MEGHANA S

Bengaluru, India | 91-8217428683 |meghanakoundinya19@gmail.com | https://www.linkedin.com/in/meghana-s-6aa4821b3

Professional Summary

- **Software Test Engineer** with **3+ years of experience** in delivering high-quality software solutions
- Strong expertise in **manual testing** including functional, regression, and performance testing
- Hands-on experience with test automation tools and frameworks such as **Selenium and Appium**
- Solid understanding of **SDLC** (Software Development Life Cycle) and **STLC** (Software Testing Life Cycle)
- Proficient in **test case design, execution, and defect tracking** using tools like Jira and Bugzilla
- Experienced in **identifying, reporting**, and **verifying defects** to ensure timely resolution
- **Strong analytical** and **problem-solving** skills with attention to detail

Area of Expertise

Business Skills:

- Manual Testing (Functional, Regression, Smoke, Sanity, System Testing)
- Test Case Design, Execution & Test Scenario Preparation
- Requirement Analysis & Test Planning
- Defect Tracking & Root Cause Analysis
- SDLC & STLC Knowledge
- API Testing (Basics – Postman)

Technical Tools / Skills:

- **Test Automation Tools:** Selenium WebDriver, Appium
- **Test Frameworks:** TestNG,
- **Bug Tracking Tools:** Jira
- **Version Control:** Git, GitHub
- **Programming / Scripting**: Java (Basics), SQL
- Test Documentation & Reporting

Professional Experience

Software Test Engineer — **Jan 2023 to Present**

Digital Think Technologies LLP — **Bengaluru, India**

- Designed and executed **manual test cases for web applications**, improving overall **test coverage by 30%** and ensuring alignment with business requirements.
- Collaborated with developers, product owners, and business analysts to clarify requirements and acceptance criteria, **reducing requirement-related defects by 25%.**
- Performed functional, regression, smoke, and sanity testing across multiple releases, **contributing to a 35% reduction** in production defects.
- Identified, logged, and tracked defects using Jira, **achieving a 95% defect closure rate** within sprint timelines.
- Executed high-priority manual **regression test scenarios**, **reducing rework by 40%** and improving overall release stability and efficiency.
- Prepared and maintained **test plans, test cases, and execution reports,** improving test documentation quality and audit readiness by 25%.
- Performed **re-testing and regression testing** after fixes, ensuring **100% verification of resolved defects** before release.
- Analyzed test results and shared quality metrics and **release status reports with stakeholders**, supporting informed release decisions and reducing last-minute release risks by 20%.

Junior Process Associate **Sep 2021 to May 2022**

Verity Global Solutions Pvt Ltd **Bengaluru, India**

- I spearheaded the transition process for **refinance closing and Settlement**, driving the successful implementation and optimization of cutting-edge procedures.
- Leveraging my expertise, I meticulously prepared the **lender Closing Disclosure (CD)** and coordinated the release of comprehensive digital **closing packages to notaries**, ensuring seamless, timely, and precise document signing.

Education

Bachelor of Engineering (B.E.) in Computer Science – 6.9 CGPA **2021**

ACS College of Engineering, Visvesvaraya Technological University (VTU) Bengaluru

Project Work

E-commerce Website Testing

- Developed over 150 automated test cases using Selenium WebDriver in Java, increasing test coverage for an e-commerce website by 85%.
- Performed regression testing, ensuring 95% of the website's features worked correctly after updates.
- Collaborated with a team to report and track 100+ bugs using JIRA, enhancing issue resolution efficiency by 70%.

Certifications

- Selenium WebDriver Certification from Star Agile
