MOHAN V

Software Development Engineer in Test

Chennai, India | mohanvenkatesh95@gmail.com | +91 8754531953

TECHNICAL SKILLS

Core Java | Selenium WebDriver | Cucumber Framework | API Testing using Postman | Maven | Jenkins | TestNG | GIT | CI/CD | Manual Testing | BDD| Data Driven Framework | Agile | POM | Jira | JMeter

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test March 2021 -present

Ramco Systems | Chennai, Tamil Nadu

Tech Stack: Java, Eclipse IDE, Jenkins, TestNG, JIRA, Selenium, CI/CD

- Strategically optimized front-end UI automation framework for logging and reporting system, reducing manual efforts by 50%
- Analysis of business requirements based on interactions with the product team.
- Enhanced automation testing framework and create new automation scripts to align with current requirements and change requests.
- Optimized the test execution efficiency by implementing a CI/CD pipeline, resulting in a 60% decrease in test cycle & significantly improving the execution phase of the testing.
- Collaborated on non-functional testing activities mainly- Performance Testing using JMeter.
- Individual contributor for performing API testing using Postman & implemented data-driven testing which increased the test efficiency & coverage by more than by 40%.
- Collaborated in requirement gathering & analysis, daily scrum meeting, retrospective & client calls.

CERTIFICATIONS

- Internal Certificate in Logistics Domain - L1 & L2

PROJECTS

AP CARGO| TRANSPORT MANAGEMENT SYSTEM (TMS)

Roles & Responsibility:

- Engineered a customized hybrid data-driven framework leveraging TestNG to create automation test cases (reducing more than 50% of manual effort)
- Developed automated test scripts based on Selenium WebDriver for web-based application.
- Successfully conducted cross-browser testing & implemented data-driven testing.
- Led the successful implementation of a robust reporting system utilizing extent reporting for detailed analysis and elevating the efficiency by 20%.
- Integrated framework with CI/CD pipeline for efficient test execution
- Guided training and support to other engineers on the use of the new framework, resulting in a broader adoption of automation throughout the organization.

RCT | WAREHOUSE MANAGEMENT SYSTEM (WMS)
Roles & Responsibility:

- Facilitated the front-end automation of the Logistics application using Selenium with Java binding language.
- Successfully performed API testing using Postman.
- Improved test efficiency and accuracy, ensuring the delivery of high-quality web applications.
- Conducted comprehensive end-to-end testing for the application throughout regression, sanity, and integration testing phases.
- Collaborated closely with product owners and development teams to build new features for testing and production implementation.
- Ensured all aspects of testing including Functional, Regression and System testing using Manual and Automated Test tools - Selenium web driver.

SOFT SKILLS

- Communicator
- Collaborator
- Decision Making
- Time Management
- Problem Solving

EDUCATION

B.E in Mechanical Engineering Jun 2013 - May 2017

GKM College of Engineering, Perungalathur
