CAREER OBJECTIVE

Quality Assurance Engineer with 2 years of experience in software testing, specializing in **automation and manual testing**. Proficient in UI automation, API testing, and test framework development. Skilled in Selenium WebDriver with Java, Cucumber BDD, and backend validation using SQL. Experienced in Agile methodologies, CI/CD tools, and cross-functional team collaboration.

PROFESSIONAL SUMMARY

- Experience in automation using **Selenium Web Driver**, with **Java** on **TestNG** and **Cucumber-Junit library.**
- Worked on **Cucumber BDD framework using the Page Object Model** (POM) design pattern for scalable and maintainable test scripts.
- **API validation** using **Postman** test scripts with assertions to ensure functional correctness and performance benchmarks.
- **Knowledge in Rest Assured library.**
- Performed **CRUD operations on RESTful APIs** using **Postman** for API functionality testing.
- Experience in **SQL queries** for backend validation in **MS SQL Server**.
- Performed **manual testing on frontend banking applications**, validating UI functionality and business flows.
- Experience on build Management tools like **Maven** and continuous Integration tool **Jenkins**.
- Proficiency in **Agile Sprint Test Plan**. Strong in **SDLC**, **STLC** and **Defect Life Cycle.**
- Strong knowledge of different types of testing like **Sanity**, **GUI**, **Functional Testing**, **Re-Testing**, **Regression Testing**, **UAT Testing** and **Database Testing**, **Browser Compatibility Testing.**

TECHNICAL SKILLS

- ✓ **Programming Languages**: Java, SQL
- ✓ **Automation Tools**: Selenium WebDriver
- ✓ **Frameworks**: Cucumber (BDD), TestNG/JUnit, POM
- ✓ **API Testing**: Postman, Rest API
- ✓ **Dependency Management**: Maven
- ✓ **Version Control**: GitHub
- ✓ **CI/CD**: Jenkins
- ✓ **Test Management/Defect Tracking Tools**: JIRA
- ✓ **Performance Testing Tool** : Apache JMeter
- ✓ **IDE**: Eclipse, and Visual Studio

EXPERIENCE

Company: NatWest Group
Duration: (2024 – Present)
Job Title: **QA Engineer**

KEY PROJECT

Worked on the **Dispute Resolution System** (DRS) for Chargeback operations, both UI and Backend API Automation

ROLES AND RESPONSIBILITIES

- Validated functional requirement documents and created detailed test cases.
- Identifying **Automation** Scenarios from the set of **User stories** identified in the Sprint cycle.
- Developed **E2E automation test framework** from testing using **Selenium Cucumber with Java.**
- Achieved **85%** automation test coverage from **5%** as a individual SDET in development team.
- Executing **regression automation suite** for production release and reduced manual effort.
- Reduced duration of Smoke execution by **50%** using **parallel execution** in cucumber framework.
- Maintained and pushed **automation framework code** and test script updates to **GitHub repositories** as part of daily development and version control.
- Conducted various types of testing such as **Sanity**, **Functional**, **Regression**, **Re-testing**, **UAT**, **Cross-browser**, and **Database testing**.
- Logged and tracked defects using tools like **JIRA**, working closely with developers for timely resolution.
- Prepared Test summary in Confluence pages after regression done for production release.

EDUCATION

- Masters in Computer Applications - **SRM University** (Pursuing)
- Bachelor Of Business Administration - **Madras Christian College** (2020 – 2023) | CGPA: 8.1
- 12th – New Prince Matriculation School | CGPA: 8.7
- 10th – Rajkumar Matriculation School | CGPA: 8.5

ACHIEVEMENTS AND CERTIFICATIONS

- ✓ Automated over 250+ test cases across functional and UI testing.
- ✓ *Automation Framework Contributor* – Developed a scalable POM-based BDD framework using Java & Cucumber
- ✓ Entry Certificate in Business Analysis (ECBA)
