Arya Prasannan Nair

Kottayam, Kerala | aryapnair2001@gmail.com | 7907367667 | linkedin.com/in/arya-p-nair-9a2571219 |

Professional Summary

Having built web applications myself, I know that great software isn't just about clean code—it's about making it unbreakable for the user. I find real satisfaction in the detective work of testing: hunting for bugs, anticipating user errors, and ensuring everything works as intended. I'm excited to bring my developer's perspective and a strong commitment to quality to a Software Testing Internship.

Education

Amrita Viswa Vidhyapeetham , Integrated BCA-MCA

June 2020-May 2025

Coursework: Object-Oriented Programming, Web Development, Database Management, Software Engineering

Technical Skills

- **Programming language:** Python, Java
- **Web and UI Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Databases:** MySQL
- **Testing Knowledge:** Manual Testing, Test Case Creation, Bug Reporting, User Acceptance Testing (UAT)
- **Development tools:** Visual Studio
- **Soft Skills:** Problem solving, team collaboration, communication, adaptability

Projects

Online Bakery Shop - Duration: 6 Months | Team Size: 2

Developed and tested a full-stack e-commerce platform for an online bakery.

- Performed end-to-end manual testing on all key features, including the product catalog, shopping cart, and user account management modules.
- Authored and executed 5+ test cases to validate user workflows, such as order placement and payment processing, ensuring user expectations were met.
- Identified, documented, and reported bugs related to front-end UI and back-end functionality, collaborating with a team member to troubleshoot and resolve issues

Cancare-Cancer Patient Support Portal - Duration: 6 Months | Team Size: 2

Designed and tested a comprehensive healthcare support system to connect cancer patients, caregivers, and healthcare professionals.

- Performed end to end manual testing on key modules, including patient management, appointment scheduling, and secure medical record access.
- Authored and executed test cases to validate critical functionality, such as the role based login system, to ensure patient data was kept secure and confidential.
- Identified, documented, and reported bugs related to data integrity and user workflows, collaborating with a team member to troubleshoot and resolve issues.

Publications

Automated Predictive Modeling for Identifying Medicinal Plants Parts Using CNNs

5th International Conference on Pervasive Computing and Social Networking (ICPCSN 2025) (Accepted)

- Applied a methodical, analytical approach to research and data validation, demonstrating a strong attention to detail required for complex technical projects.
- Authored a formal technical paper, showcasing the ability to clearly document processes and present results in a structured format.
