SUBRAHMANYE K

SKILLS

- NoSQL/SQL database management: Expert
- MongoDB database management: Expert
- MongoDB 8.0/7.0/6.0/4.X/3.X:
- MongoDB OpsManager:
- PostgreSQL database management:
- MySQL 8.0 database management:
- MySQL 5.7/5.6/5.5/5.1:
- MySQL Enterprise Monitoring:
- SQL Server 2008 expertise:
- Sybase:
- InfluxDB database management:
- MS Windows NT/Windows 2000/Windows 98:
- UNIX environments: Experience
- Linux environments: Proficient
- Solaris systems: Expertise
- Tomcat:
- AWS cloud solutions: Experienced
- Jenkins:
- Version control proficiency:
- Grafana dashboard management:
- Nagios monitoring expertise:
- Icinga monitoring:
- PL/SQL:
- Unix shell proficiency:
- JavaScript/HTML:
- Solarwinds Monitoring : Advanced
- Dynatrace Monitoring: Advanced

CERTIFICATIONS

Data Architect

+91 9945011336 subrahmanyeswaraokarri@gmail.com

Gachibowli, 500032 Hyderabad, India

PROFESSIONAL SUMMARY

Experienced professional with over 14 years of core database administrator experience. Strong expertise in managing various databases including MongoDB, MySQL, PostgreSql, Microsoft SQL Server, and Influxdb. Skilled in NoSQL MongoDB and MySQL on Linux and Windows platforms, as well as PostgreSql, Microsoft SQL Server, and Influxdb on Linux environments. Three years of experience in DevOps, release engineering, configuration management, and cloud infrastructure. Responsible for design, installation, maintenance, performance tuning, backup and recovery, optimization, and security of databases. Experienced in MongoDB software installation, configuration, monitoring, troubleshooting, and maintenance. Successfully implemented and upgraded Mongo OpsManager MMS & Backup tool. Experienced in high availability solutions for MySQL and MongoDB. Strong collaboration skills with developers and teams. Skilled in Percona MySQL installation and upgrade using Percona Xtrabackup, MySQL GUI Tool, and Grafana Dashboard configuration for performance monitoring. Proficient with AWS, Apache Maven Jenkins, SVN, GitHub for configuration management and source code repository management. Excellent communication skills and self-motivated to handle multiple tasks and deadlines effectively. Professional data specialist with strong focus on enterprise data architectures, data modeling, database management, and data integration.

WORK HISTORY

Data Architect
Toucan Payments India Pvt Ltd — Hyderabad, Nov 2024 – Current

- Provisioned and secured MongoDB Atlas production clusters on GCP (7.0) and later migrated workloads to AWS-hosted MongoDB, ensuring zero data loss and minimal application downtime.
- Designed and implemented a pre-production database platform on Ubuntu 22.04 with MongoDB 8.0 for CI/CD and UAT workloads.
- Executed MongoDB 8.0 major upgrades with rolling deployment, application compatibility testing, and automated validation.
- Implemented MongoDB replica set authentication, SCRAM users, and RBAC policies for secure application and operational access.
- Built unified observability using Grafana, SolarWinds, and Dynatrace with real-time alerts and performance intelligence.
- Onboarded Redis and PostgreSQL metrics and logs into centralized monitoring for full-stack visibility.
- Partnered with SRE and application teams to resolve replication lag, connection spikes, I/O bottlenecks, and cloud scaling challenges.

Data Architect
Open Access Technology International Inc. — Hyderabad, Nov 2018 – Oct 2024

- MongoDB Robo3T, Compass installation, upgradation and configuration.
- Mongo SSL/TLS implementation.
- Provide administration, design and architecture of NoSQL mongo database services.
- Database security, LDAP, AD-Active directory PAM authentication implementation. Creating users and managing permissions.
- Installation, configuration of Mongo database servers and Mongo GUI Tools.
- Database designing and development and Backup / Restore of databases.
- Database replication and monitoring the replication.
- PostgreSQL Installation and create PCM cluster for QA and Integration Environments.
- Monitoring tools like Grafana implementation and database dashboards.

- Building AI Agents with MongoDB,MongoDB University
  Jan 2025 – Jul 2025
- Monitoring MongoDB with Built-in Tools,MongoDB University
  Jan 2025 – Jul 2025
- Python Programming Bootcamp,Upgrad Education Limited
  Nov 2023 – Dec 2023
- Atlas Security,MongoDB University
  Oct 2020 – Nov 2020
- Diagnostics and Debugging,MongoDB University
  Jun 2020 – Nov 2020

- Able to create scripts for system administration and AWS using languages such as BASH and Python.
- Build server deployment on Cloud (EC2) servers with help of DevOps tools like Puppet.
- Installing MongoDB on all production & pre-prod Red Hat Enterprise Linux 7.0 servers.
- Upgrade MongoDB Database to versions 3.4.X, 3.6.x, 4.2.
- Mongo DB Authentication implementation on Replicaset nodes.
- MongoDB Robo3T installation, upgradation and configuration.
- Mongo replica set configuration LDAP implementation.

Lead Consultant-DBA
Virtusa Consulting Services Pvt Ltd
Bangalore
Jun 2017 – Oct 2018

- Develops and implements database architecture strategies that improve system reliability and minimize downtime across critical business applications.
- Leads cross-functional teams to optimize database performance, resulting in faster query response times and enhanced user experience.
- Oversees data security protocols and compliance measures to safeguard sensitive information and ensure regulatory adherence.
- Coordinates disaster recovery planning and execution to guarantee rapid restoration of database services after outages.
- Advises stakeholders on database scalability solutions to support evolving business demands and maintain operational efficiency.
- Optimized query performance across multiple database environments, accelerating data retrieval speeds and enhancing overall application responsiveness.
- Designed and implemented disaster recovery strategies that enhanced data availability and minimized downtime during critical system failures.
- Configured database replication frameworks to ensure seamless data synchronization across distributed systems, enhancing data consistency and operational continuity.
- Developed and deployed database indexing strategies that reduced data access latency, improving application scalability and enhancing user experience under peak loads.

Sr Technical Services Engineer-DBA
Altisource Business Solutions Pvt Ltd
Bangalore
Jul 2015 – Jan 2017

- PostgreSQL Installation and create PCM cluster for QA and Integration Environments.
- Influxdb database Installation and Authentication and PCM Cluster Implementation.
- Integrated delivery (CI and CD process) Using Jenkins, Nexus, Yum and puppet.
- Able to create scripts for system administration and AWS using languages such as BASH and Python.
- Build server deployment on Cloud (EC2) servers with help of DevOps tools like Puppet.
- Installing MongoDB on all production & pre-prod Red Hat Enterprise Linux 7.0 servers.
- Upgrade MongoDB Database to version 3.4.X & 3.6.x.
- Mongo DB server patching using rundeck jobs.
- MongoDB OpsManager implementation and upgrade and maintenance.
- Mongo replica set configuration LDAP implementation.
- Enhanced query performance through index optimization, resulting in improved system responsiveness and elevated user satisfaction across critical applications.
- Automated database backup validation processes to increase data integrity assurance and reduce manual verification efforts across critical business applications.
- Implemented proactive database performance tuning strategies that enhanced query response times and increased overall system reliability.
- Configured and maintained database security protocols to safeguard sensitive data, enhancing compliance with industry regulations and reducing risk exposure.
- Developed and deployed automated database patch management workflows that minimized system vulnerabilities and improved overall operational uptime.
- Engineered complex database migration scripts that ensured seamless data transfer and improved system compatibility with new application platforms.

Lead Engineer-DBA
IGATE Global Solutions Limited

Bangalore
Oct 2014 – Jun 2015

- Mongo DB software installation, configuration, upgrading/patching, monitoring, tuning/optimizing, troubleshooting and maintenance.
- Mongo replica set configuration LDAP implementation.
- Provide administration, design and architecture of NoSQL mongo database services.
- Database security, LDAP, AD-Active directory PAM authentication implementation. Creating users and managing permissions.
- Installation, configuration MySQL, Mongo database servers and MySQL/Mongo GUI Tools.
- Database designing and development and Backup / Restore of databases.
- Database replication and monitoring the replication.
- Writing SQL code and code review and Writing Complex Queries.
- Optimizing database Capacity planning for database server and Creating and Monitoring Indexes by rebuilding the index.
- Restoring and Recovery Management from Tables are crashed.
- Performance tuning at different stages and replicating the Servers.
- Configuring, Replication, Checking Completion of Backups & Monitoring System Performance.
- Installing MySQL 5.6, 5.5 on all production Red Hat Enterprise Linux 5.1 servers.
- Upgrading MySQL Database to version 5.6 & 5.5.

Senior-DBA
HCL Info tech Pvt. Ltd

Hyderabad
Sep 2012 – Oct 2014

- Installing MySQL 5.5 on all production Red Hat Enterprise Linux 5.1 servers.
- Upgrading MySQL Database to version 5.5.
- Loading the data from mongo, hadoop databases into MySQL.
- MongoDB software installation, configuration, upgrading/patching, monitoring, tuning/optimizing, troubleshooting and maintenance.
- Provide administration, design and architecture of NoSQL database services.
- Database security, creating users and managing permissions.
- Installation and configuration of MySQL database servers by using MySQL GUI Tool.
- Database designing and development and Backup / Restore of databases.
- Database replication and monitoring the replication.
- Writing SQL code and code review and Writing Complex Queries.
- Optimizing database Capacity planning for database server and Creating and Monitoring Indexes by rebuilding the index.
- Database links were created to access the data from remote databases.
- Restoring and Recovery Management from Tables are crashed.
- Performance tuning at different stages and replicating the Servers.
- Configuring Replication, Checking Completion of Backups and Monitoring System Performance.
- Monitored and tuned database performance to enhance system responsiveness, resulting in improved uptime and reduced latency for critical applications.
- Engineered automated backup solutions that enhanced data integrity and minimized recovery time during critical system failures.

EDUCATION

Machine Learning & AI - Post Graduate Degree, International Institute of Information Technology

Bangalore
Apr 2023 - Mar 2025

Master of Computer Applications (MCA), Andhra University, DLR PG College, G-Mamidada

Kakinada
Jul 2005 - Mar 2008

BSc Computer Science, Minerva Degree College Jul 2002 - Apr 2005

LANGUAGES

English	C1 - Advanced	**Hindhi**	C1 - Advanced
