Professional Summary

Dedicated Software QA Engineer with 1.11 years of experience in product-based environments, contributing to the quality of regulated GxP Life Science platforms and advanced Marketing Automation systems. Proven ability in API testing, test case design, build verification (Smoke Testing), and ensuring high product reliability.

Technical Skills

- **Testing Tools**: Test Sigma, Team Foundation Server (TFS), Azure DevOps, GDP,Postman,Jira
- **Testing Performed**: Manual Testing, Automation Testing, Cross-browser Testing, Regression Testing, API Testing
- **Other Tools**: MS Excel, MS Word and Google Docs

Work Experience

Software Engineer – QA (*Resulticks* | Feb 2025 – Jun 2025)

- Performed manual and exploratory testing on web-based marketing automation platforms in a fast-paced agile setup.
- Coordinated with developers and DevOps teams to verify build issues and provide quick feedback.
- Executed Smoke Test Checklist covering all major modules to confirm build readiness.
- Participated in daily stand-ups and sprint meetings, contributing to quick issue identification
- Performed cross-browser testing on major browsers to ensure compatibility.
- Raised high-priority defects immediately in JIRA based on Smoke Test results.

Junior Test Engineer (ValGenesis (I) Pvt Ltd | June 2022 – October 2023)

- Designed and executed over 500 test cases to support web applications, achieving a 95% defect detection rate.
- Performed API testing using Postman, including creating and executing GET, POST, PUT, DELETE requests.
- Validated API responses, status codes, headers, payload structure, and error handling.
- Conducted positive, negative, boundary, and authentication testing for various API endpoints.
- Conducted regression testing to confirm software reliability after bug fixes.
- Authored and executed operational and performance qualification protocols, ensuring compliance with pharmaceutical validation standards.

Project: Web Application Testing Project

- Tested .NET framework–based web applications across multiple browsers including Chrome, Firefox, Edge to ensure consistent UI and functionality.
- Identified browser-specific bugs such as JavaScript errors, UI breakages, alignment issues, and API response differences.

Education

MA in Journalism and Communication | 2019-2021| 75% |
BCA in Coumputer Application |2015-2018 | 64% |
