Professional Summary

Full Stack Software Engineer with 7+ years of experience in designing, developing, and deploying web applications using Ruby on Rails and ReactJS. Proven track record in DevOps practices, CI/CD, and cloud platforms like AWS. Strong leadership experience as an Engineering Lead with focus on system scalability, performance optimization, and security compliance.

Technical Skills

Languages & Frameworks:

Ruby on Rails, Ruby, ReactJS, Redux, TypeScript, JavaScript, RSpec, SQL

DevOps & CI/CD:

Git, GitLab CI/CD, Docker, Kubernetes, SSL, Capistrano, NGINX

Monitoring & Operations:

Splunk, New Relic, Sentry

Cloud Platforms:

AWS, Digital Ocean

Databases:

PostgreSQL, Redis

Other:

HTML, CSS, Database Design, Meta programming, OOP's, SOLID principles

Professional Experience

Senior Software Engineer, Watermarkinsights - Punjab, India | July 2024 - April 2025

- Refactored Backend **Ruby on Rails** the admin-loading logic by moving node-based filtering from the view to the controller layer, reducing API response time from **10 minutes to under 5 milliseconds** when processing over 5,000 nodes—resulting in a **> 99.999% performance improvement**.

- Full-stack development of the Assessment feature, including seamless end-to-end integration of a third-party tool (GoReact) via a custom-built Iframe implementation from scratch.

Engineering Lead, Persistent Systems – Pune, India | July 2023 – July 2024

• Front-end development utilizing **ReactJS 18**, Enhancing features within Zendesk's Admin Centre Framework (ACF); maintained multiple modules in distinct repositories.
• Played a key role in Backend **Ruby on Rails** 7 enhancing Zendesk (Classic)'s Service Level Agreement (SLA) feature, a major component(Monolith) of one of GitHub's largest repository.

- Focused on Backend **Ruby on Rails** developing advanced auditing logs to more clearly display condition definitions and transform technical IDs into user-friendly values through Arturo flagging.

Software Engineer III, Oracle Cerner – Bangalore, India | Jan 2022 – Jul 2023

• Spearheaded the deprecation of numerous proprietary Cerner Ruby gems and facilitated their integration with various microservices, enhancing the application features.
• Resolved CVE vulnerabilities, supported production issues across Java and Ruby stacks
• Participated in production support rotations and operations

Software Engineer, Saranyu Technologies – Bangalore, India | May 2021 – Jan 2022

• Built and Engineered a customer care app from scratch using Rails 6 and ReactJS 16, provisioned on EC2 and deployed via Docker
• Developed a distributed Payments module Service for the OTT platform using Rails 6. The module was provisioned on a private subnet and deployed using Docker for seamless integration and operational efficiency.

Software Engineer, Kloc Technologies – Bangalore, India | Mar 2018 – May 2021

• Engineered and Developed a **Full stack Ruby on Rails** Shopify application facilitating order synchronization using webhooks, thereby achieving successful order fulfilling and shipping from multiple warehouses.
• Streamlined the Clinsyte healthcare project that transitioned from Rails 4 to Rails 6, refining legacy test cases and fixing bugs, Feature enhancements.
•Individually contributed Designed and developed a Shopify public application from scratch, leading the complete engineering lifecycle—from architecture to deployment—resulting in successful publication on the Shopify App Store.

🔗 Low Inventory Notifications – Shopify App Store

• Facilitated from scratch CI/CD by automating build and deployment processes with self-managed GitLab, Docker, and Capistrano.

Trainee, DCT Academy – Bangalore, India | Oct 2017 – Mar 2018

• Completed full stack web development training with Ruby on Rails, JS, HTML, CSS

Education

Bachelor of Computer Applications – SRS Degree College, Chitradurga, India – 2017
