Sai Ramm

EDUCATION

- Kumara Rani Meena Muthiah Matriculation Hr. Sec. School
  2000 - 2014
- SRM Valliammai Engineering College - BE ECE
  2014 - 2018

LANGUAGES

- English
- Tamil

CORE SKILLS

FRONT END

- React.js
- React Native
- Redux
- TypeScript
- HTML
- CSS

BACKEND

- Node.js
- Express.js
- REST APIs
- Python

SUMMARY

Senior Full-Stack Developer with 5 years of experience building and scaling production-grade web and mobile applications using React, React Native, Node.js, and cloud APIs. Proven ownership of end-to-end features—from system design and performance optimization to production deployment—across fintech, health-tech, and enterprise platforms. Strong product mindset with a focus on scalability, reliability, and user experience.

WORK EXPERIENCE

FULL STACK DEVELOPER - INTERNSHIP FEB 2021 - MAR 2021
BROWN BUTTON TECHNOLOGIES

CSI - CHURCH OF SOUTH INDIA

- Built a responsive React.js website with role-based admin access for secure content management
- Developed dynamic UI components and improved content publishing workflows

FULL STACK DEVELOPER APR 2021 - CURRENT
BROWN BUTTON TECHNOLOGIES

Owned and delivered multiple production-grade web and mobile products across healthcare, fintech, and enterprise domains, collaborating closely with product, design, and business stakeholders.

PETLOOP - CROSS-PLATFORM MOBILE APP (FULL STACK)

- Led development of a React Native application for habit tracking and goal management with real-time progress synchronization
- Designed scalable backend APIs and data models supporting daily user activity tracking
- Improved UI responsiveness and state management, enhancing overall user experience and retention

ASKHUGO – JOB PORTAL & ATS PLATFORM (FULL STACK)

- Architected and built a full-stack ATS platform with resume parsing, calendar/email integrations, and Redis-backed asynchronous job processing
- Implemented AI-driven resume matching to improve recruiter shortlisting efficiency
- Designed background processing pipelines that scaled reliably with increasing job and user volume

STRIPE BILLING & WORKFLOW AUTOMATION (PLATFORM LEVEL)

- Designed and implemented automated onboarding, billing, and CRM workflows using Stripe, Zapier, and internal APIs

SAIRAMM S

FULL STACK DEVELOPER

DATABASES & CACHING

- MongoDB
- MySQL
- MSSQL
- Redis

DEVOPS & INTEGRATIONS

- Git
- Docker
- Stripe
- Zapier
- Google APIs
- Microsoft API

AI / ML

- OpenAI APIs
- LangChain
- Retrieval-Augmented Generation (RAG)
- YOLO (object detection)

SOFT SKILLS

- Product ownership and end-to-end delivery
- Cross-functional collaboration
- Client and stakeholder communication
- Mentorship and technical guidance

- Reduced manual operational effort by approximately 60% and enabled scalable subscription management
- Translated business requirements into reliable, maintainable system workflows

LIVYANA – HEALTH-TECH MOBILE PLATFORM (FULL STACK)

- Developed a React Native health platform with secure backend services and real-time community interaction features
- Implemented personalized user experiences through scalable API design and optimized data handling

KEELADI – CULTURAL HERITAGE PLATFORM (BACKEND)

- Built RESTful APIs to manage multimedia content with secure, efficient CRUD operations
- Ensured performance, data integrity, and role-based access control across the platform

CROSS-PLATFORM DATABASE MIGRATION (MSSQL → MYSQL)

- Led a zero-data-loss production database migration for a live enterprise system
- Built custom ETL pipelines to handle schema translation, data-type mapping, and validation
- Implemented multi-stage verification layers to ensure data accuracy and integrity
- Optimized bulk-insert performance and preserved identity keys to minimize downtime
- Delivered a production-ready MySQL database with complete data consistency

SALESDUO – AMAZON OPERATIONS AUTOMATION PLATFORM

- Developed backend automation and reporting tools to streamline Amazon FBA operations
- Built APIs for shipment handling, third-party data integration, and automated report generation
- Improved operational efficiency and reporting accuracy using Redis-based job queues

RIEKER – BACKEND DEVELOPMENT (.NET)

- Developed scalable .NET backend APIs for a production mobile application
- Implemented cloud-based file uploads and robust data handling workflows

RIEKER – TRAFFIC SIGN RECOGNITION (ML / COMPUTER VISION)

- Trained YOLO models for real-world traffic sign detection and classification
- Automated dataset curation, annotation, and model training pipelines using OpenCV and PyTorch
