EXPERIENCE SUMMARY:

- Over 15 years of extensive experience in IT and web development, specializing in dynamic, web-based applications. Expertise spans PHP, HTML5, JavaScript, jQuery, CSS, and modern frameworks including CodeIgniter, Laravel, Angular, React, Node.js, Python, and Go Lang. Proficient in MongoDB, Curl, and integrating SOAP/RESTful web services, with hands-on experience in CRM platforms such as XRMS-CRM and Social Engine.
- Experience in creating dynamic components using AJAX, JQuery.
- Experienced in working with both PHPMyAdmin, and MySQL console.
- Skilled developer with experience in Node.js, React, Angular, and JavaScript, specializing in scalable APIs, backend systems, and real-time applications.
- Proficient in Object-Oriented Programming (OOP) principles for developing robust, scalable, and reusable code architectures.
- Extensive web development experience using MVC frameworks such as CodeIgniter and Laravel to build structured, scalable, and maintainable applications.
- Well Experienced in using FTP tools like FileZilla and WinSCP for application deployment and bug fixes, with strong proficiency in version control using Bitbucket and Git...
- Demonstrates exceptional analytical and problem-solving capabilities, complemented by strong leadership, communication, and organizational skills. Consistently delivers high performance and productivity in dynamic, fast-paced environments.
- Collaborated effectively with team members and engaged with clients to provide technical guidance, ensuring project alignment and successful delivery.

ACADEMICS:

- B. Tech (EEE) from JNTU University**,** CMR College of Engineering & Technology in 2007**.**
- State Board of Technical Education (DEEE) from A.A.N.M & V.V.R.S.R Polytechnic in 2003**.**

TECHNICAL SUMMARY:

Operating Systems	:	Windows Family, Linux.
Programming Languages	:	PHP(CodeIgniter), Angular, React, NodeJS, Python, Go
Web Technologies	:	HTML, HTML5, CSS, DHTML, AJAX, Angular, jQuery, Curl, SOAP and Restful Web services.
Databases	:	MYSQL, PostgreSQL, Mongo DB
Open-Source Applications	:	Elgg, Codeigniter, Laravel, maven Social engine, XRMS CRM, Piwik, CURL, SugarCRM
Version Control & Tools	:	Visual Studio, Postman, GIT, Bit Bucket.
Infrastructure	:	AWS (EC2, S3, SNS etc.)

WORK HISTORY:

- Worked as Sr. Software Engineer in **IT People Corporation India Pvt. Ltd.,** from Feb '2018 to Sep 2025.
- Worked as Team Leader in **Nagarjuna Fertilizers and Chemicals Ltd.,** from Sep '2016 to Dec 2017.
- Worked as Sr. Software Engineer in **Accendo Technologies (Pvt) Ltd.,** from Sep 2014 to Aug 2016.
- Worked as Software Engineer in **Halcyon Technologies (Pvt) Ltd**., from March' 2013 to Aug '2014.
- Worked as Software Engineer in **Maxis Software Therapeutics (Pvt) Ltd**., from July' 2012 to Jan '2013.
- Worked as Software Engineer in **Needa Software Solutions (Pvt) Ltd.,** from Jan' 2010 to Feb '2012.
- Worked as Application Developer in **Portland Technologies (Pvt) Ltd.,** from Nov' 2008 to Dec '2009.

WORK EXPERIENCE

PROJECT #1

Title	:	**GDTVR– General Directorate of Traffic Vehicle Registry**
Role	:	API Developer
Client	:	Etisalcon.com
Technology	:	Node.js, HLF (Blockchain), GO Lang, Angular, HTML, CSS, PostgreSQL
Infrastructure	:	AWS (EC2, S3, SNS etc.)

Description: GDT is a comprehensive vehicle lifecycle management system designed to digitize, streamline, and secure the complete journey of a vehicle from port of entry to scrap. The solution was architected to replace a fragmented legacy system, eliminate inefficiencies, and provide a single source of truth using blockchain technology.

Built with Hyperledger Fabric, the system introduces decentralized governance, real-time transparency, and tamper-proof data integrity, while integrating various stakeholders such as vehicle owners, government auditors, insurance agencies, and tax authorities into a consortium-based blockchain network.

Responsibilities:

- Developed and tested Chain code in Go lang.
- Developed and tested integration test cases using Mocha-Chai.
- Created REST APIs to interact with the Block chain network.

PROJECT #2

Title	:	**MDP (Material Digital Passport)**
Role	:	API Developer
Client	:	Aramco, SA.
Technology	:	NodeJs, Go lang, BlockChain (Hyper ledger Fabric).

Description: The objective of the system is to create digital passport for materials. The digital passport will be used to authenticate and verify material test certificates, lab tests, trace the

materials from raw materials to final materials, details about carbon footprint, and other circular economy metrics. The system will increase efficiency in certificate and test acceptances and lower chances for fraud.

Responsibilities:

- Developed and tested Chain code in Go lang.
- Developed and tested integration test cases using Mocha-Chai.
- Created REST APIs to interact with the Block chain network.

PROJECT #3

Title	:	**DUBAI RTA TARS**
Role	:	API Developer
Organization	:	IT People Corporation India Pvt.Ltd, Hyderabad.
Technology	:	NodeJs, Go lang, BlockChain (Hyperledger Fabric).

Description: The Monitoring and Enforcement Department (MED) of Dubai Road Transport Authority (RTA) intends to implement a new system, named TARS, to efficiently track, monitor and regulate the car rental activities which helps to collaborate across different stakeholders interested in the car rental activities in Dubai.

The project aims to implement blockchain-based distributed ledger and smart-contracts for managing the car rental activities. The solution also includes a portal for user access, an API Gateway for programmatic access and an analytic data store.

Responsibilities:

- Developed and tested Chain code in Go lang.
- Developed and tested integration test cases using Mocha-Chai.
- Created REST APIs to interact with the Block chain network.

PROJECT #4

Title	:	**Trust Your Supplier (TYS)**
Role	:	UI Developer
Client	:	IT People Corporation India Pvt.Ltd, Hyderabad.
Technology	:	ReactJs, Carbon UI, HTML5, CSS, BlockChain (Hyperledger Fabric) Mongodb.

Description: Trust your Supplier creates a trusted source of supplier information and digital identity that simplifies and accelerates supplier onboarding and lifecycle management. It allows procurement organizations permissioned access to pre-verified supplier information with the trust that is guaranteed with cryptographic security. Data Providers and other 3rd parties enhance the ecosystem of services to provide an integrated experience.

Responsibilities:

- Used Agile (Scrum) methodology for the iterative development of the application.
- Responsible for the analysis of requirements, technical and design specification documents and participating in scrum status reports.
- Involved in all phases of the software project life cycle Implementation and front-end architecture.

- Developed the user interface using HTML5, Carbon, Bootstrap4 and SCSS.
- Wrote custom components, directives and implemented services.
- Involved in Unit testing and Jasmine Test cases.

PROJECT #5

Title	:	**Vantage (Gaming Web Application)**
Role	:	Angular Developer
Organization	:	Lenovo China
Platform	:	Angular 9
Client	:	Lenovo, USA

Description: Lenovo Vantage (Gaming) is a new application that makes it simple to update your drivers, run device diagnostics, request support, and discover apps. It helps you get the most out of your device. ... The app helps you get the most out of your device: Keep your system up to date. Customize various hardware settings.

Responsibilities:

- Used Agile (Scrum) methodology for the iterative development of the application.
- Responsible for the analysis of requirements, technical and design specification documents and participating in scrum status reports.
- Involved in all phases of the software project life cycle Implementation and front-end architecture.
- Developed the user interface using HTML5, Bootstrap4 and SCSS.
- Wrote custom components and implemented Accessibility.
- Working with Restful API's Integration.
- Involved in Unit testing and Jasmine Test cases.

PROJECT #6

Title	:	**Vault (http://vault.lenovo.com/)**
Client	:	Lenovo, USA,
Organization	:	IT People Corporation India Pvt.Ltd, Hyderabad.
Role	:	PHP programmer
Technologies	:	Windows, IIS 6, PHP 5, MYSQL 5.1
Team Size	:	3

Description: - Vault is based on Resource space platform, an open-source digital asset management platform. (vault.lenovo.com).
The Vault is a web-based marketing asset library – a place where you can access and download all Lenovo and Think branded materials such as product images, web banners, brochures and videos.

There are several different tiers for access to The Vault.

Responsibilities: -

- Used API for login into Vault for Lenovo employees.
- Creating the collections and uploading the files.

PROJECT #7

Title	:	**Logistiks.com**
Client	:	Cost Wise Supply Chain Private Limited,

Role	:	Sr. Developer
Front End	:	CSS, JQuery, HTML
Technology	:	PHP, Ajax
Open source	:	Laravel,
Back End	:	MYSQL
Web Server	:	Apache

Description: - Logistiks is a desktop application for complete transportation solutions. w.r.t Domestic and international services like FTL, LTL, TH, TL, Shipping etc. Mutual communication happens between Buyers & Sellers.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, Laravel, JQuery, css, JavaScript, AJAX, and HTML.
- Performed the client-side validations.
- Involved in designing and creating the database.
- Development responsibilities for the Project tasks and Client interaction.
- Involved in design, development and deployment phases.

PROJECT #8

Title	:	**Zambala**
Client	:	Zen wise
Role	:	Developer
Front End	:	CSS, JQuery, HTML
Technology	:	PHP, Ajax, Soap and Restful web services
Open source	:	Code igniter,
Back End	:	MYSQL
Web Server	:	Apache

Description: - Zambala is an android application designed for Users who are interested in stock market trading. It is a unique app which brings the Users and Advisors, Stock Brokers under one umbrella and helps to create a better trading experience.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, JQuery, JavaScript, Soap client, AJAX, and HTML.
- Performed the client-side validations.
- Prepared web services for Android app development.
- Involved in designing and creating the database.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.

PROJECT #9

Title	:	**Reunifier**
Client	:	Amicus Insurance services
Role	:	PHP Developer
Front End	:	CSS, JQuery, HTML
Technology	:	PHP, Ajax
Open source	:	Code igniter,
Back End	:	MYSQL
Web Server	:	Apache

Description: - Reunifier is a desktop application for Australian insurance company's agents. Here maintains the diff companies' policies history like renewal, new, cancellation and lapse policies info.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, JQuery, JavaScript, AJAX, and HTML.
- Performed the client-side validations.
- Involved in designing and creating the database.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.

PROJECT #10

Title	:	**Tyregenius**
Client	:	Mii Labs (India) Pvt Ltd
Role	:	Developer
Front End	:	CSS, Jquery, HTML
Technology	:	PHP, Ajax
Open source	:	Codeigniter,
Back End	:	MYSQL
Web Server	:	Apache

Description: - TyreGenius, software designed to provide total solutions for operational and administrative controls in any vehicle fleet management. This Software maintain tyre from tyre manufactures to end user (user).to track each and every information about tyres.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, Jquery, JavaScript, Rolling Curl, AJAX, and HTML.
- Performed the client-side validations.
- Involved in designing and creating the database.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.

PROJECT #11

Title	:	**Travel Storm**
Client	:	Western and Oriental Travel Ltd., UK
Role	:	Developer
Front End	:	CSS, Jquery, HTML
Technology	:	PHP, Ajax
Open source	:	Codeigniter, Curl, Rolling Curl, Xml
Back End	:	MYSQL
Web Server	:	Apache

Description: - This project required us to create a middle layer that acts as a data fetcher for various clients of Western Oriental. The requirement was to talk to the various hotel data providers and get the availability of the rooms and then request a quote and booking and confirming of the rooms based on user selection from the front end.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, Jquery, JavaScript, Rolling Curl, AJAX, and HTML.
- Performed the client-side validations.

- Involved in designing and creating the database.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.

PROJECT #12

Title	:	**Onlinedrivecrm.com**
Client	:	Micrositesbyu (**MBU**)
Role	:	PHP Developer
Front End	:	CSS, Jquery, HTML
Technology	:	PHP, Ajax
Open source	:	XRMS CRM
Back End	:	MYSQL
Web Server	:	Apache

Description: - OnlineDriveCRM.com is an open source (XRMS CRM) application which is a sub-module of MBU, benefitting a vendor to gain leads for his business with the help of our OnlineDriveCRM Application. XRMS CRM is a web-based application for organizing business entities like employees, customers, associates, activities with those associates, etc. XRMS CRM generally falls into the category of application known as Customer Relationship Management (CRM), Sales Force Automation (SFA), with facet of Business Intelligence (BI).

Responsibilities: -

- Integrated the Application to MBU.
- Application development in PHP.

PROJECT #13

Title	:	**Safari Pathfinder**
Client	:	salesanalytics.com
Role	:	PHP Developer
Front End	:	CSS, Jquery, HTML
Technology	:	PHP5, Ajax
Back End	:	MYSQL
Web Server	:	IIS

Description: - Safari Pathfinder allows users to select legacy systems and compare with proposed systems and makes the proposal. The proposals can be in many varied ways and that's depends on customer to whom we are committing to. A proposal can be in many ways like Savings, performance wise etc. I involved in the whole process of selecting proposals on different topics and create proposal and sends to Salesforce.com via Tibco services as a lead. The rest of the things will be taken care by SFDC, a crm system.

Responsibilities: -

- Understanding the Architecture of the application.
- Developed the application using PHP, Jquery, JavaScript, AJAX, and HTML.
- Performed the client-side validations.
- Worked along with design team on creating UI for the website.
- Involved in designing and creating the database.
- Fixed the bugs reported by QA team.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.

PROJECT #14

Title	:	**Maxisit Admin portal**
Client	:	Maxisit
Role	:	Developer
Front End	:	CSS, JavaScript, JQuery (Easy JQuery UI) HTML
Technology	:	PHP, Ajax
Open source	:	Codeigniter
Back End	:	MYSQL
Web Server	:	Apache

Description: - It is the one Sub Module of the CTRenaissance. CTRenaissance® , an integrated clinical development platform, is built ground-up based on two value added information technology models - one that uses the Internet to integrate known & unknown constituents of information by externalizing the enterprise, and second that empowers you to go beyond externalization to proactively, and collaboratively explore and act on new scenarios that may impact clinical trial design strategy or operations or outcome

By using Maxisit admin portal is to maintain the CTRenaissance users electronically. This portal deals with all the actions regarding Users. User can perform the following operations User Managent, License, Deployment, Data Management, and Tenent.

Responsibilities: -

- Understanding the Architecture of the application.
- Built client's website in PHP, MySQL, Apache, HTML, JavaScript, and AJAX.
- Good experience in creating thumbnails using MVC pattern.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.
- Followed the MVC Pattern.
- Understand the process flow and work with team in implementing projects with self-expertise.
- I understand the importance of writing well documented, formatted and consistent coding, which helps other developers to understand logics and make the application easily extendable.
- Managing Mantis and interact with QA and team.

PROJECT #15

Title	:	**Real Estate Management System (REMS).**
Client	:	KS Technologies
Role	:	PHP Developer
Front End	:	CSS, JAVASCRIPT, HTML
Technology	:	PHP
Open source	:	Code Igniter
` **Back End**	:	MYSQL
Web Server	:	Apache

Description: - REMS are Real Estate Management Solution project which binds a strong relation between real estate ERP users and different real-estate users electronically. This Project is developed to reduce the time and risk in finding the real-estate buyers/builders/developers/professionals and managing their details. It maintains the business relationship between the stakeholders of real-estate.

I am involving to develop a E-professionals which is the sub portal of REMS. This portal deals with all the actions regarding a professional like searching a professional, appointing a professional, managing professional's appointments, payments, works, advertisements, orders, catalogs and events or reminders. Here professionals are members who provide service.

For this module, user operation starts with registration. Registration requires their personal details, contact details, professional details like availability timings and service charges per hour and bank account details.

Once the user registers with REMS-Professionals, user has to confirm email to login to REMS-Professionals. Once the user logs in, User can perform the following operations Showroom, Catalogs, Search, Advertisements, Appointment, Rating, manage works, Manage Orders, Payments, Calander, Profile, Messages.

Responsibilities: -

- Understanding the Architecture of the application.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.
- Understand the process flow and work with team in implementing projects with self-expertise.
- I understand the importance of writing well documented, formatted and consistent coding, which helps other developers to understand logics and make the application easily extendable.
- Managing Mantis and interact with QA and team.
- Participation in team meeting and in resolving the issues.

PROJECT #16

Title	:	**Ehome socials**.
Client	:	KS Technologies
Role	:	Developer
Front End	:	CSS, JAVASCRIPT, HTML
Technology	:	PHP
Open source	:	Elgg
Back End	:	MYSQL
Web Server	:	Apache

Description: An Ehome social is offers blogging, networking, community, collecting of news using feeds aggregation and file sharing features. Everything can be shared among users with access controls and everything can be cataloged by tags as well. Ehome socials power all kinds of social environments - from education to business and sports.

Responsibilities: -

- Understanding the Architecture of the application.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.
- Understand the process flow and work with team in implementing projects with self-expertise.
- Managing Mantis and interact with QA and team.
- Participation in team meeting and in resolving the issues.

PROJECT #17

Title	:	**Global Web Directory**
Client	:	Portland Technologies Pvt Ltd
Role	:	Developer
Front End	:	CSS, JAVASCRIPT, HTML
Technology	:	PHP
Back End	:	MYSQL
Web Server	:	Apache

Description: It is the one Sub Directory of the IndiaCatalog.com Web portal which provides Categories of Global websites, Agriculture &Forestry, Automobiles, Chemicals, Education, Electrical, Real Estate, Regional Portals, Tourism & Travel and so...

Responsibilities:

- Understanding the Product Requirements.
- Development responsibilities for the Project tasks and Client interaction
- Involved in design, development and deployment phases.
- Understand the process flow and work with team in implementing projects with self-expertise.

PROJECT #18:

Title	:	**Indianconstructionindustry.com**
Client	:	Portland Technologies Pvt Ltd
Role	:	PHP Developer
Front End	:	CSS, JAVASCRIPT, HTML
Technology	:	PHP
Back End	:	MYSQL
Web Server	:	Apache

Description: www.indianConstructionIndustry.com is a b2b application. Its directory of India websites and directories for Construction Industries. It is an automated application which processes the data for different Construction Related industries like Steel Industries, Cement Industries, Jobs and Stocks etc and to generate the html pages dynamically.

Responsibilities:

- Understanding Product Requirements
- Development responsibilities for the Project.
- Understand the process flow and work with team in implementing projects with self-expertise.
