PROFESSIONAL SUMMARY

Experienced Cloud Solutions Consultant with a proven track record in optimizing cloud infrastructure, AI driven solutions, managing costs, and ensuring the security and reliability of cloud solutions especially in Microsoft Azure. Proficient in Azure, Terraform, Azure Bicep, PowerShell, Kubernetes, Helm, GitHub Actions, YAML and other cloud native tools. Specialized in FinOps strategies, cost management, forecasting, and resource optimization. Adept at cross functional collaboration with DevOps and engineering teams to drive cost effective cloud operations.

EMPLOYMENT HISTORY

June 2025 – Present **Consultant II, IBM** Kochi

- **Infrastructure & Deployment:** Provisioned and managed critical infrastructure for a major aviation company, resolving deployment issues to improve success rates.
- **LLMOps & AI Infrastructure:** Provisioned and set up the foundational infrastructure for LLMOps, enabling llm experimentation and deployment for a major aviation company.
- **MCP Server Implementation:** Researched, documented, and implemented multiple MCP servers, deploying them on AKS via Helm charts to enhance tool integration and platform capabilities.
- **Monitoring & Observability:** Deployed and configured Grafana across all the clusters to establish centralized monitoring and provide enhanced system visibility.
- **Pipeline Automation:** Debugged and optimized multiple agentic pipelines, improving automation reliability and contributing to the development of custom agents (e.g., GitHub Agent, IaC Agent).
- **Landing Zone & Governance:** Designed and implemented standardized Azure landing zones using hub and spoke network architecture for a major aviation company, enhancing security, governance, and alignment with cloud best practices. Executed PoC's for VPN Gateway to within enterprise Azure landing zones.
- **Databricks Automation**: Developed automated pipelines for streamlined setup of Databricks workspaces and Azure Data Services, enabling automated workspace creation, job management, and seamless import/export of jobs across environments.

Key Projects: A Major Aviation Company

April 2022 – May 2025 **Solutions Consultant I (Cloud Engineer), Valorem Reply** Kochi

- **Cloud Infrastructure Management:** Designed, managed, and optimized infrastructure using (Azure Bicep, Terraform) ensuring cost effectiveness, performance, security, and compliance across multiple Microsoft projects.
- **CI/CD & Automation**: Developed and executed CI/CD pipelines across multiple projects in Azure DevOps using YAML templates, streamlining code releases and ensuring consistency.
- **Cost Management & Optimization:** Contributed to the development of a cost monitoring tool that efficiently planned and optimized Azure service expenses, leading to significant cost savings for both existing and newly deployed environments.
- **Budgeting & Forecasting:** Actively monitored cloud resource expenses, generated financial reports, and provided cost saving recommendations based on accurate cost forecasts and usage tracking.
- **Collaboration**: Worked closely with DevOps teams and other stakeholders to ensure effective cloud resource usage and cost optimization

- **DevSecOps, Security & Compliance.**: Resolved security vulnerabilities across projects by integrating code quality tools in DevOps pipelines and best practices for infrastructure security using tools like ***Azure Bicep, Terraform, and PowerShell.***

- **Business Continuity & Disaster Recovery (BCDR):** Implemented BCDR strategies to ensure high availability and resilience in cloud environments across multiple projects.

- **Azure Cloud Native Services:** Integrated services like ***Azure Functions, Logic Apps, and API Management*** to meet business requirements in multiple projects

- **AI-Driven Tool Development:** Developed an AI driven tool using ***OpenAI*** to scan PRs (Pull Requests) for code vulnerabilities and provide remediation strategies.

- **Networking & Database Management:** Configured and maintained Azure VNets, firewalls, and databases like MSSQL and MySQL.

- **Kubernetes & GCP:** Deployed SonarQube on Kubernetes clusters in ***Google Cloud Platform (GCP)*** and implemented SQL database backup mechanisms.

- **Recognition:** Gained quarterly recognition for outstanding contributions to the Microsoft ANSI project.

Key Projects: Microsoft MCAP Accelerator, Microsoft Non Profit Community, Microsoft Learning Room Directory, Microsoft AINSI, Microsoft Tenant Provisioning Platform, Cloud Watcher, Costco.

Sep 2021 – Mar 2022 Associate Consultant, Valorem Reply

- **Cloud Adoption Framework:** Researched and documented a cloud adoption framework for Azure, enabling clients to manage costs, address risks, and ensure compliance during cloud migration.

- **Azure Infrastructure Implementation:** Implemented essential infrastructure on Azure Cloud using ***Terraform***, and established ***CI/CD YAML*** pipelines for development projects, improving operational efficiency.

- **Automation & Scripting:** Delivered automation solutions with PowerShell for Azure Virtual Desktop to optimize operational workflows

Key Projects: Microsoft Amplify Operations

EDUCATION

Aug 2017 – Jun 2021 Bachelor of Technology, MBITS, APJ Abdul Kalam Technological University (Computer Science and Engineering) Kochi

SKILLS

- **Infrastructure as Code (IaC):** Terraform, Azure Bicep, Azure Resource Manager Templates
- **Automation**: PowerShell Scripting, Git Actions, Azure Functions, Logic Apps, Azure CLI
- **DevOps & CI/CD:** Azure DevOps, GitHub Actions, JFrog Artifactory, GitLab CI
- **AI/ML & Data Platforms**: Databricks, LLMOps, MCP Servers
- **Networking:** VPCs/VNets, DNS, Load Balancing, Firewalls, DHCP, WAF
- **Monitoring & Logging**: Azure Monitor, Logging, Azure Log Analytics, Grafana, Prometheus
- **Security & Compliance:** DevSecOps, Entra, Defender, Threat Modelling Tool, PIM

- **Programming & Scripting**: Python, PowerShell, YAML
- **Key Services & Orchestration**: Azure Virtual Desktop, Azure Cognitive Services, Azure Active Directory, PIM, Azure Storage, SQL Database, Azure Logic Apps, Azure Function Apps, APIM, Front Door, Azure VMs, API Gateway, Blob Storage, Azure Service Bus, MySQL, KeyVault, Azure Policy.
- **Containerization & Orchestration**: Docker, Azure Kubernetes Services, Helm
- **Cloud Platforms:** Microsoft Azure, GCP (Basic), AWS (Basic)
- **Visualization:** Visio

INTERNSHIPS

Jun 2021 - Jul 2021

Cloud engineer Intern, Crozaint Technologies Pvt Ltd

Kochi

Successfully acquired proficiency in ***Linux*** and cloud platform environments, with a specific focus on ***foundational AWS*** skills.
