Nilesh A Dhongade

Senior Quality Analyst (SR.QA)

+91 8898979251 | **Email**: nileshdhongade07@gmail.com | **LinkedIn**: https://www.linkedin.com/in/nilesh-ajay-dhongade-6a4006191/

Senior QA Engineer with 4.5+ years of experience in manual and automation testing across Healthcare, Fin-tech, E-Commerce, and AR/VR/MR domains for both web and mobile applications. Strong expertise in STLC, functional, regression, and integration testing within Agile-Scrum environments. Skilled in Selenium (Java/Python), Playwright, TestNG, BDD Cucumber, API testing (Postman, Swagger), SQL/PGAdmin, JMeter, and AWS (Cognito, S3). Adept at debugging via DevTools, validating multi-environment releases, and converting business requirements into clear technical user stories and acceptance criteria, ensuring end-to-end quality and user-centric solutions.

Technical Skills

- **Automation Tools & Framework's –** Selenium WebDriver**,** JUnit, Playwright, TestNG, TDD, BDD Cucumber
- **API & Performance Testing –** Postman, Swagger, Jmeter (Performance & Load testing), RESTASSURED APIs
- **Cloud & Database** - AWS (Cognito, S3), SQL, PGAdmin, Athena Portal
- **Development Methodologies** – Agile Scrum, Sprint Planning, STLC, SDLC
- **CI/CD & Tools -** Jenkins, Android Studio
- **Test Management -** JIRA, QA Touch, Confluence

Work Experience

Senior Quality Analyst – *Programming.com (Client: Radence, USA)* *(Jan 2025 - present)*

Skills Showcased: Selenium, Postman, Swagger, AWS (Cognito, S3), AthenaHealth Portal, PGAdmin, SQL, JIRA, Figma, Confluence.

Project: Radence (Health Care Platform)

Project Overview: Radence is a healthcare platform for high-profile clients managing complete health journeys including appointment scheduling, concierge assistance, lab coordination, and personalized health insights through AthenaHealth API integration.

- Executed end-to-end functional, regression, sanity, and integration testing across desktop/mobile devices, multiple browsers, and all environments (DEV–PROD).
- Validated backend data and API workflows using SQL (PGAdmin), Postman, and Swagger, including AthenaHealth integrations and healthcare data synchronization (appointments, care team, labs, clinical goals).
- Verified AWS Cognito authentication flows and S3 bucket storage for patient reports and application data.
- Contributed to Agile story/requirement writing with significant BA ownership (~80%) and supported regression suites, release sign-offs, and production readiness.

Senior Quality Analyst – *Programming.com (Client–FYND)* *(Jul 2024 – Dec 2024)*

Skills Showcased: Test planning, Test case writing, and execution, Sprint Planning, Website Testing, API testing RESTASSURED API's (POSTMAN & Swagger)

Project – Nexus Mall Website, Super Dry Website, Pottery Barn Kids Website (E-Commerce domain)

- Performed comprehensive manual and automated testing of web applications across devices and browsers, creating detailed test cases/scripts and ensuring cross-browser compatibility and mobile responsiveness using tools like BrowserStack.
- Reported and tracked defects in JIRA with clear reproduction steps and severity, collaborating closely with developers for timely bug resolution and overall product quality improvement.

Project – Sephora Application

- Performed end-to-end manual testing of Android and iOS applications, executing functional, regression, and compatibility tests across diverse devices, screen sizes, and OS versions to ensure usability, functionality, and security compliance.
- Designed and executed test cases, documented results, and tracked defects in JIRA—collaborating with developers and BAs to align requirements and improve bug resolution time by 25%.

Senior Quality Assurance Engineer – *MotilalOswal Financial Services, India* *(Nov 2023 – July 2024)*

Skills Showcased: Test planning, Test case writing and execution, Sprint Planning, API testing (POSTMAN & Swagger), Jmeter (Performance testing), Selenium web driver (Java)

Project Research 360 (04/2024 – 07/2024) (Fintech Domain)

Project Overview: Research 360 is a comprehensive web-based application designed to streamline and enhance the research process across various industries, including healthcare, pharmaceuticals, finance, and more.

- Spearheaded end-to-end quality assurance for a multi-industry research platform serving Healthcare, Pharmaceuticals, and Finance sectors, validating complex data collection workflows, real-time analytics dashboards, and visualization modules to ensure data accuracy and regulatory compliance.
- Collaborated with cross-functional teams (Product, Data Engineers, Frontend/Backend Developers) to validate data integrity through SQL queries, troubleshoot complex UI/UX issues using DevTools, and ensure seamless integration between data visualization components and backend APIs.
- Designed and executed 200+ test cases covering functional, regression, and integration testing for critical features including data ingestion pipelines, cross-platform collaboration tools, and report generation, achieving 95%+ test coverage and zero critical defects in production

Project RISE Application (11/2023–03/2024)

Project Overview: RISE is an investment and trading platform that allows users to buy, sell, and manage financial instruments with real-time market data, research tools, and an intuitive trading interface.

- Conducted manual testing of Android and iOS mobile applications, ensuring functional, usability, and security compliance across multiple modules.
- Designed and executed detailed test cases for Portfolio features (holdings, P/L, valuation, asset allocation) and FD functionalities (creation, interest/maturity, premature withdrawal, auto-renewal), ensuring accurate workflows and data integrity.
- Performed functional, regression, and integration testing with backend and third-party APIs, using SQL queries to validate transaction data, portfolio holdings, and FD account records.

Quality Assurance Engineer – *Jio Tesseract, Mumbai, India* *(Apr 2021–Jul 2023)*

Project – Virtual Reality, Augmented Reality and Mixed Reality (Jio Glass, Jio Dive) (AR/VR/MR Domain)

Project Overview: Worked as a Software QA Engineer on Jio's AR/VR/MR products, including Jio Glass, Jio Dive, and the JioImmerse application. Tested immersive experiences such as 100-inch virtual screens, 360° viewing, and various VR apps across gaming, entertainment, learning, and wellness.

- Developed and maintained automated test scripts using Selenium WebDriver for web and mobile apps, reducing manual effort by 70%, and created detailed test plans, test cases, and scripts based on functional and technical requirements.
- Implemented API testing using Postman and integrated automated tests into the CI/CD pipeline with Jenkins, ensuring reliable backend services and continuous delivery of high-quality software.
- Collaborated with cross-functional and UAT teams on products like Jio Glass App, MR Launcher, and XR App Store, performing extensive 2D app testing on Android and iOS to ensure optimal functionality and user experience.Created detailed test plans, test cases, and test scripts based on functional and technical requirements.

Business Development Associate, *Think and Learn PVT LTD (Byjus) – Mumbai* *(Oct 2020 – Jan 2021)*

- Built and managed a strong sales pipeline using cold and warm outreach, negotiating contracts, closing deals, and strengthening relationships with new and existing clients to drive revenue growth.
- Coordinated between BYJU'S Home Demonstration team and clients, leading end-to-end counselling and closing session.

Senior CSE, *SITEL PVT LTD – Mumbai* *(Aug 2019 – Sept2020)*

Project Overview: Trainline is a UK-based digital rail and coach booking platform available on web, iOS, and Android. I managed internal tools and administered user accounts, collaborating closely with QA teams to streamline processes, improve testing workflows, and enhance product reliability and customer satisfaction.

- Collaborated with QA team members to identify and implement improvements to testing processes.
- Performed functional, regression, and usability testing for web applications, logged, reviewed, and verified defects.

Key Achievements & Certifications

- Improved API test coverage by 60% through the development and execution of comprehensive automated test scripts.
- Recognized as a "Best Performer" for consistently exceeding performance and demonstrating exceptional dedication to excellence (May 2023).
- Played a key role in the successful launch of a high-profile AR/VR application, ensuring its quality and performance through rigorous automated testing.

Education

- **Bachelor of Engineering – Electronics**
  Vivekananda Education Society's Institute Of Technology at Mumbai – Mumbai, Maharashtra – 2017
- **Diploma – Electronics and Telecommunication**
  Manohar Phalke Memorial Foundation's Polytechnic at Mumbai – 2014
- **High School**
  Barnes School – Nashik, Maharashtra – 2011
