Sterling expertise to serve mutual fund companies and investors.

Project 2: Twixor Master

Technologies Used : Angular,React JS, Bootstrap, SASS, Ionic app, MySql

Roles and Responsibility : Software Developer

Project Description: Twixor Master is a comprehensive platform that designed for seamless communication management. It provides two types of logins: Master Service Provider (MSP) and Independent Software Vendor (ISV) or aggregator. In this manual, first we'll walk you through the MSP login, which involves overseeing ISVs or aggregators.

For example, the MSP, like Twixor, serves as the primary server, while ISVs or aggregators, such as Karix, connect to the MSP. MSPs can have multiple ISVs/aggregators, and the MSP must onboard ISVs.

Project 2: Twixor Agent

Technologies Used : Ionic app,UI Design, HTML, SASS

Roles and Responsibility : Software Developer

Project Description: The Chat module allows you to chat in Progressive Web App and via messaging channels like WhatsApp.You can collaborate with your clients in real-time using Live Chat functionality. In this faster world,nobody prefers to wait for anything. So, by using this widget you can make the consumers to purchase your product proactively by providing instant response to their problems. In addition to that, you can help a greater number of consumers in minimal time frame, and hence the ecstasy will be scattered around.

• Positively involve with clients throughout and after they purchase your products/services

• Interact with clients rapidly and instantaneously

• Outreach using chat for instant support

• Analyze the browsing history of clients to offer assistance

Project 3: Victor

Technologies Used : Angular13, Boostrap4, HTML, SASS, ExpressJS,MongoDB
