PROFESSIONAL SUMMARY

Results-driven QA Lead with 8 years of experience in Manual and Hybrid Testing across Web, Mobile, Super App, E-commerce, Travel, Payments (BBPS), and Salesforce Marketing Cloud (SFMC) platforms. Expertise in Test Planning, Defect Management, Regression Testing, API Testing, Database verification (SQL), Accessibility Testing, and Release Management in Agile/Scrum environments. Proven experience leading QA teams, improving release quality, and reducing defect leakage. Hands-on experience to Playwright automation using Python and Pytest.

SIGNATURE STRENGTHS

- Python and Pytest
- Playwright
- Salesforce Marketing Cloud
- Postman (API Testing)
- Agile / Scrum Methodologies
- Test Planning & Test Strategy
- Requirement Analysis & Traceability
- Test Case Design & Execution
- Functional Testing: Web, Mobile, Email Campaigns
- Root Cause Analysis
- UAT Testing & Support
- Browser Stack, Litmus & Email on Acid
- Defect Lifecycle Management
- Bug Reporting
- JIRA/ Azure
- Test Metrics & QA Reporting
- Release Validation & Sign-off
- Cross-functional collaboration
- Client Communication
- Analytical & Problem-Solving Skills

CERTIFICATIONS

- Scrum Foundation Professional by CertiProf.
- Digital Platforms and Lifecycle Management.
- Product Management by Jobaaj
- Scrum Foundation by Skillsoft
- Agile Principle and Methodologies by Skillsoft
- Google Analytics for Beginners
- Email Marketing by HubSpot
- Training on Manual & Automation from Inceptra Technologies

PROFESSIONAL EXPERIENCE

Adani Digital Labs (Travel & E-commerce) (***Deputy Manager QA)*** *Aug 2022– Jul 2025*

- Led QA strategy, test planning, release management and execution for Adani One Super App & other Adani Business Web/APP across Web, and Mobile.
- Managed and mentored a team of 6–8 QA engineers, assigning module ownership and reviewing test coverage.
- Reduced regression testing effort by 25% through reusable automation test suites using Playwright with Python and risk-based testing approach.
- Reduced production defect leakage by 30% by improving test scenarios, RCA, and pre-release validation.
- Performed Functional, Regression, API, and Database testing for complex workflows including Flight/Hotel booking, BBPS payments, Coupons/Offers engine, Co-brand credit card integration.
- Validated SFMC email campaigns, landing pages, push notifications, and AMP script logic for accurate customer communication.
- Creation and maintenance of test cases, test scripts, test data, and QA documentation, ensuring comprehensive test coverage and traceability.
- Monitored project quality metrics, prepared QA status reports, and communicated risks, issues, and mitigation plans to stakeholders and leadership
- Performed UAT Support cross-browser, cross-device, and accessibility validation before releases.

Project highlights:

- Working on Web, M-web & Mobile based Application for Adani One app, Pranaam, Adani Real Estate.
- Functional & Regression on workflows, offers, coupons and payment
- Travel and e-commerce services like Flight & hotel booking, Pranaam Airport service, BBPS payments and Cobrand credit implementation.

Publicis Sapient (Website & SFMC) (***Associate QA L2)*** *Mar 2022 – Aug 2022*

- Ensured defect-free execution of **global SFMC campaigns** across customer journeys, automations studio, and A/B tests for clients including Nestlé, Henkel, and GSK.
- Improved email rendering accuracy to 98% using Litmus and Email on Acid tools.
- Designed, optimized, and executed manual test cases to ensure maximum functional coverage and early defect detection.
- Executed manual testing, API Testing, regression testing, and email testing for global SFMC implementations.
- Validated Journey Builder workflows, SQL data segmentation, AMP script personalization, and Automation Studio processes.
- Logged, tracked, and validated defects, working closely with developers and marketing teams to ensure timely resolution prior to campaign deployment.
- Coordinated with onshore stakeholders to communicate QA status, UAT Support, deployment readiness, and post-campaign performance insights.

Project highlights:

- Working on Ecommerce website & Digital Marketing Campaign for Ready Refresh (by Nestle), Henkel & GSK
- Functional, UI Testing, API Testing, & Regression on workflows, payment, SFMC campaigns
- Tools used: SFMC, SQL, Litmus, Email on Acid, WAVE, Screen reading tool (NVDA, Voice Over)

AWARDS & ACHIVEMENTS

- Awarded "Learning Mindset" twice at Publicis Sapient for outstanding initiative.
- Led QA efforts for Adani One Super App and multiple high-impact SFMC Projects.
- Streamlined QA process by identifying reusable test scenarios and regression, improving efficiency by 20%.
- Mentored and guided team of 6-8 QAs engineers, ensuring timely delivery and adherence to Agile best practices.

EDUCATION

- B. Tech CSE (MDU)
- 12th and 10th (CBSE)

Future Focus Infotech (Website & SFMC**) Associate QA** *Mar 2020 – Mar 2022*

- Validated Email Template, SFMC journeys, A/B testing, SQL automations, data extensions, and personalization logic.
- Validated AMP script logic, dynamic content blocks, data extensions, and personalization scenarios to ensure accurate data-driven communication.
- Conducted cross-browser and cross-device testing using Litmus, Email on Acid, BrowserStack to ensure consistent user experience.
- Collaborated closely with onshore stakeholders to validate deployments, resolve defects, and support campaign optimizations prior to production releases.
- Reduced email and content defects by 30% with structured QA checklists.
- Logged, tracked, and verified defects, ensuring timely resolution and adherence to QA best practices.
- Supported stakeholders with pre-deployment validations (UAT) and campaign performance insights.

Project highlights:

- Working on Ecommerce website & Digital Marketing Campaign for Ready Refresh (by Nestle), Henkel & GSK
- Functional & Regression on workflows, payment, SFMC campaigns
- Tools used: SFMC, SQL, Litmus, Email on Acid, WAVE, Screen reading tool ((NVDA, Voice Over)

Farsight Technologies (HRMS Modules**) Software Engineer** *Jun 2019 – Feb 2020*

- Executed end-to-end testing across web and mobile applications, covering Functional, UI, Regression, Smoke, and Sanity testing cycles.
- Conducted database validation using SQL queries on SQL Server to verify employee data, payroll calculations, approvals, and system integrations.
- Designed and executed detailed test scenarios, and test cases, resulting in reduced production defects and improved release quality.
- Performed root cause analysis (RCA) on identified defects and collaborated with development teams to drive corrective and preventive actions.
- Logged, tracked, and managed defects throughout the defect lifecycle, ensuring timely resolution and clear communication with developers, and other stakeholders.
- Delivered user training and functional documentation, enabling smooth adoption of HRMS applications by end users and support teams.

Project Highlights:

- Working on HRMS Modules like Recruitment, Employee Management, Leaves & Attendance, Payroll, Roles & Permissions.
- Tools used: SQL server, Web & Mobile testing, Jira

Farsight IT Solutions (HRMS Modules**) Software Engineer** *Jul 2016 – Aug 2018*

- Performed comprehensive testing of HRMS modules such as Employee Management, Attendance, Leave Management, Payroll, Roles & Permissions, and Reporting.
- Executed end-to-end testing across web and mobile applications, covering Functional, UI, Regression, Smoke, and Sanity testing cycles.
- Conducted database validation using SQL queries on SQL Server to verify employee data, payroll calculations, approvals, and system integrations.
- Designed and executed detailed test scenarios, and test cases, resulting in reduced production defects and improved release quality.
- Logged, tracked, and managed defects throughout the defect lifecycle, ensuring timely resolution and clear communication with developers, and other stakeholders.
- Documentation of functional workflow enabling smooth adoption and support teams.

Project Highlights:

- Working on HRMS Modules like Recruitment, Employee Management, Leaves & Attendance, Payroll, Roles & Permissions.
- Tools used: SQL server, Web & Mobile testing, Jira
