-testing). Well versed with Test Case authoring and Test Execution. Good Knowledge in Defect Life Cycle.
- Understanding the requirements and designing Manual Test Cases in Quality Center.
- Automating Smoke and Regression Test cases using Selenium.
- Sanity testing, Regression Testing, Proactive analysis, Creation and maintenance of Hybrid driven Framework.
- Retesting resolved bugs, raising requests for patches, maintaining software quality.
- Tracking & updating the stories in JIRA once the execution is completed by attaching the evidence document to the stories.
- Involved in Checking the Integrations logs, Databases, CRM for Integration& E2E testing and have knowledge on working with CRM tool.
- Raising bugs about incorrect functionality after automated regression and Sanity testing on QA and UAT environments.
- Updating automate Regression Test Suites for Affected Test cases when changing requirements.
- Performed API in manual and automation testing
- Support on load test execution on every production release.
- Executing SQL queries and preparing daily reports.

Tools and Technologies:
Selenium, Cucumber, REST Assured, Azure Devops, Magic Connect, Eclipse, SOAP UI, API Testing, Oracle SQL Developer, Jira, POSTMAN, CRM, Jenkins

TECHNICAL SKILLS

Selenium I Cucumber I TestNG I Java I SQL (MySQL) I Functional Testing I Apache POI I Html I Agile Methodology I JIRA Azure Devops I Gen AI I Java, JavaScript I AWS Cloud Practitioner I SOAP UI I API Testing I Playwright

DECLARATION

I hereby, declare that all the information stated above is true to the best of my knowledge and belief.
