Muhammed Abrar

Phone: +91-7406237841 | Email: mabrarkbc@gmail.com | **Location**: **Whitefield Bangalore**
LinkedIn: www.linkedin.com/in/abrar-b67a09190

Professional Summary:

Detail-oriented and results-driven QA Automation Tester with **3.10 years of experience** in software testing and quality assurance. Proficient in **developing, executing, and maintaining automated test scripts** using **TOSCA, Selenium WebDriver, TestNG, Cucumber, and Maven**. Skilled in **functional and regression testing**, with a strong understanding of **Agile methodologies and CI/CD pipelines**. Passionate about **enhancing software reliability** by identifying defects early, conducting **thorough root cause analysis (RCA),** and collaborating with development teams to ensure **seamless software delivery**.

Key Skills: TOSCA, TDS, DEX , TCD ,Modules, Java, Selenium WebDriver, Jenkins, JIRA, MySQL, Git, Maven

Professional Experience:

QA Automation Engineer (2022 – Present)
Capgemini | Bangalore | 2022 – Present

- Developed and maintained automated test scripts using **TOSCA, Selenium WebDriver, TestNG, Cucumber** for web applications. Reducing manual effort by **75%**.
- Developed, executed the automation scripts and analyzed the result using **Tosca** and reported bugs to the developers using **Jira**.
- Spearheaded the creation of critical components, including **modules**, **test cases**, **execution lists**, and **test case design** (TCD), tailored to meet client specifications
- Utilize The Concept of **DEX** to Reduce the Test Execution Time
- Implemented the **Page Object Model (POM)** and **Behavior-Driven Framework** to enhance test automation efficiency and maintainability.
- Collaborated with developers and business analyst in **Agile/Scrum environments** to enhance test coverage and software quality.
- **Identified, reported, and tracked defects using JIRA**, performing **root cause analysis (RCA)** to facilitate faster issue resolution.

Project Experience:

COX | (2022– 2023)

- Automated test cases for smoke and regression testing using **Selenium WebDriver** and **Java**.
- Utilized Page Object Model (POM) for better code maintenance and reusability using Selenium Java**.**
- **Achieved 100% automation coverage for regression testing**, reducing manual testing efforts by **75%** and accelerating release cycles.
- **Actively participated in Sprint Planning, Sprint Retrospective, Sprint Demo, and Refinement meetings**, contributing to test strategy, backlog grooming, and continuous process improvements in Agile environments.
- Conducted **UI and regression testing**, ensuring seamless integration across multiple platforms.

Charter | (2023 – Present)

- Engaged in UI automation by implementing **Tosca** with **Test Data Service** (TDS), developing modules through the **Xscan** window and aligning elements according to specifications.
- Performed smoke, sanity, and regression testing to validate system functionality
- Developed scripts utilizing **libraries**, synchronization, recovery scenarios, and cleanup procedures.
- Developed and executed automation scripts using Tosca, ensuring thorough and efficient testing processes.
- Extracted data from database tables and performed data validation using SQL queries
- Implemented Tosca best practices focused on reusability, non-redundancy, and maintainability.

. **Certification:**

- Tricentis Tosca Fundamentals – Automating web application testing (AS1)
- Tricentis Tosca Fundamentals – Optimizing test automation with centralized test data (AS2)
- Tricentis Tosca Deep Dive – Automating beyond web applications (AE1)
- Tricentis Tosca Deep Dive – Structuring your test cases and test data (TDS1)
- Tricentis Tosca Deep Dive – Managing your stateful data (TDS2)

Education:

- **Bachelor of Engineering (Mechanical Engineering)**
- AITM, Bhatkal (Affiliated to VTU) | **2020**
