SHAHBAZ KHAN

Database Administrator

+91-7633005898 | Shahbaz.dba20@gmail.com

Profile Summary

I am a technology-driven professional with over 5+ years of experience in IT, with PostgreSQL Database, Kubernetes, Docker and Bigdata tools, On premise and cloud. My skills encompass database backup, configuration, maintenance, and recovery. And provide 24/7 production support for PostgreSQL environment.

Professional Skill

- PostgreSQL
- Aurora Postgresql
- FDW
- PgBadger
- PgBouncer
- PgSqueeze
- Kubernetes
- PgBackrest
- PgDump & Dump All
- PgBasebackup
- PgCron

Work Experience

Company Name	Support	Duration
Datavail Infotech	Shared Support.	April-2025 Till Date
Nujtech Software Solution	Shared Support	Jan 25 to April 25
Brillio Technologies Pvt. Ltd	Verizon Data Service (USA)	April-21 to April-23
Identetive Solution Pvt. Ltd	Verizon Data Service (USA)	July-20 to March-21

Postgres DBA Profile

- Perform Day-to-Day regular Administration activities.
- Implemented PostgreSQL from scratch to the operational level.
- Health check assessment on daily, weekly and monthly basis.
- Working knowledge of PostgreSQL on Linux and Ubuntu.
- Experience in Snapshot create, share and restore to a fresh cluster on AWS.
- Hands on experience in Migration RDS Postgres to Aurora PostgreSQL.
- Data pull and push activity on RDS to S3 for development and testing purpose.
- Experience on Aurora RDS, Performance Insight, CloudWatch, S3, Parameter Store etc on AWS.
- Regular database maintenance activities Bloat & Re-indexing.
- Minor upgrade from RDS level and EC2.
- Good knowledge on PostgreSQL architectures (Memory components, Physical Structure and Background Processes)
- Implemented PoWA for reporting & Performance suggestion on basis of Indexing.
- Installed and Configured Etcd & Patroni for Load Balancing, Connection Pooling and Automatic Failover.
- Creating users and giving privileges as per business requirement.
- Providing support to application team for database related issues Re-indexing and vacuuming on database on timely manner.
- Experience on open-source tools like PgAdmin, PoWA, Pg_squeeze etc.
- Managing, Maintaining, Monitoring and Integrating PostgreSQL databases for Clients.
- Monitoring database to optimize performance issue based on CloudWatch.
- Keep technical documentation up-to-date (installation, configuration, maintenance).
- Installed and Configured PgBackrest for full & differential backup.

- Experience in configuring multiple Extension like pg_cron, Pg_repack, Pg_squeeze, TimescaleDB etc.
- Configured and Comparison between New & Old Environment validation.
- Experience working with Clients like DBeaver and PgAdmin 4.
- Set database parameters or specifications.
- Responsible for regular backups using logical and physical method.
- 24x7 Support, work on the priority-based environment.
- Responsible for managing weekly Client call and Daily Standup Call.
- Weekend On-Call support for any change request or CAB
- Liasing with different environment like DevOps, Developer, Open-Source Database & Oracle
- Hand-on Experience in implementing RDS Postgres & Aurora PostgreSQL on AWS.
- Hand-On Experience in implementing Foriegn Data Wraper to access data on Cloud & On premises.

DevOps & Bigdata

- Achieved seamless automation of application flow across all branches using Jenkins Pipelines.
- Implemented CI/CD pipelines.
- Monitoring and manging kubernetes, Docker and jenkins. Performing regular housekeeping tasks.
- Having experience with ELK & AWS cloud watch for log monitoring.
- Implemented Web Application on Servers like Nginx & Apache Tomcat
- Experienced in creating Docker images by using Docker files for enabling seamless containerization.
- Deployed Kubernetes Cluster using Kubeadm and AWS EKS.
- Documented the systems processes and procedures for future reference.
- Utilized various Cloud services like EC2, VPC, S3, IAM, ELB, RDS & ECR.
- Experienced in managing Kubernetes cluster.
- Worked on GCP compute engine.
- Experience deploying Bigdata Applications on Google cloud.
- Troubleshooting Hive and Spark jobs.
- Closely monitor Resource manager in Bigdata for ETL process.
- Worked on creating Grok filter for Splunk for log Aggregation.
- Monitoring set up of cluster for all the critical environments: Dev, Test, Production and BDR.
- Manage all Hadoop core and additional components.
- Responsible for implementation and ongoing administration of Hadoop infrastructure.
- Preparing and performing the installation of Hadoop software.
- Installed and configured dev and staging cluster through manager using local repositories on GCP & AWS.
- Monitoring Cluster Health and Troubleshooting.
- Manage and review Backups.
- Assigning name quote and space quote.

Technical Skills

DB-: PostgreSQL Open Source, RDS and Aurora PostgreSQL.

Cloud-: AWS, RDS, EC2, S3, Performance Insight, CloudWatch, Parameter Store, AWS Workspace, Secret Manager etc

DevOps-: Kubernetes, Docker, Jenkins.

OS-: RHEL & Ubuntu

Tools-: Service Now, Putty, keepers, Pgadmin, Dbweaver, SQL developer, VPN etc.

IAC-: Basic knowledge in CloudFormation.

KMS-: Cyberark, Kerberos, AWS KMS, IAM.

Education

Executive MBA, NIBM Chennai (Distance).

Graduate, Pune University, Pune.

HSC, Maharashtra Board, Pune.

SSC Bihar Board, Patna

Language Known

- English
- Arabic
- Hindi

Personal Details

Name-: Shahbaz Khan

DOB-: 10-Jan-1988

Pancard-: Yes

Place-: Pune

Hobbies-: Fishing & Reading Technical Blogs
