SKILLS

- Java
- Selenium
- Eclipse IDE
- MSSQL(DB)
- JIRA with Zephyr squad
- TestNG Framework Tool
- POM with Page Factory
- Maven Build Management Tool
- Jenkins CI/CD Tool
- GitHub
- Agile Methodologies (Scrum)
- Automated Testing
- Web Application Testing
- Test Planning Test Scripting
- Test Data Management
- Defect Identification and
- Documentation
- Cross Browser Testing
- Test Result Analysis and Reporting

PROFILE

Software Test Engineer with 3 years of experience in Manual and Automation Testing within Agile environments. Proficient in Core Java and Selenium, with hands-on expertise in designing and executing test cases, automation frameworks, and defect tracking. Seeking an opportunity to contribute technical skills, problem-solving abilities, and strong work ethic to deliver high-quality software solutions while growing within a dynamic organization.

PROFESSIONAL SUMMARY

- Good Exposure in Automation testing for web applications using Selenium, and framework implementation
- Working Knowledge with **Selenium web driver, TestNG framework.**
- Good knowledge in **Core Java** and **OOPS concept**.
- Good Experience in **Maven** as project build tool.
- Worked in **Page object model** design pattern with **page factory.**
- Experience in generating Test Execution Report using **TestNG**.
- Experience in **Data Driven Framework**.
- Experience in generating **Extent Report**.
- Well versed with version control tool **GIT** and CI/CD tool **JENKINS**.
- Basic knowledge in **SQL.**
- Knowledge in **Software Development Life Cycle**, **Software Testing Life Cycle** and **Bug life Cycle**.
- Experience with fast-paced environments like **Agile- Scrum methodology** and **JIRA-Zephyr**.
- Expert in **Manual Testing** and **Related Techniques.**
- Experience in **Functional Testing, Smoke Testing, Sanity Testing, Regression Testing.**
- Knowledge in **Automation Scripting, Test Case Development, Test Execution, Defect Reporting/Tracking using Jira.**
- Strong knowledge in **Testing Methodology** and **Levels of Testing.**

PROFESSIONAL EXPERIENCE

Codilar Technologies Pvt Ltd
Quality Analyst (2025-present)

- Performed **manual testing** of **web** and **mobile applications**, ensuring functionality, usability, and performance across different platforms and devices.
- Conducted **UI and UX testing** to validate design consistency, responsiveness, and user-friendly workflows.
- Executed **end-to-end testing** of **e-commerce applications** (Shopify-based), including product catalog, cart, checkout, and payment gateway integrations.
- Designed and executed **test cases, test scenarios, and regression test** suites to ensure software quality before releases.
- Reported and tracked defects using **Jira** and collaborated closely with developers to resolve issues.
- Validated **cross-browser compatibility** and responsive design across various screen resolutions

Tiffany Software Solutions
Software Tester (2023-present)

EDUCATION

2018 - 2022
ANNA UNIVERSITY

- Bachelor of Engineering

LANGUAGES

- English
- Malayalam
- Tamil

- Expertise in **Selenium Webdriver, TestNG framework,** and **Core Java.**
- Involved in **Automation scripting, Test Case Development, Test Execution, and Defect reporting/Tracking** using **JIRA.**
- Expertise in **Automation Framework design** and implementation using Selenium tool.
- Working knowledge in **Azure DevOps** for **CI/CD pipelines.**
- Experience in generating **Extend Report** and **TestNG Reports.**
- Good understanding in **SDLC**, **STLC** and **Bug Life Cycle.**
- Worked in **Page Object Model** (**POM**) with **Page Factory.**
- Involved in **analysis of test requirements**, **derived test scenarios, test case development.**
- Source code management using **GitHub**.
- Participated in **Daily scrum, Sprint Grooming, Planning, Retrospective meetings** as a part of **Agile-scrum process.**
- Expertise in writing **XPath** to locate web elements.
- Extensively experienced in **Smoke testing, Regression testing and Sanity.**

PROJECTS UNDERTAKEN

SafeTurn Application

Approach: Manual

The SafeTurn Application prioritizes registering new students for driving classes, assigning tutors, selecting time slots, and facilitating the choice of customized learning packages. The application also manages logistics such as pick-up and drop-off for driving classes. The testing objective is to ensure the seamless functionality of all aspects, meeting client requirements effectively.

Roles and Responsibilities:

- Analysing the requirements and creating the test scenarios.
- Test case development and test execution.
- Functionality testing of each module.
- Generation of Test Cases and Manual execution of the Test Cases.
- Bug Reporting and Tracking using JIRA tool

TrustCare

Approach: Manual and Automation

This application enables hospitals with a centralized platform to manage their operations and enhance communication. It can lower medical errors, boost patient outcomes and improve overall quality care . The application ensures secure authentication, role-specific dashboards, and feature access according to user roles

Roles and Responsibilities

- Analysing the requirements and creating the test scenarios.
- Manual execution and test cases and test report preparation.
- Reviewing Test Report and preparing Test Summary.
- Bug reporting and tracking using JIRA tool.
- Maintaining existing test scripts/ regression suite.
- Well versed with handling elements in Selenium WebDriver.
- Scripting, debugging and Execution of automated scripts.
- Implemented automation using Selenium WebDriver, Java, Maven.
- Worked on Automation framework development using Page factory and Data Driven framework.
- Identifying the Web Elements using different locators.
