Mouna R

Software Test Engineer | +91-7200496708 | mounaraju21@gmail.com |

CAREER OBJECTIVE

Highly motivated and results-oriented software test engineer with 4.7 years of experience seeking a position in a fast-paced organization where technical skills and creative thinking are valued. Proven ability to collaborate with development teams to identify and mitigate risks, ensuring the reliability and performance of software applications and systems. Seeking a challenging role to leverage my expertise in test automation, regression testing, and quality assurance to ensure the delivery of high-quality software.

PROFESSIONAL SUMMARY

- 4.7 Years of experiences in area of Software Testing (Automation and Manual) in Selenium Web Driver with Java.
- Have strong experience in framework like Behavioral driven development (Cucumber),Junit, Page object (POM) and data-driven frameworks.
- Using Maven as Software Build tool and Jenkins as Continuous Integration Tool
- Hands on experience in Tracking and Reporting of defects using Defect Tracking Tool JIRA.
- Extensive experience in maintaining my code over version control using GIT.
- Performed testing like Smoke, Sanity, Regression
- Participated in all the meetings of Agile-Scrum Methodology
- Proficient in automating different platforms over cloud devices like Browser Stack.
- Good experience in API with REST assured framework.
- Analyzing the API requirements from API documents and user stories
- Performing different HTTP request methods like GET, POST, PUT, DELETE.

CORE SKILL

- Testing Types : **API Testing, Functional Testing, Manual Testing**
- Automation Tools : **Selenium Web Driver, Postman, REST Assured**
- Languages : **Java, SQL**
- Bug Tracking : **JIRA**
- Build/CI Tools : **Jenkins, Git**
- Databases : **MySQL, Oracle**
- Methodology : **Agile/Scrum methodology**
- Framework : **BDD(Cucumber), TestNG, JUnit, POM**
- Version Control Tool : **GIT**

WORK EXPERIANCE:

Rebase Global Technologies Pvt Ltd –Chennai
Software Test Engineer - from Mar 2023 to till Date.

Hexaware Technologies - Chennai
QA Engineer – from Jan 2021 to Dec 2021

HCL Technologies - Chennai
Junior Software Tester – from Jan 2019 to Mar 2020

PROJECT DETAILS:

Project #1:

Project Title : Noon
Project Type : Ecommerce Domain
Testing Approach : Automation
Tools Used : Selenium Web Driver with Java
Testing Frameworks : Cucumber Framework
Defect tracking tool : JIRA

Description

Noon is a leading online platform in the Middle East offering a wide range of products, including electronics, fashion, beauty, home essentials, and groceries. The project focused on testing both web and mobile applications to ensure smooth user experience, secure transactions, and reliable order management.

Responsibility:

- Analyses the User Stories and Acceptance criteria.
- Involved in developing test planning as well.
- Identifying end-to-end scenario, created Test Scenarios, Test cases need to be automated.
- Categories the test cases as part of Smoke, Sanity, and Regression etc.
- Prepare the Automation scripts using Selenium Web Driver with Cucumber.
- Implemented different automation frameworks from scratch like Page Object Model and Data Driven framework.
- Developed BDD scripts with Cucumber and writing step definitions for behavior framework.
- Doing Regression and report generation with the help of Jenkins tool for achieving the Continuous Integration.
- Raise and Track defects until closure. Updating and maintaining test cases in test management tool JIRA.
- Safe-Guarding my code in GIT version control tool.

Project # 2:

Project Title : Delta
Project Type : Airline Domain
Testing Approach : Automation and Manual
Tools Used : Selenium Web Driver with Java
Testing Frameworks: TestNG
Defect tracking tool : JIRA

Description:

This project involved testing a large-scale travel booking web application that allows users to search, book, and manage their trips. The goal was to ensure smooth navigation, accurate booking flow, secure payment processing, and reliable customer data management.

Responsibility:

- Analyze the Requirements in BRD documents and clarification will be raised to our project business analyst.
- Prepare Test plan, Test Scenario, Test cases review with Team.
- Executed test cases using TestNG framework.
- Creating Re-usable methods for maintainability.
- Defects reporting and daily status reporting by using JIRA.
- Participate in all Agile ceremonies-Planning, Daily Standup/Scrum call, Sprint Review and Sprint Retrospective.
- Prepare Test Execution reports and Defect reports.
- Involved in documentation of the steps that have been followed during the testing process.
- Communicate and Provide timely updates with the Test Manager in status meetings.
- Reviewing all the failures in daily build and prepared the document with screenshot of the issue reported and send to the client.

Project # 3:

Project Title : Macy's
Project Type : E-Commerce
Testing Approach : Manual
Defect tracking tool : JIRA

Description:

Macy's is a well-known retail platform offering a wide range of products such as clothing, accessories, home décor, and beauty items. The project involved testing web and mobile applications to ensure seamless shopping experiences, accurate order processing, and secure payment functionality.

Responsibility:

- Analyzed business requirements and prepared test scenarios and test cases.
- Performed functional, regression, and system testing of web and mobile modules.
- Validated shopping cart, checkout, payment gateway, and order tracking features.
- Logged and tracked defects using Jira and worked with developers to resolve them.
- Executed SQL queries to validate backend order and customer data.
- Participated in Agile ceremonies like daily stand-ups and sprint planning.

ACADEMIC QUALIFICATION:

Graduated MBA From M.A.M College of Engineering - Trichy.

I hereby declare that all the above stated information is true to the best of my knowledge.
