Prasanna Venkatachalam

Senior/Staff Frontend engineer with **11+ years of experience** building scalable web apps, leading teams, and owning systems end-to-end.

Employment History

Sr. Front End Engineer/Lead, Xflow, Bengaluru — Dec'21 – Present

Founding Engineer, who led the frontend architecture and impl from scratch.

Xflow (Founding Engineer)

- Core contributor to the architecture and development of **Xflow's flagship merchant dashboard**, built using **React.js**, **Next.js**, **Tailwind CSS**, and **GraphQL**, delivering a modern, responsive user interface.
- Developed a **Backend-for-Frontend (BFF)** layer with **NestJS**, **GraphQL**, and **OpenAPI** tools to streamline and standardize communication with backend APIs.
- Owned the end-to-end setup of the initial API documentation using **Docusaurus**, hosted on **AWS Amplify**.
- Revamped the documentation by replacing Docusaurus with a custom **Next.js** application that automatically generates docs and an interactive **API Playground** from the **OpenAPI specification**, significantly reducing manual effort and enabling direct endpoint testing within the documentation.
- Led the transformation of the website from a static app to dynamic, CMS-powered content using **Builder.io**.
- Provided mentorship and technical guidance to team members in delivering multiple critical projects.
- Have good experience with AWS, Kubernetes, Helm, and Docker for cloud infrastructure, container orchestration, and deployment management.

Applications: *Merchant Dashboard, Backend-for-Frontend (BFF) Layer, Landing Page Website, API Documentation Platform*
Tech Stack: *Next.js, NestJS, Typescript, React, GraphQL, OpenAPI, Tailwind CSS, Builder.io, AWS, Docker, Kubernetes, Helm Charts*

Front End Lead, Zoho, Chennai — Mar'19 – Dec'21

Managed and guided two frontend teams totaling 15 developers.

Zoho Tables (March 2019 - Dec 2021)

- Designed and built a product similar to Airtable using GraphQL-like server APIs for web and mobile, with a fully native JavaScript frontend leveraging web workers and web sockets.
- Led a team of 11 developers to deliver Tabular, Gallery, Kanban, and Calendar views to visualise the data.
- Lead the team to build a flexible Form Builder to design and collect data through user-driven, configurable forms.
- Transformed the product into a reusable frontend data visualization library to be used inside Zoho products.

Applications: *Response Generation layer (BFF), Tables App,*
Tech Stack: *Typescript, Javascript, Webworkers, Service workers, Webpack, Struts, Java*

EDUCATION

BE, Velammal College of Engineering and Technology,

2014 - Completed Electrical and Electronics Engineering with a CGPA of 86%

SKILLS

- Nextjs
- Nestjs
- TypeScript
- JavaScript
- Reactjs
- Tailwind CSS
- GraphQL
- OpenAPI
- AWS
- Docker
- Kubernetes & Helm Charts
- Front End Development
- Web Application & PWA
- HTML & CSS
- Node.js
- Java
- Go
- PhantomJS

Zoho Grid (Dec 2019 - Dec 2021)

- Led a team of 4 to replace the div-based grid rendering in Zoho Sheet with a canvas-based grid, improving rendering speed by 60%.
- Formed and led a new team to modularize the grid into a standalone library for displaying tabular data across multiple Zoho products.

Applications: *Grid Component Library*
Tech Stack: *Typescript, Javascript, Webpack, Terser, CSS, Canvas rendering, Offscreen canvas*

Full Stack Devoloper , Zoho, Chennai

Apr'14 – Apr'19

Zoho Sheet

- Contributed to revamping Zoho Sheet's frontend architecture using web workers and improved caching.
- Enhanced Formula Editor, Range Picker, selections, image support across multiple panes and re-engineered the Insert button to improve stability and support Macros in VB, Deluge, and JavaScript.

Tech Stack: *Typescript, Javascript, Webworkers, Struts, Java*

Project Internship , Zoho, Chennai

Dec'13 – Apr'14

- Developed a performance logging tool for Zoho Sheet using Go and PhantomJS, with a dashboard to visualize metrics through interactive charts.

Tech Stack: *Go, Node.js, PhantomJS, Chart.js*
