Ashish Rainchwar

Database Architect **Mobile: +91-9766164656** E-mail: ashishrainchwar@hotmail.com

With over 20 years of experience in the IT field, I have held various roles across multiple organizations, contributing to their success. My expertise includes positions as a DBA, Database Architect, DBA Manager, and Database Performance and Optimization Lead. I have consistently delivered solutions to meet customer needs by providing timely resolutions to database-related issues, ensuring that the database environment remains optimized and operational at its best.

I am now seeking a challenging assignment where I can leverage my skills in managing deliveries within the IT-Database domain. I am particularly interested in roles that involve managing database support teams, handling performance and optimization assignments, overseeing database upgrades, facilitating database migrations using cloud landscapes, and leading database replication efforts using tools such as Goldengate and Oracle Streams. Additionally, I have experience in database capacity planning, automation, and more.

My Accreditation:

- Oracle **Cloud Infrastructure 2025** Certified Foundations Associate
- Oracle Certified Professional DBA (**OCP**)
- **PRINCE 2** Foundation & Practitioner Certified
- **ITIL V3** Foundation Certified
- Certified Scrum Master (**CSM**)

Key Skills

- Database Architect & DBA Managed Support services.
- Performance & Optimization.
- Technical Project Management.
- Product Delivery Management.
- Problem-solving & RCA.
- Communication.

Technical Strength:

Operating systems: Unix, RHEL and Oracle Linux, AIX, Windows, HP-UX.
Database Expertise: Oracle (8i to 19c), Oracle RAC, Exadata Servers, MySQL, MSSQL, DB2, PostgreSQlL,Redi.
Replication Method: Oracle Golden Gate & Oracle Streams.
Database Tools and Features: RMAN, Data Guard, Data Pump, Exp, Imp, TOAD, PLSQL Developer, OEM 13c.
Database Performance Tools: AWR, ADDM, ASH, Statspack, Explain Plan, TKPROF.
Cloud: AWS, OCI

Technical Involvement:

- 20+ years of hands-on experience in various roles in different domains such as Telecom, Finance, health care, Insurance & Aviation.
- Database Planning, design and build databases for various applications.
- Set standards for Development, Operations & Security of the databases to ensure they perform as intended.
- Ensure all the Databases are up and running 24*7 in production environments.
- Managed support handling ticket SLA to save from breaches, priority tickets in an operational environment.
- Troubleshooting, making RCA and fixing database performance issues in VL Databases.
- Prepare and implement various strategies and policies to maintain Databases good health and better performance.
- Implement Database User Access policy across database landscape to maintain best security of Data.
- Space utilization within the databases and over the database servers to manage the space crunch.
- Design, Plan and Implement Data purging, Data archiving policy for better data management.
- Plan database backups and perform database restoration to verify the backup sets.
- Use various tools & methods for database backups to keep data and databases intact.
- Planning, Creating, and testing Disaster Recovery Sites, executing Table-top and Actual DR exercises.
- Plan for fixing various Database TVP's (Database Vulnerabilities) by applying timely database patches and fixing configuration changes.
- Played consultant role for customer for Database performance optimization enhancement activities.

- Mentoring team in upgrading various technologies, features and supporting them for their professional improvement.
- Arrange and take various databases related training for the team for the team's performance enhancement.
- Enable Database Auditing for maintaining Database safety and performing RCA for security issues happening in the database environment.
- Install, Upgrade, De-Install & Remove various Database's versions using DBCA, DBUA and silent installation methods.
- Manage Onshore and Offshore DBA support models for various customers.
- Lead onshore teams to take care of all activities in the capacity of Techno – Manager role.
- Planning and Implementing various Database and Server level monitoring for fault findings proactively.
- Implement various proactive Database checks for managing Databases in good health.
- Planning and Execution Capacity Planning and Management for Databases & its Servers.
- Setup and maintained Database Replication using Golden Gate and Oracle Streams.
- Involved in Exadata implementation, monitoring, upgrade, patching and migration.
- Planned and participated in Non Exadata to Exadata migration activity/project.
- Performed multiple Database migration, Data centre migration activities in the capacity of technical project manager.
- Manage multiple projects of Oracle Database version upgrade, Database migration to different RDBMS, Cross platforms.
- Solutioning Cloud based Databases and server migration for various customer needs.
- Execute End of Life Support projects for Oracle's different versions.
- Apply ITIL best practices knowledge in and as Operation Manager for handling Incident management, Change management, Demand Management and Problem management.
- Encourage and assist customers to move to Cloud platform by performing POC's.
- Plan and Execute In-premises to cloud migration of various Databases.
- POC for the new activities, Solutioning for the upcoming activities.
- Responsible for managing Critical L1 Application (Service) providing 24*7 support.
- Managed Production support – Operations team for 24*7 support environment.
- Participate as a Database Expert during Data Centre migration and consolidation activity which includes Lift & Shift, Database and Server Migration, Upgrade.
- Database Performance exercise – SQL optimization, SQL profiling, SQL baselining, Index creation on table, rebuilding, table partitioning, table cache, Exadata flash cache, tuning memory parameters, tuning Database parameters and so on.
- Responsible for achieving the best CSAT (Customer Satisfaction) score from the client for the project.
- Preparing status reports and dashboards and presenting them to higher management within parental organization and customer organisation.
- Experience in running sprints and tracking throughput using tools like JIRA and Confluence.
- Preparing various type of reports required for management to do different study for overall technical support resource management.

PROFESSIONAL WORK EXPERIENCE

Company Name	Designation	Role	From	To
Prodevans Technologies, Pune	Sr Technical Consultant	DBA COE Lead	Jan-25	Aug-25
Centelon, Pune	Manager – Digital	DBA Manager	Apr-22	Jan-25
Atos GIT, Pune	Architect	Delivery manager, DBA Manager, DL	Jul-12	Apr-22
R Systems International Ltd	DBA Lead / Support Lead	DBA, Production Support lead	Feb-08	Mar-12
Amdocs	SSME – Senior DBA	Senior DBA, Production support role	Aug-06	Feb-08
Wipro	Senior DBA	Senior DBA	Jun-05	Aug-06
Clover Technology	Database Administrator	Database Administrator	Jan-05	Jun-05
Mantra systems & Software's	Jr. DBA	Database Administrator	Jan-02	Dec-04
