Profile

I am a skilled developer with extensive experience in building robust and scalable backend applications. I specialize in developing RESTful APIs, optimizing database performance, and leveraging cloud services to enhance application efficiency and reliability. With strong problem-solving abilities and a commitment to clean, maintainable code, I consistently deliver high-quality software solutions.

Professional Experience

Nodejs Developer, Geekologix PVT LTD, jodhpur

Jun 2023 — Present

- Designed and implemented new application modules based on product requirements using **Node.js**, while maintaining and refactoring existing codebases for improved performance and scalability.
- Integrated multiple **third-party APIs and services development to productivity and application functionality**.
- Troubleshot and debugged applications to optimize **performance** and resolve issues effectively using **logging system**.
- Deployed and managed applications on **AWS EC2** for scalable and reliable cloud hosting; utilized **AWS RDS** for efficient, secure database management.
- Implemented **performance optimization**, **caching strategies,** and **security best practices** in all Node.js-based services.
- Performed web scraping to collect and process data from external websites for business intelligence.
- Integrated and **managed payment gateways using Razor pay and PhonePe**, including implementation of **auto-payment functionality and webhook handling**
- Designed and implemented **microservices architecture**, ensuring modularity, scalability, and ease of maintenance.
- Facilitated **inter-service communication using Apache Kafka** for real-time data pipelines and messaging.
- Integrated **Google Drive API** to enable file storage, sharing, and access within the application.
- Documented APIs and services using Swagger for seamless onboarding and collaboration.
- Collaborated closely with cross-functional teams (frontend, QA, DevOps) to ensure timely delivery of high-quality features.
- Configured and scheduled automated tasks using AWS Crontab for background job execution and system maintenance.
- Configured domain setup using Elastic IP and enabled SSL certificates to ensure secure and reliable access

Education

BCA, Veer Narmad South Gujarat University, Surat, Gj

Aug 2015 — Jun 2018

MCA, Mats University, Raipur, CG
Aug 2018 — Jun 2020

Technical Skills

- Problem-solving, Team collaboration
- API integration
- JavaScript
- Node.js, Express
- MongoDB, MySQL
- Sequelize
- GitHub
- AWS deployment
- Database Design
- System Design
- REST APIs
- Microservices
- Redis
- JWT Authentication
- Socket IO
- Third-party integration
- Payment Integration
- Web scraping
- Docker

Projects

HaELO

- This application streamlines the operations of a Rajasthan High Court advocate's office by consolidating disjointed online data into a single platform.
- It integrates all essential elements like cause-lists, case data, and files, enabling swift access and supporting a fully mobile office experience
- Designed specifically for the Principal Bench at jodhpur, it offers a comprehensive solution for legal professionals.

75F

- The app has three entities: Admin, 75F team, and Partner.
- It is designed for 75F partners, enabling them to track their activities and receive motivation for exceptional performance.
- The app integrates with Pipedrive deals, a tool used to manage sales opportunities by tracking the progress of potential transactions through various stages in a sales pipeline.

Select My Designer

- Select My Designer is India's first automated scoping and budgeting tool; it helps to finalize your interior designer by understanding your requirements.

Nifty Trader

- Nifty Trader.in is a comprehensive platform for Indian stock market enthusiasts, offering a variety of tools and resources.
- It provides live updates, detailed analysis, and educational content on stock and derivative trading.
- Users can access stock screeners, option chains, and market action highlights. This Website provide Broker connectivity services like Live quotes for Indexes
