TECHNICAL SKILLS

- **Concept and Technologies** (Java Spring boot, REST API, Swagger , Mongo – dB , MySQL, Micro-services, Kafka, API), **Kubernetes**, **Containerization** (Docker), Lombok , Devops Jenkins, Tomcat , SonarQube, Git, Git hub, YAML, JSON AWS , Code Pipeline, S3 , Lambda ,EC2 , Code Commit, React , Jenkins (CI/CD), cloud Formation).

WORK EXPERIENCE 4 years

- **Java Spring boot Developer** Capgemini, India Pvt. Ltd. (*July 24 present*)
  - **Project - Restaurant Management** (Client : Darden)
    - ∗ Conducted in-depth analysis for UX screen development, ensuring adherence to architectural principles, microservices, and industry standards, documented using Swagger.
    - ∗ Implemented REST APIs for diverse backend services in , accompanied by thorough unit testing using Junit.
    - ∗ Proficient in building microservices from the ground up and establishing seamless communication between them.
    - ∗ Demonstrated expertise in working with relational databases, particularly MySql.
    - ∗ Conducted code debugging and performed API testing with tools like Postman. Utilized SonarQube for comprehensive Code Quality checks.
    - ∗ Successfully deployed applications in Kubernetes non-production clusters through both CI/CD pipelines and manual processes employing Helm charts.
- **Java Springboot Developer** Capgemini, India Pvt. Ltd. (*July'22 - Nov' 2023*)
  - **Project Client : STC (Saudi Telecommunication Company)**
    - ∗ Developing REST APIs in Java Spring Boot, ensuring comprehensive unit testing with JUnit and Mockito.
    - ∗ Experienced in building and integrating microservices for efficient communication.
    - ∗ Conducted code debugging and executed API testing using tools such as Postman.
    - ∗ Proficient in working with relational databases, with a focus on MySQL.
- **Software Developer Intern** Capgemini, India Pvt. Ltd. (*Jan'22 - July'22*)
  - Engaged in automation tasks and acquired proficiency in Selenium for streamlined testing processes.
  - Executed Proof of Concepts (POCs) with notable examples, such as automating interactions on Facebook.

MAJOR PROJECTS

- **Credit Card Fraud Detection:**
  Developing a model for Credit Card Fraud Detection by leveraging historical credit card transactions, distinguishing between legitimate and fraudulent activities. The model aims to identify potential fraud in new transactions based on past patterns.
- **Cafe Billing Management System:**
  Creating a Web Project focusing on billing and management systems, employing HTML, CSS, and JavaScript for design and functionality. The project encompasses an online billing and booking system.
- **Unemployment Rate:**
  Developing a Machine Learning Project for predicting the Unemployment Rate across different countries, utilizing Python's libraries to create graphical representations based on provided data sets.

ACADEMIC DETAILS

Examination	University/School	Year	Marks
10th	Spring Fields College , Moradabad(ICSE)	2015	62.8%
12th	Spring Fields College, Moradabad(ISC)	2017	69 %
B.Tech(CSE)	Moradabad Institute of Technology(MIT, Moradabad)	2017-2021	62%

CERTFICATES/ACHIVEMENTS

- AWS Cloud Practitioner Certificate (Valid till 2028),
- Aws Solution Architect Certificate (Valid till 2028),
- Azure (Az-900),
- Agile Software Development
