SUMMARY

Experienced engineering leader with 11 years in full-stack development, team leadership, and building scalable solutions; **Open to relocation** for the right opportunity.

WORK EXPERIENCE

Observe.ai — **Mar 2023 - Oct 2024**
Software Development Engineer - 3 — Bengaluru, India

Project – Platform Team & APEX

Balanced responsibilities across two dynamic teams: Platform team, enhancing the development productivity , monitoring and admin configuration org-wide & APEX which optimize contact center quality assurance workflows through a robust react web application.

- Heavily involved in PR code reviews, peer coding sessions, engineers hiring and onboarding, product discussions with product managers.
- Designed **web component library** from scratch to increase the UI dev velocity implemented on AWS Code artifacts using Jenkins pipelines for permissioning.
- Introduced and architectured **Backend for Frontend microservice** layer using for UI data massaging, proxy layer, caching strategy, etc
- Worked solely on UI for Quash Retention and deletion Policy so as to **decrease the mongo storage cost per month by 14%**.
- Security handling compliance by eliminating yarn security issues from **Critical 9 to 0, High 28 to 6, Moderate 10 to 3, and Low 2 to 0**
- Introduced **Frontend Architecture Guild** and **UI Learning Meetings**, fostering structured problem-solving, promoting best practices and enhancing UI knowledge across teams.

TECH STACK : Typescript, ReactJs, NodeJs, Webpack, Vite, Sentry, Lockrocket, Harness, Jenkins, Github Copilot, AWS Code Artifact, Kubernates, Kong, MongoDb, Loggly, etc

---

Rapido (India's 2nd largest Ride Hailing Service) — **Sep 2020 - Feb 2023**
Lead Product Engineer (14 People Pod) — Bengaluru, India

Project – Rapido Partnerships (Sept 2020 - Feb 2023)

Unfolding to a full-stack engineer, leading a **(25% revenue generating)** vertical, *Rapido Partnerships* which deals in tie-ups with delivery providers like Swiggy, Zomato, Dotpe, etc. Solving challenging problems everyday to ship products that make a difference.

- **Steered a 14 people cross functional pod** in conjunction with the Product Manager taking both product and tech responsibilities in balance to maintain product deliverables keeping a scalable tech architecture.
- Setup a React SLA Dashboard, to analyze current rides, checking for critical ones **decreasing the rejection % from 19% to 7%** (Introduced React and a next-starter-kit to the firm)
- Architectured the Rewards and Penalty Dashboard to **increase the Captain's quality.**
- Improved the rapido main website's performance. First interactive time **from 1.7 sec to 0.8 sec.**
- Introduced order batching (Single pick multiple drop) to multiple cities, increasing **the Rides-per-Rider by 40%** for those cities.
- Involved in hiring interviews, PR code reviews and engineers mentoring.

TECH STACK : Javascript, ReactJs, NextJs, NodeJs, GoLang, Angular, PWA, Kafka, Helm Charts, SonarQube, Kubernates, Kong, Grafana, Loki, etc

---

Reliance Jio (India's largest Telcom) — **May 2019 - Sept 2020**
Technical Team Lead (8 People team) — Navi Mumbai, India
Jio.com

React-based web app made on the NextJs Framework, making it an Isomorphic website. An individual person's initiative building the app from scratch, and building a team simultaneously.

● Setup route-based micro-frontend architecture, using a monorepo and multiple CI/CD pipelines using environment agnostic artifacts, shipping all MVP's simultaneously.

● Introducing the Agile methodology for the new team, by setting up Azure dashboards, PR approval, running the scrum, quality gate checks, etc

● Contributed to the Web component Toolchain set and Starter Kits.

● Kick started a Web developers Community leading to 130 members.

TECH STACK : Javascript, ReactJs, NextJs, GatsbyJs, SSR, PWA, Webpack, Emotion, HTML, CSS, Google/Adobe Analytics, Jest, React Testing Library, Cypress, Azure Devops, Azure Pipelines, etc

---

IHS Markit (Now S&P Global) — **May 2017 - May 2019**
