SUMMARY

Detail-oriented QA Intern with experience in manual, functional, regression, and database testing. Skilled in backend and UI testing, SQL validation, and test case planning. Familiar with using Jira for bug tracking and with basic knowledge of Selenium using Java for automation testing. Experienced in security testing with Burp Suite and web application testing. Strong problem-solving skills and a focus on delivering quality results.

PROFESSIONAL EXPERIENCE

QA Trainee
MountBlue Technologies, Bengaluru, India — March 2025 May 2025

- Conduct manual, functional, regression, and database testing to ensure software quality and functionality.
- Perform backend application testing and UI testing to identify and resolve issues.
- Validate SQL queries and perform database testing for data integrity and performance.
- Create detailed test cases and document test results to support the software development lifecycle.
- Use **Jira** to track and report bugs, ensuring timely resolution of issues.

EDUCATION

CHITKARA UNIVERSITY, Rajpura Punjab (Computer Science Engineering) | **CGPA- 8.53** — 2021-2025
G.R.G National Girls School, Sirsa, Haryana | **XIIth 84.6%** | **CBSE** — 2021

PROJECTS

Blog Website

- The Blog App is an online platform tailored for user to craft, distribute, and oversee their blog content, offering a smooth experience for both creators and readers.
- Technologies used:
  - **I. Frontend**: Developed Using HTML, CSS, JavaScript.
  - **II. Backend:** Built with Express, Handling Data Storage and API request.

IPL Match Data Analysis Using Core Java and Collections

- Developed an IPL match data analysis tool using Core Java and the Collections framework.
- Utilized state management and component-based architecture to ensure efficient and scalable application structure.
- Implemented data abstraction techniques to extract meaningful insights from the datasets.

Olympic Records Database

- Developed a Java-based application to fetch and display 120 years of Summer and Winter Olympic records.
- Utilized JDBC for database connectivity and executed SQL queries to retrieve data.
- Executed SQL queries to retrieve and display Olympic records efficiently.

SKILLS

Testing Skills	: Functional & Non-Functional Testing, Regression Testing, UI/UX Testing, Performance, API Testing.
Programming Skills	: Java Programming, Junit, JavaScript, SQL & Backend Testing, Database Testing, Postman.
Methodologies	: Agile Methodologies
Test Management	: Bug Tracking (Jira), Test Case Design & Execution, Excel Sheet.
