PUNIT ANIL KUDACHE

AUTOMATION TEST ENGINEER

9527933852 | punitkudache5@gmail.com | LinkedIn: linkedin.com/in/punit-kudache

SUMMARY

- **Detail-oriented Automation Tester** with over **3 years of experience** in software testing and quality assurance for web-based applications.
- Proficient in both **manual and automated testing** methodologies, with a strong focus on **Java and Selenium frameworks**.
- Skilled in designing and implementing automated test scripts, ensuring comprehensive test coverage and exceptional software quality.
- Experienced in **Agile/Scrum environments**, contributing to all phases of the **SDLC**.
- Experienced in **CI/CD pipelines, Agile methodologies**, and cross-functional team collaboration.
- Hands-on experience with tools and technologies including **JFrog for artifact management**, **RabbitMQ** for messaging, **SonarQube** for code quality analysis, **Grafana** for monitoring and dashboards, and **MongoDB for NoSQL database testing**.

SKILLS

- **Programming languages**: Java (8,11,17), SQL
- **Frameworks:** Selenium, TestNG, BDD, Cucumber, Junit, Microservices,
- **API & Tools:** Postman, Swagger, REST Assured, SOAPUI, JIRA, HP ALM, Intellij
- **Performance & Monitoring:** JMeter, SonarQube, Grafana, PuTTy
- **DevOps & Cloud**: Jenkins, CI/CD, Docker, Kubernetes, GCP, Jfrog
- **Messaging & Queues:** RabbitMQ
- **Database:** SQL, MongoDB
- **Version Control & Build Tools:** Git, Bitbucket , Confluence, Maven
- **Platforms & Methodologies :** Unix/Linux, Windows, Agile, Scrum

WORK EXPERIENCE :

Tata Technologies Ltd :

Automation Test Engineer: Oct 2024 – Present | Client: VSR

- Performed manual and automated testing across releases to ensure application functionality and reliability. Maintained Selenium, Cucumber, TestNG, and Java frameworks, improving test efficiency by 40% and accelerating test cycles by 20%
- Designed and executed API test cases via Postman and Postman CLI, utilizing Swagger documentation for endpoint validation and integrated automated API testing into CI/CD pipelines using GitLab.
- Conducted backend validations and log analysis on Google Cloud Platform (GCP) to verify data accuracy, debug production issues, and executed complex SQL queries ensure data consistency across relational databases.
- Created and maintained test plans, cases, data, and reusable automation scripts using Agile methodologies. Actively participated and collaborated with cross-functional teams to clarify requirements and mitigate risks.
- Managed defects and quality assurance activities end-to-end using JIRA, ensuring full traceability and transparency throughout the QA lifecycle and provided final sign-off for production deployments

April 2023 – Oct 2024 | Project: NVRS

- Collaborated with developers to validate Java Spring Boot microservices, focusing on backend API and business logic testing using JUnit integration tests for early defect detection.
- Implemented CI/CD pipelines with JFrog Artifactory, managing deployments and artifacts; utilized SonarQube for static code analysis and quality gate enforcement to maintain high code standards.
- Built and maintained Grafana dashboards for real-time monitoring of application metrics, test results visualization, and performance analysis.
- Verified asynchronous processes and message flows using RabbitMQ, ensuring accurate queue handling and message delivery.
- Collaborated with devops team for application deployment and server management in higher environments.

Aug 2022 – Apr 2023 |Project: WebScraping

- Developed automated web scraping solutions using Java and Selenium to extract data from legacy web applications and integrated JDBC connectivity for efficient storage into SQL databases.
- Automated data collection, transformation, and loading from web sources into structured SQL database tables.
- Created reusable Java modules to streamline the data scraping and storage process, reducing manual efforts and errors.
- Collaborated with cross-functional teams to analyze legacy applications structures for efficient data extraction
- Monitored and maintained the scraping system, troubleshooting issues related to web page changes or connectivity

ACADEMIA

- B.E. –Computer Science and Engineering, 2022 | Shivaji University, Kolhapur

AWARDS AND RECOGNITIONS

- **Spot Awards** (JLR| Q2-FY25): Recognized for exceptional client project performance.
- **Rise Award** (TTL | Q1-FY25 & Q3-FY23): Honored for delivering high-quality work within tight deadlines.

CERTIFICATIONS & TRAINING

- TechVersity certified Java programmer
- TechVersity certified Automation Test Engineer
- TechVersity certified Integration Test Engineer
- TechVersity certified QA Engineer

PERSONAL INFORMATION:

Address: Hinjewadi, Pune. **DOB:** 10th July 2000. **Gender:** Male **Linguistic Proficiency:** English, Hindi, Marathi
