THE ROAD SO FAR

TURING

Senior Frontend Developer
Oct 2021 - Feb 2025

Worked for Turing's Clients including a cabinet manufacture and a leading AI organisation as Independent Contractor. I was involved in various capacities ranging from Team member to Lead developer and worked on React and Electron code base.

Techs used
React, Electron JS, Open AI API, Gemini API

CODELATHE

Vue / Electron Developer
Nov 2019 - June 2021

Played the role of Vue/Electron developer for the chat/collaboration tool, Airsend. My daily activities include collaboration with the design team, working on features for a web app using Vue js, and a desktop app using electron.

I was also involved in the UI redesign of Codelathe's flagship product FileCloud.

Techs used
Vue JS, Electron, Web RTC, Web sockets

FRESHWORKS

Lead Frontend Developer
Jun 2016 - Nov 2019

Worked from scratch in the development of cloud call centre SaaS product Freshcaller. We launched the product after one year of dev, and I played the role of Front end Lead, overseeing a team of 6.

The Ember-Rails product is now used by many companies around the world who provide customer support via phone.

Techs used
Vue Js, Ember Js, Node, Twilio api, Rails

SAPIENT

UI Track Lead
June 2014 - May 2016

Being a well known digital agency, Sapient gave me the opportunity to work with well known brands such as Kia Motors, Nivea, Informa etc.

I was mostly involved in creation of Product pages, CMS for marketing pages and Managing the front end team of 11.

Techs used
Angular Js, jQuery, Bootstrap, Sitecore

BALLY GAMES

Mobile Game Developer
May 2013 - June 2014

Bally Games is a popular casino slot games provider and I was the part of the first team created to port those games to Mobile.

I worked on close to 12 games and they were released in multiple casinos. I also worked on creation on HTML slot games framework

Techs used
Backbone JS, Underscore JS, CSS Animations
