SUMMARY

Detail-oriented Software Quality Assurance Engineer with 4+ years of experience in Manual and Automation Testing across web and mobile applications. Proven expertise in SDLC/STLC, functional, regression, API, database, and cross-browser testing, with strong hands-on experience in Selenium WebDriver, Playwright, TestNG, Postman, SQL, and CI/CD integration. Adept at collaborating in Agile/Scrum environments, mentoring junior testers, and ensuring high-quality, defect-free releases. Actively seeking challenging QA roles where automation, quality engineering, and continuous improvement are key.

PROFESSIONAL EXPERIENCE

QA Test Engineer ***11/2022 - Present***

Evaluationz India Pvt. Ltd *Bangalore, India*

- Created and maintained complete test documentation, including test plans, test scenarios, detailed test cases, RTMs, and test data, ensuring full requirement coverage and audit-ready test artifacts.
- Executed end-to-end manual testing (Smoke, Functional, Integration, System, Regression, Exploratory, and Ad-hoc testing) for web and mobile applications across multiple releases.
- Designed, developed, and maintained automation test scripts using Selenium WebDriver with TestNG, executing automated regression suites to improve test efficiency and release stability.
- Performed API testing using Postman and database validation using SQL queries, validating business logic, data integrity, and backend workflows.
- Managed the complete Defect Life Cycle using Jira, including defect logging, prioritization, re-testing, regression validation, and closure in Agile environments.
- Actively collaborated with developers, BAs, and product owners during Agile/Scrum ceremonies, supported UAT, and prepared test execution reports and quality metrics for stakeholders.

Associate Test Engineer ***Feb 2022 – Jul 2022***

Accenture *Bangalore, India*

- Executed cross-browser and compatibility testing to ensure seamless user experience across platforms.
- Performed API testing using Postman for backend service validation.
- Conducted database testing using SQL to verify data consistency and business rules.
- Automated regression test cases using Selenium WebDriver with TestNG, reducing manual effort.
- Integrated automated test suites into CI/CD pipelines, accelerating release cycles.
- Monitored builds and deployments, validating application stability in test environments.
- Performed re-testing and regression testing after defect fixes to ensure closure quality.
- Generated daily and weekly QA status reports for stakeholders.
- Supported UAT activities, assisting business users during validation.

SKILLS

- Manual Testing
- Automation Testing (Selenium WebDriver)
- Test Case Design & Test Documentation
- Functional Testing
- Regression Testing
- API Testing (Postman / REST APIs)
- Database Testing (SQL)
- Defect Tracking & Defect Life Cycle (Jira)
- Agile / Scrum Methodology
- SDLC & STLC
- Test Planning & Test Execution
- Cross-Browser & Compatibility Testing
- Test Automation Frameworks (TestNG / Data-Driven)

TOOLS & SOFTWARE

- Selenium WebDriver
- TestNG
- Azure DevOps
- Postman (API Testing)
- Jira (Defect & Test Management)
- Git (Version Control)
- Maven
- MySQL / SQL
- Excel (Test Reports & Test Data Management)

PROJECTS

Embassy Visa Approval System

- **Overview:** A centralized web-based system to manage online visa applications, document verification, background checks, and approval workflows for immigration authorities.
- **Contribution:** Designed, developed, and executed automation test scripts using Selenium WebDriver with TestNG to validate end-to-end visa workflows and approval logic. Maintained automated regression suites, analyzed failures, and ensured stable releases through continuous automation execution.

BlueG 2.8 – Background Verification Platform

- **Overview**: A Background Verification (BGV) software product used by internal operations teams to manage and process candidate background verification workflows across multiple modules. The product followed a continuous enhancement and release model with frequent feature updates.
- **Contribution:** Performed manual testing for new enhancements and existing modules, ensuring stability of previously released functionalities during each release cycle. Created, updated, and maintained test cases, regression test records, RTMs, and test artifacts, and logged, tracked, and retested defects using Jira.

WhatsApp2Ride (WA2R) – Uber Integration Project

- **Overview:** A WhatsApp-based ride booking application integrated with Uber, enabling users to book rides through WhatsApp conversations. The system was designed to support low-bandwidth environments and improve accessibility for users without direct access to the Uber app.
- **Contribution:** Performed manual testing across functional, integration, system, and regression phases for end-to-end booking workflows. Automated selected regression scenarios using Selenium WebDriver with TestNG, created and maintained test cases and test artifacts, and managed defects using Jira.

EDUCATION

Bachelor of Technology *06/2016 - 04/2020*

Sri venkateswara College of Engineering and Technology *JNTU*

Percentage *78%*
