P Venkateswarlu Krishnaraja Puram, Bangalore-36
+91 9008385084 pvr.venky@gmail.com

Executive Summary

- I have 16+ years of IT experience in the field of software testing and in the areas of Web, Mobile, Web Services, Rest Services based applications.
- Experience in building and managing offshore test service teams, leadership of teams, and Quality Management.
- Experience in planning and execution of test service tasks through **SDLC (Agile scrum)** for the enterprise level multi-tier system, AWS and Azure Cloud based application development.
- Having **6+** years of experience in functional Testing of **API/ Web services** using **Swagger, Postman and Soap UI.**
- Expertise in **Functional, System, Integration, UI, API, Web App Security, Accessibility** and **Automation Testing**.
- Experience in Web Application Security testing using **Burp Suite, ZAP and Visual Code Grepper.**
- Experience into **Mobile application** testing using Emulator and Physical devices **– iOS, Android and Windows.**
- Experience in Developing and Maintaining Test Automation Scripts for Web applications using **Selenium (Web Driver), Pytest, Playwright, ALLURE Reporting.**
- Experience in developing **Data Driven, Page Object Model and Hybrid Framework using Pytest Playwright, Python and Selenium WebDriver.**
- Experience into configuring and deploying the automation Test Scripts into Continuous Integration environment using **Jenkins** and **Git Repo**.
- Back End Testing experience by writing and executing SQL queries in SQL Server, Azure Data Explore for large set of data.
- Validating data imported in to **COSMOS** database where **NO SQL** is used in the project.
- Good Knowledge of automation testing using **TestRigor AI** based tool.
- Experience in build installations in Linux and windows and environment setup on **Tomcat server, JBoss** for QA team.
- Very good knowledge of Fleet Management, Onesource Indirect Tax for SME, Mobile Device Management, Telecom Expensive Management and Supplier Relationship Management product domains.

Technical Skills

Functional Testing Tool:	Playwright, Selenium, Swagger, Postman, SOAP UI, BrowserStack, Test Link
Programming Languages:	Java, Python, HTML, CSS, XML
Defect Tracking Tools:	Azure DevOps, Jira, Rally, Quality Center/ALM, and Team Track6.2/7.0.
Web Security test tools:	Burp Suite, Zap, Visual Code Grepper
Operating System:	Windows, UNIX, Linux Redhat
RDBMS/ Database / No SQL:	ADX, Cosmos, Oracle 10g/11, TOAD 8.0\9.7, SQL Server2008\2012
Version Control System:	Git-2.18, SVN, TFS, CVS1.2.2, Perforce
Application Server:	Jboss5.0, Tomcat, IIS 6.0, WebSphere
Mobile Platforms:	iOS family, Android family, Windows10.0

Work Experience

- Worked as Quality Lead in Thought Focus Information Technologies, Bangalore from Jan 2021 to March 2025 (www.thoughtfocus.com)
- Worked as Lead QA Engineer in NLB Services- Next Level Business Services, Noida from Sep 2018 to July 2020. (www.nlbservices.com)
- Worked as Lead QA Engineer in Tangoe Inc, Bangalore from March 2013 to Feb 2018. (www.tangoe.com)
- Worked as Senior Product Engineer-QA in Symphony Services Corp (India) Private Ltd, Bangalore from Aug 2007 to Feb 2013. (www.symphonysv.com)

International Assignments

- Travelled to Waltham, Massachusetts, USA in August 2013 for one month to have discussions on product knowledge and process implementations of MDM product.

Awards and Recognitions

- Star Performer- for outstanding performance during the Encompass Video, TMC product developments.
- Team Award - Innovation of the year, for Encompass Video product developments.
- Bravo award for delivering a defect free release during SPM and SQM product developments.
- Spot Award – Going Extra Mail for depicting efficient and higher working abilities during EMS and MDM product developments.

Education

- MBA (Master of Business Administration) in IT & Systems from ICFAI University.
  B.Sc. Computer Science from Sri Venkateswara University.

Project Experience

Thought Focus Information Technologies: **Jan 2021 - March 2025**
(Client: J.J. Keller & Associates)

Project: ENCOMPASS:
Tools**:** Playwright**,** Pytest, Python, ALLURU Report, Git, Postman, Agile, XML, JSON, SQL, COSMOS, ADX.

Responsibilities:

- Test Estimation, Test Strategies, Test Plans, Test Suites, Test Cases / Test Scripts, Requirements Analysis
- Participate in relevant meetings Grooming, Scrum, Bug triage and Retrospective meetings.
- Responsible for coordinating all phases of Testing activities including Functional, API end point validations, Security Testing, Regression Testing.
- API and Integration testing using Swagger, Postman tools.
- Designed and developed Data Driven, Page Object model automation framework using Pytest, Playwright and Python.
- Rest API testing using Python requests library.
- Involved in the Continuation Integration of the automation framework with Jenkins, Git repository.
- Data validations in SQL and Cosmos
- Log verifications in ADX database, Azure Application Insite,
- Testing the scheduler functionalities using Azure service bus queue.
- Performed Defect Tracking & project Management in Azure Devops.
- Working in coordination with other teams Dev, BA, Product Management in implementing the quality standards and benchmarks.
- Co-ordinating with Dev and Security teams on security issues analysis of Veracode report, filing defect and verification.

Project: ENCOMPASS VIDEO & ELD (Mobile):
Tools: Android, iOS, BrowserStack, LightMetrics Cloud, Azure DevOps, SQL, Postman.

Responsibilities:

- Requirements analysis and find scope, estimations, planning, test design, and executions.
- Participate in relevant meetings Grooming, Scrum, Bug triage and Retrospective meetings.
- Running Scrum calls and responsible for sprint releases.
- Test execution on Android, iOS devices using physical devices and BrowserStack.
- Responsible for coordinating all phases of Testing activities including Functional, Usability, Compatibility, Integration and Regression Testing.
- API testing using Postman
- Data Analysis, Driver Coaching workflow in LightMetricx Cloud.
- Data validations in SQL database.
- Performed Defect Tracking & Project Management in Azure Devops.
- Working in coordination with other teams Dev, BA, Product Management in implementing the quality standards & benchmark.
- Involved in creation of demo deck for all the stakeholders.

Project: TRAINING MANAGEMENT CENTER:
Tools: Playwright, Pytest, Python, ALLURU Report, Postman, Git, Agile, JSON, SQL.

Responsibilities:

- Requirements analysis and find scope, estimations, planning, test design and executions.
- Participate in relevant meetings Grooming, Scrum, Bug triage and Retrospective meetings.
- Assign task to team members and track the status.
- Responsible for coordinating all phases of Testing activities including Functional, UI, System, End to End, Compatible, Regression Testing on DEV, QA, and PROD environments.
- Responsible for API testing using Swagger, Postman and prepare the test results for other QA resources.
- Designed and developed Data Driven, Page Objective framework using Playwright, Pytest and Python.
- Rest API testing using Python requests library.
- Create Azure pipelines and execute smoke test suite on every new build and share report to the team.
- Involved in the Continuation Integration of the automation framework with Jenkins, Git repository
- Data validations in SQL.
- Integration test from TMC to other products with in J.J. Keller.
- Performed Defect Tracking & project Management in Azure Devops.
- Security test using BurpSuite and ZAP– Verifying OWASP techniques.
- Involved in creation of demo deck for all the stakeholders.

NLB Services (Client: Thomson Reuters): **Sep 2018 to July 2020**

Project: ONESOURCE Fast VAT
Tools: JMeter, Postman, SOAPUI, SQL, Jira

Responsibilities:

- Requirement Analysis and streamlined the Testing activities – scope, estimations, planning, test design and executions.
- Participate in all meetings Grooming Sessions, Scrum, Bug triage and Retrospective meetings.
- Responsible for coordinating all phases of Testing activities including Sanity Test, UI, System Integration, Data Validation, UAT, Regression.
- Load and Performance testing using JMeter.
- Created Performance Testing Baselines and testing process for the application.
- Developed SQL scripts to load data for test cases and volume testing
- Involved in the functional Testing of API/Web services using Soap UI
- Created smoke test suite using batch scripts for SoapUI.
- Building jar files and deploying in QA and Prod servers.
- Performed Defect Tracking & Project Management in Jira.
- Used Git as version controller.
- Involved in creation of demo deck for demo.

Tangoe Inc **March 2017 to Feb 2018**

Project: Tangoe Atlas:
Tools: Selenium Webdriver, Jenkins, Burp Suite, ZAP, Postman

Responsibilities:

- Lead offshore QA teams, estimations, owning test plans & documentation that communicate the procedures of QA team.
- Participate in relevant meetings daily Scrum, Bug triage meetings and Retrospective meetings.
- Introduced Web Security testing using Burp Suite and Zap
- POC for web security testing using Burp Suite
- Training the team members on Web Security testing, UI responsiveness testing and Tools Burp Suite, Zap
- Testing OWASP concepts using BrupSuite tools.
- Static Code Analysis using Visual Code Grepper.
- Test plan creation for Web Security testing and UI responsiveness testing
- Preparation of guidelines, Checklist for web security and UI responsiveness testing
- Preparing the test cases and execution for security testing
- Executing & monitoring the responses of each API call.

- Verification of data load in Required Tables using SQL scripts.
- Coordination with other teams Dev, BA, and Product Management in implementing the quality standards and benchmarks.
- Develop, Debug, Execute and manage test cases for Automation using Selenium Webdiver - Java
- configuring & deploying the automation Test Scripts into Continuous Integration environment using Ant and Jenkins.

Project: Tangoe Atlas Aware
Tools: Selenium Webdriver, Appium, Android, iOS

Responsibilities:

- Requirements discussions with Product development team for iOS, Android and Windows platforms
- Identify the scope and communicate the onshore team
- Estimations of tasks, Planning, and sprint executions
- Developing test scenarios, test cases and user flows for various types of handheld devices covering multiple iOS, Android and Windows platforms.
- Daily and sprint release status tracking
- Daily status update to management
- Defect triage, Scrum and Retrospective meetings
- Testing App in iOS, Android and Windows devices.
- Sanity, UI, Functional, Compatibility, Regression testings.
- Design and implement the automation Framework -Page Object Model using Appium and Selenium web driver.
- Debugging, Developing, and managing test cases for Automation
- Configuring and deploying the automation Test Scripts into Continuous Integration environment using Jenkins CI.
- Reviewing of automation scripts and provides feedback to team members.

Mobile Device Management (MDM)
Tools: Selenium Webdriver, Appium, Soap UI, Android, iOS, Windows.

Responsibilities:

- Understanding the business requirements and developed all lines of QA documents- Test Plan, test cases and Traceability matrix.
- Participate in relevant meetings daily Scrum, Bug triage and Retrospective meetings.
- Working in coordination with other departments Dev, BA, Product Management in implementing the quality standards and benchmarks.
- Interact with the onshore team on defects for their priority and managing the bugs in Defect Tracking
- Responsible for coordinating all phases of Testing activities including Sanity Test, UI, System Integration Testing, UAT, Regression and Automation Testing.
- Designed and implemented Data driven and Page Object Model test automation framework using Selenium web driver and Appium.
- Test Scripts writing and enhancement using TestNG Framework
- Involved in the functional Testing of API/Web services using Soap UI
- Verifying production issues and handling patch releases.
- Product Build deployments.
- Testing App in iOS, Android devices, Windows phones.

Symphony Services Corp (India) Private Ltd: **Aug 2007 to Feb 2013**

Expense Management System (EMS) – Manual Testing, SQL, Oracle.

Responsibilities:

- Involvement in meeting right from the requirement phase to release phase
- Create Test Cases, Test Data for manual testing of the functionality.
- GUI, Compatibility, Data verification and Data Validation, Usability and User Acceptance of the application
- Test data preparation for ETL data loading to respective tables into DB.
- Validating the load process of ETL to make sure the target tables are populated according the data mapping provided that satisfies the transformation rules.

- Validating the data files from source to make sure correct data has been captured to be loaded to target tables
- Executing CLI automation for data loading into oracle database.
- Verification of data in required Tables using SQL scripts.
- Build installations and environment setup on JBoss servers and running application in Linux/Windows environments.
- Testing app in iPAD, iOS and Android devices.
- Validating the reporting objects in the reporter against the design specification document.
- Delivering the weekly status report to PMs
- Interact with the dev team on defects for their priority and managing the bugs in Defect Tracking

Supplier Performance and Quality Management - Manual Testing, SQL, Oracle.

Responsibilities:

- Involved in Use Cases, Functional requirements analysis, reparation / review, execution of Test Cases and Tacking bugs using bug tracking tool.
- Involved in data migration from source data base to destination data base, and set up the application environment.
- Creating database Schema and granting permissions for each schema using scripts, Starting/Stopping oracle database in Linux environment.
- Testing data validations in fact and dimension tables in Star Schema model based on requirements using Ant targets.
- Ensured that the mappings are correct and conducted data validation testing
- Build installations and environment setup on Tomcat server and running application in Linux / Windows environments.
- Involved in Functional, Regression, System Integration and End to End testing.
