Senior Database Architect | Data Engineering & Azure Platform Expert

Executive Summary

Senior Database Architect with over 24 years of experience across software development life cycle—require analysis, design, development, implementation, and support. Specialized in SQL Server, Azure SQL, Data Lak NoSQL (MongoDB, Cassandra) platforms. Proven record delivering scalable, compliant, and high-performan database systems across healthcare and enterprise domains in India, KSA, Kuwait, and Singapore. Expert in modernization, cloud migrations, MDM automation, and CI/CD-driven deployments with strong adherence t GDPR, and HL7 standards.

• Data Quality & QA Support | Data-driven testing, test environment setup, and collaboration with QA teams accurate and performant datasets

• Agile Collaboration & Team Leadership | Partnering with developers, QA, and DevOps in agile teams for spri planning, testing, and on-call rotations

• High Availability & Disaster Recovery | Always On, replication, clustering, mirroring, and automated backup processes

• Release & Environment Management | Version-controlled deployments, CI/CD pipeline monitoring, and pro support participation

• Automation & CI/CD | Flyway, Git, SSIS, SSRS, Power BI, JIRA, Erwin, and Visual Studio

• Cross-Platform Expertise | PostgreSQL, MySQL, SQLite, Microsoft Access, and VBA-based data automatio

• NoSQL & Data Lake Technologies | MongoDB, Cassandra, Data Lake implementation, integration with analy reporting

• Database Security & Compliance | PII masking, data encryption, access control, and adherence to HIPAA/G standards

• Azure Data Platform | Azure SQL, Data Factory, Synapse, Databricks, Hyperscale – design and migration of native data solutions

design

• Performance Tuning & Query Optimization | Execution plan analysis, index design, and Entity Framework q review for scalability and reliability

• SQL Server Design & Development | Schema design, stored procedures, functions, and triggers aligned wi sprint deliverables

Core Competencies

Flyway, Git, SSIS, SSRS, Power BI, Erwin, JIRA, Visual Studio

• Master Data Management | Multi-Tenant Architecture | Compliance (HIPAA, GDPR)

• Performance Tuning | High Availability | Always On | Replication | Clustering

• Team Leadership | Agile Delivery | Mentoring & Governance

Professional Experience

Senior Database Architect I Napier Healthcare, Hyderabad I Mar 2017 – Present

• Architected enterprise-grade SQL Server and Azure SQL platforms supporting 12+ global healthcare client APAC, Middle East, and Africa.

• Led Azure Data Lake migration integrating Databricks, Data Factory, and Delta Lake for unified analytics ar reporting.

• Designed and operationalized a region-aware MDM framework integrated into CI/CD pipelines using Git ar enabling zero-defect multi-customer releases.

• Built reusable Data Template Uploader to automate ingestion of Excel templates into staging and product databases with error logging and audit trails.

• Delivered EMR migration for Singapore Prison Service (SPS MHASPS), including large object ingestion and setup.

• Implemented HIPAA/GDPR-compliant masking, anonymization, and security frameworks for sensitive heal data.

• Led DBA operations for multi-tenant, multi-facility environments with high availability and optimized perfo

Technical Consultant / Project Lead I Wipro Technologies I Oct 2000 – Oct 2008 & Aug 20(2017

• Led HIS product engineering and database modernization for major hospital networks across India, KSA, a

• Acted as SPOC for ESIC Panchdeep HIS modernization project; migrated SQL Server to MySQL in secure, la environments.

• Delivered CDR (Clinical Data Repository) for MODA, KSA, centralizing clinical records across 35+ modules v based multi-version design.

• Architected SQL Server replication and real-time integration with insurance systems for billing and covera validation.

• Designed and implemented MDM and CI/CD pipelines ensuring seamless deployment across regions usin

• Developed optimized stored procedures, triggers, and partitioning strategies improving performance by 6

• Mentored cross-functional teams on query tuning, database design, and release management best pract

Project Lead I Satyam Computers, Hyderabad I Oct 2008 – Aug 2009

Designed and migrated EMRI database from SQL Server to PostgreSQL, automating schema and data conve dynamic scripting.

Education & Certifications

• Bachelor of Engineering (ECE) – Gulbarga University

• Microsoft Certified Professional (MCP): Design & Implement Databases with SQL Server
