SAHIL GUPTA

+91 8105-862093 | SAHIL.GUPTA@SAHILZONE.COM

SUMMARY

Enterprising, curious and creative Front Architect with a significant track record in defining, designing and implementing large scale projects across multiple industries. Proficient at delivering innovative roadmaps for actionable steps that enhance the user experience, market presence, and revenue generation.

Exceptional talent for building and managing effective, globally based teams; able to leverage member skills for optimal project results. Impactful communicator, liaison, and mentor; **inspirational thought leader with innate ability to motivate unprecedented performances from team colleagues while cultivating an environment of productivity and success.**

Areas of Strength:

- *User Interface (UI) Development*
- *Front End Architecture*
- *Global Team Interface*
- *Large-scale Web Applications*
- *Talent Acquisition & Training*
- *Thought Leadership Skills*
- *C-Suite / Stakeholder Presentations*
- *Certified Ethical Hacker (CEH)*
- *Hybrid App Development*
- *Product Management*

PROFESSIONAL HISTORY

WaterBridge; CA, US (Remote from Bangalore)

Leading the Emergence and Evolution of the Midstream Water Sector.

Front-end Architect , 08/2022 - present

Wave is a next-generation operations and planning platform for midstream and E&P companies. Wave is the first asset-based collaboration platform bringing all your team's collaboration and interactions into a single integrated environment.

Tech Stack: React, Recoil,Vite, Pnpm, GraphQl, Cypress, Node JS, D3.

- **Led a team of 5 FE engineers** in the development of Wave next-gen operations and planning platform for midstream and E&P companies.
- **Collaborated with design, backend, and product teams across 4 time zones** to align user needs, integrate feedback effectively, and optimize workflows, ensuring smooth cross-functional collaboration.
- **Drove 30% performance improvement** through conducting comprehensive system profiling, implementing architectural changes to optimize rendering efficiency, and standardizing best practices for asset management across the frontend stack.
- **Led refactoring of 40% of legacy code**, transforming it into modular and scalable components that improved maintainability and long-term system flexibility.

ISIMA; Bengaluru, india

Isima is a startup company that introduces the first self-service, hyper-converged data platform to advance the data-driven enterprise.

Front-end Architect , 08/2020 - 04/2022

Recruited to lead front-end product development, manage a talented team, and drive global team expansion.

Tech Stack: React, Redux, GraphQl, Node, Webpack, NPM, Jest, React testing library, Cypress, and Shell Scripting.

- **Directed the successful 3-month rewrite** of Isima's data convergence platform web app, ensuring alignment with performance benchmarks and the long-term business vision.
- **Led a 3 members FE team** through architectural transformations and restructured development processes, fostering a more agile environment that increased development velocity and **improved cross-team collaboration**.
- **Architected a 25% reduction in initial load time** by implementing route-based splitting, on-demand component loading, and optimizing third-party library code splitting, enhancing user experience while establishing new performance standards within the team.
- **Developed a first-party instrumentation** solution that reduced data transfer by 30% while maintaining data fidelity. Additionally, **spearheaded the integration of PWA suppor**t, leading to the launch of the Android app on Google Play, significantly broadening product reach and accessibility.

Media.net; Bangalore, India

Media.net is a spinoff of Directi, a group of independently run tech businesses overseen by their own management teams.

Lead UI Developer, 09/2016 – 08/2020

Tasked with transforming software design concepts into reality through front-end technologies across multiple projects, I led various front-end teams to successfully deliver these initiatives. Additionally, I initiated efforts to enhance junior front-end developers skills by sharing knowledge and providing one-on-one support, fostering a culture of learning and growth within the organization.

Tech Stack: React, Redux, React Hooks, d3, Axios, Immutable, Ramda, Webpack, reCharts, SCSS, Jest, Cypress

- **Architected and led the design of the Analytics dashboard with 3 members team from inception**, resulting in a 25% improvement in bid decision efficiency for ad teams, while establishing best practices for future analytics solutions across the organization.
- **Led 2nd project from concept to execution**, creating an app that simplified backend processes and improved cluster and storage management through intuitive visualizations, promoting transparency and operational efficiency.
- **Oversaw the strategic rewrite of the 3rd product**, enhancing traffic data analysis capabilities to detect spam traffic, resulting in **30% increase in product performance and a 20% reduction in codebase complexity**. **Facilitated cross-functional collaboration** among testing, backend, and management teams to ensure seamless integration and delivery.
- **Directed the development of reusable component libraries** (e.g., dropdowns, modals) that enhanced **development speed by 30%** and ensured consistent UI/UX across multiple projects, driving organizational efficiency and code maintainability.
- **Led the integration of user feedback and bug reporting workflows, while enhancing the overall front-end pipeline** through the establishment of processes for static code analysis, pre-commit checks, and comprehensive test checks (E2E and unit), along with effective PR review strategies before merges. This initiative fostered a culture of continuous improvement and responsiveness to user needs, significantly enhancing overall product quality and user satisfaction.

Additional Employment:

Front End Architect *(Vauld, Bengaluru, India, US; 04/2022 – 09/2022)*
Front End Developer *(Unicommerce; New Delhi, India; 05/2015 – 09/2016)*
JavaScript Engineer *(eClerx / PayPay; New Delhi, India; 09/2014 - 05/2015)*
Senior Front End Developer *(Capgemini Pvt Ltd; Mumbai, India, 10/2012 – 09/2014)*

EDUCATION, AWARDS AND PRESENTATIONS

Bachelor of Engineering / Computer Science *(Government College of Engineering, Jammu 2008-2012)*
Certified Ethical Hacker / CEH *(EC-Council)*
Employee of the Year Award *(Capgemini, 2012)*
Presentation, "Advanced GIT" *(Directi / Media.net)*
Presentation, "MERN & MEAN Product Development Stack" *(Directi / Media.net)*
Presentation, "Testing Front End Apps" *(Directi / Media.net)*
