M.SubbaRao

*Database Administrator (**Core,RAC & EBS**)*

Cloud DBA Architect

Ph No's Primary: 91-9949574183

Email: maddula_subbarao@yahoo.co.in

OBJECTIVE:

To pursue a challenging and satisfying career and to be a part of a progressive and growthoriented Organization that give me scope to enhance my knowledge and skills to cope up with the latest technological changes.

EXPERIENCE SUMMARY:

Over 19+ years of experience in the IT field and 17 years and 2 months years in Oracle database administration (Core,RAC + Apps DBA) side with Aws cloud admin.

Have Knowledge in ITIL process.

Good experience in Database designing and set up the complete Database with Core DBA ACTIVITIES, Security implementations and Maintaining,patches,clonning..

databases, Back And Recoveries,Performace And Tunning ,DataGuard,And RAC 10g in Oracle.

Successfully performed the role as and Database Administrator (Core,RAC,Apps DBA(EBS11i and 12.1,18c,19c and in OCI)).

Cloud DB Migrations – Planning, Implementations, Support

Homogeneous and Heterogeneous DB Migrations using Cloud native methods and DB Approaches

SIGNIFICANT STRENGHTS:

Good presentation and communication skills to provide support to the customer.

Ability to work flexibly as team member.

Dedications with an inner drive to succeed and accomplish goals.

Ability to perfectly plan and execute the given job to perfection.

TECHNICAL HIGHLIGHTS:

Databases: **primary skillset** oracle Core +RAC+ EBS+ Exadata admins

Secondary skillset MongoDB, Postgres, MySQL, Vertica Admins

Database tools: Toad, Grid, OEM, OAM, pl/sql developer, PGadmin, Dbwatch, Foglight, spotlight, watchdog, automations

Languages: sql & pl/sql

Scripting: Shell scripting, Python, Json, yaml, cookbooks, knife (Chef scripts)

Playbooks.

System Administration: Linux, Solaris, Windows
OS tools: SolarWinds, Nagios, Opmanager**,** Sitescope **,**rundecker,cohesity,graphana,app dynamics, fivetran, talend **Cloud:** AWS services
Build & deployment tools: Jenkin, GitHub, Docker, Maven, Kubernetes, Puppet, Perforce, Ansible, Docker Swarm
Virtualization: VMware, Vbox **,** Docker

EDUCATIONAL QUALIFICATION:

Successfully completed **M**aster of **B**usiness **A**dministration from Andhra University (2000).

Certifications:

Oracle 9i (OCP)
oracle RAC 11g R2 & Grid Infrastructure administration (OCP)
Sun Solaris certifications 10
EBS R12: Install, Patch and Maintain Applications (OCP) AWS:
Associate Solution Architect.

CAREER PROFILE SUMMARY:

Currently working with Datacore Technologies and Deployed to **Infosys** , **Hyderabad** as Senior Cloud Consultant and Database Architect from **September 10th 2024 to till up to date**.

Projects : Migration Projects from Oracle to Aurora Mysql and Postgres in AWS,GCP & Oracle Cloud

Client : DowJones , USA

Role :

As a Database Migration Architect, to design, plan, implement/ execute migrations from scratch to end ,

1) Cloud Migrations with DB native tools and Cloud Tools
2) Cloud Optimizations and DB optimizations on cloud
3) On capacity planning and Metrics
4) Billing optimizations
5) Managing and maintaining all database and teams
6) Interacting with end users, stake holders, clients & management
7) Leading the DB teams and working on L1,L2,L3,L4 escalations
8) Reviewing pros and cons for all Cloud DB migrations for the best approaches ,strategies
9) Preparing & Going through all checklists, runbooks , documents, SOW and automations for migrations
10) Interacting with different teams like development, network, devops , infra, security and other teams for the migrations

11) Managing all services like RDS, EC2, IAM , storages, instances, cloud watch metrics , networks, load balancers, gateways and global and regional clusters
12) All Databases tech like oracle , mysql, postgres, aurora and dynamoDB's

Previously worked with **DAZN Software PVT Ltd**, Hyderabad as Cloud Lead DBA & Architect from **Aug 27th 2023 to September 7th 2024**. It is a Product based company based on Sports Streaming Platform (UK Based Firm)

Cloud Database Lead and Architect All RDBMS and Nosql databases like oracle Exadata OCI, Aurora Postgres MySQL , serverless databases like dynamoDB and skylla databases on AWS billings, cost explorers and cost analyzers on serverless architecture and RDS's by looking at CloudWatch and CloudFront metrics , performance insights , enhanced monitoring , trail logs snowflake databases etc.(Migrations and Upgrades , security RDS Certs Upgrades , Roles , AWS RDS and EC2 Instances Architectures(Optimizations) , Blue & green deployments , Cloud DB Operations, Cloud DB OPtimisations, Cloud DB Support and maintenances on RDS ,cloud watch alerts ,Aggregators for master account and Keberos Auth,API's , Lambdas ,WAF's and Shild's etc)

Previously worked **Minfy Technologies** from 13th March 2023 till up to Aug 27th 2023 as Cloud DBA Architect.

Projects:

1) Matson Project – Cloud DB Modernization
2) Dalmia Cements – Cloud Migrations

- Worked on migrations for both oracle, MySQL and postgres, sqlserver databases to AWS RDS & GCP Clouds
- Designing, planning and implementing the migration approaches
- Capacity planning's, metrics collections to provision the cloud resources
- Collecting all necessary statistics from source
- Prerequisites, Prechecks, migration checks and post migration checks
- Dry runs, Assessments Reports Analysis, migration evaluator ,Cutover and down time approaches
- Preparing SOE and SOW's as per client requirements
- Migrations from EC2 to EC2 and EC2 to RDS, On prem to RDS
- Checking limitations, version and parameters checks, compatibilities for DB and Cloud
- Schema conversions on cloud using tool
- Provisioning the cloud resources
- S3 buckets and storages
- AWS DMS migrations and validations
- Monitoring cloud trail logs and insights, log metrics, CloudWatch
- Tuning the both databases and cloud DB's Environments
- Setting up multiAZ and read only instances, replication instances
- Worked on both homogeneous and heterogeneous migrations
- Used Cloud tools and Database migration tools (AWS CLI)
- Troubleshooting the Db and migration issues,inbound,outbound rules, IAM policies, connectivity's, access related issues , permissions and roles
- Follow-up with database supports and Cloud support, cases and tickets
- On snapshots, retentions, backup's, autoscaling, endpoints, config's

Previosly Associated with **Gspann Technologies a**t Hyderabad from Feb 27th, 2017 to March 10th 2023 as Senior Oracle DBA Technical Lead.

Projects:

1. Backcountry
2. Sony
3. Macys
4. Starbucks

Previously worked at **Virtusapolaris**at **Pune** location from June 20th 2016 to Dec 31st 2016, as **Associate Architect DBA** (Tier1) for Oracle and all DBA shared services.
Deployed on client side **WNS Global Services (ALM)**, Pune and in **Vodapone** Projects.

Projects:

1. ALM(American Law Media)
2. Vodapone

Previously associated with **Valuelabs,Hydersbad**,(www.valuelabs.com)an ISO 9001:2008 and ISO 27001:2005 certified company. We are assessed at **CMMi v1.3 Level 5**. We are HIPAA and SAS 70 (Type 2) compliant for our Healthcare practice.Working from july 2010 to March 31st 2016.I worked in **HP snapfish** project (www.snapfish.com) owned by **Hewlett Packard(USA also)** , also worked in **AT&T(USA)** and **7Eleven** Projects(In **Malaysia**) .

Projects:

1. Snapfish (HP)
2. GroupO (AT&T)
3. Citibank
4. Walmart
5. SevenEleven (Retail outlet)

Previously working with **SPsoft Pvt Ltd**,an **ISO certified 2007 company** from august 4th 2008 till upto date.(www.spsoftglobal.com). Domain is on **onlinegaming** side.Head Office is at Costarica.(USA) and Canada.

Projects:

1. Fedex
2. Online gaming service (Casino)

Previously associated with **Wellinx Purkinje later called as lemuris as** a Sr.DataBase Administrator, from July 11 2006 to Aug 2008. (www.purkinje.com). Its USA and Canada based software company entirely on **healthcare** domain.

Projects:

1. Purkinke (healthcare)

Previously Worked with MultiSoft Corporation as a developer DBA, from February 2003 to June 31, 2006. (www.multisoft.com)

Projects:

1. Dupont
2. Fidelity

Roles And Responsibilities As An ORACLE DBA

DATABASE ADMINISTRATION:
Installation of Oracle package, Database Setup: This involves the creation of new databases and the initial space allocations of the database's tablespaces and primary storage objects decided in consultation with the respective departments. Alert Log Monitoring Providing Support to end Users and developers, which involves troubleshooting user problems

SPACE MANAGEMENT
Monitoring the database growth on daily basis, Modification of databases, Addition of tablespaces, datafiles and Modification of tablespaces, datafiles. Modification and addition of primary storage objects. Forecasting database growth.

BACKUP AND RECOVERY
Establish and Maintain Healthy Backup & Recovery Strategies and Procedures. Performing Hot Backup, Maintaining High database availability for supporting non-stop Business Operations. Recovering the Database without or Minimal Loss of Data. Evaluating the Backup & Recovery Procedures on a Test Database to Minimize the Loss on Real Time Scenario.

TUNING
Database Tuning and Performance Monitoring. Recreation of Database, Maintaining and Rebuilding Indexes, Reorganization of Tablespaces as and when necessary. Improving Query Performance by rewriting the problematic queries. Make the Database Optimal Flexible Architecture Compliant.

SECURITY
Implement and Maintain Database Security. Creating / Altering / Dropping Users as and when required and administer their respective quotas. Create and Maintain Roles and assign necessary privileges to users according to business rules.

STANDBY DATABASE
Configured and maintained Standby Database and Dataguard in OLTP environment to automatically synchronize with production database. It has helped to maintain the replica of the production database as well as minimise the downtime of the system in case of

maintenance of the production database. The standby database helped as a means to clone a production database for use in the event of a disaster.

REAL APPLICATION CLUSTERS With ASM

Implemented and maintained,Monitering RAC (4 node cluster) environment on linux advance server 4 using ASM Disk groups.worked on backup and recoveries of OCR AND VD(With Logical and Phisical backups),adding/Removing and enabling/disabling of the nodes,migrating the non-rac database to rac ,Load Balancing with TAF,Server/Client side Load Balancing,OEM config , and tunning(Awr and Addr for Rac Speicific) side also.Also in RAC migrations, upgraditions and installations.

Goldengate

Implemented Stream, Golden Gates for Active-Active Replication between the Datacenter for High Availability.
Replication,migrating and Extracting data and applying on production using GoldenGateat Admin level issues and challances in replications.

Exadata

Understood completed architecture and involved in maintenances, patches, monitoring, supported the Environment.

Vertica

Its MPP(massive parallel processing anaytical database)Impelemted for OLAP.Have given suport and worked in this environment implementation.

MongoDB

MongoDB is an open-source, document-oriented database designed for ease of development and scaling.its a no sql database.Worked and supported in implementing in our environment.

Postgres

An enterprise class database, PostgreSQL boasts sophisticated features such as MultiVersion Concurrency Control (MVCC), point in time recovery, tablespaces, asynchronous replication, nested transactions (savepoints), online/hot backups, a sophisticated query planner/optimizer, and write ahead logging for fault tolerance.Worked and supported in implementing in our environment.

Apps DBA 12.2 & 11.2(EBS)

Work on issues which L2 couldn’t fix

New Environments Build/Setups
Designing Backup/Recovery policies
Installing new Application environments
Post-Installation Tasks of New environments
Integrating E-Business Suite with other environments such as (SOA, OSB, OBIEE, OTM, IPM …)
Work on integration issues
Work on Cluster setups for both applications and databases
Work on DMZ setups to E-Business Suite
Work on Standby site setups for both applications and databases
Interact with Network/OS teams on network setups and load balancer setups.
Work on Parallel Concurrent Processing (PCP) Setups Fail-over capabilities testing of E-Business Suite and database
Design Cloning strategies.
Work on design related issues.
Work on adutlities like adclone,adpatch,adop,autoconfig,version upgrades,patching all 3 tiers (database tier, application tier like bsu patches,product patches, family pack patches,RUP,PSU) load balancer and cluster DB integrations Setting up E-Business Suite with Oracle Access Manager/OID to achieve Single Sign-On (SSO) Capabilities.

Cloud

Worked on database migrations from non-cloud to cloud environments i.e. S3 or EC2 & RDS also worked with cloudwatcher. and other cloud AWS services like VPC,templates,EFS,EBS,roles,security groups,IAAS and PAAS etc.(network,storage,security) Also, on migrations from AWS RDS/On premise to GCP Cloudsql using **Migration jobs**

- Using Rman utility
- Datapumps
- Exp/IMP
- GoldenGate
- PG_ADMIN tool
- Physical/Logical Replications
- Manual Backup & Restore

Devops

Worked as **DevOps** Engineer role also who is responsible for the automation of all manual tasks for the building and deployment of both code and data in order to enable continuous integration and continuous deployment frameworks (Code builds) using CI CD pipelines. (Automations)Managed & worked with Jenkins, maven,Terraform GitHub Repos, Dockers, Kubernetes Ansible and on AWS also.

WORK EXPERIENCE:

- Creating clone databases from running production standby databases.
- Installation and maintenance of oracle database on Windows NT, Red hat Linux.

- Backup and Recovery plans Management.
- Configuration RMAN, Standby Database, Distributed database and Replication Design Database, Data Security and Space Management.
- Shifting of oracle database from one operating system Platform to other(cross platform).
- Strong Oracle PL/SQL, Transact SQL and SQL background with strength in back-end programming.
- Schema Management.
- Review of most SQL queries to the server from all the modules for performance enhancement.
- Managing rollback/undo segments. Creation and setting parameters of rollback segments make any problem encountered during cycle or to user.
- Responsible for maintaining application level assistance to the Programmers.
- Apply all new patches to production.
- Involved in exporting the database, backups and recovery. Involved in performance and fine-tuning, customizing init.ora, SQL, user security, space management.
- Developed stored Procedures, Functions & Triggers. Development and implementation of user screens and reports.
- Remote Database Maintenance
- Taking logical and physical backups periodically.
- Performing database recovery several times under different situations.
- Designing & implementing indexes.
- Improving Query Performance by rewriting the problematic queries.
- Creation of Database and location of initial data files, redo log files, control files and multiplexing them editing database initialization parameter files.
- Creating users, roles, profiles, assigning roles and profiles to users.
- Taking logical and physical backups periodically.
- Choosing different types of data storages (Locally managed tablespaces, IOT and partition tables) and indexes in order to have good performance for SQL and DML.
- Used parallel query options and SQL hints for partitioned tables.
- Used direct path loading via SQL*Loader / SQL INSERT statement, CREATE TABLE AS SELECT statements, specifying NOLOGGING on staging table tablespaces, parallelized SQL statement execution where appropriate tables.
- Used oracle enterprise manager (GRID) to monitor the multiple databases.
- Creating & Maintaining Multi Character set Databases.
- Database Space management (Capacity Planning)

- Backup and Application/Error Log standard routines for tracking the errors being raised the Packages while deriving the data from the Database Tables for the Reports using PL/SQL features.
- Installation, Maintenance and Administration of Oracle for the developers & testers.
- Data transfer between different locations and different servers (Distributed databases).

- Storage management, sizing the database objects, monitoring file Systems and tablespace growth.
- Schema Design and Security Administration for the database.
- Using SQL*Loader direct path method to load the data.
- Resizing the SGA and tablespaces, added data files as when necessary.
- Developing, testing, continuously monitoring, and updating the Backup and Recovery strategy. This strategy includes all three types of backups like Logical (Export), Offline or Cold, Online or Hot Backups of tablespaces.Implemented Recovery Manager Utility (RMAN) Using Catalog for easier and well-managed recovery procedures.
- Was responsible for writing Nant scripts and building database • Install, configure, upgrade softwares: server, tools, applications • Database Refresh.
- Database migration from Oracle 8i to 9i and 10g,
- Created a number of database instances for development, testing and production.
- Application user creation / password management
- Created and managed the Database objects and schemas
- Performed Data Loading activities using Sql Loader/Import Utility/Text Importer
- Created Triggers/stored procedures for proactive monitoring
- Develop scripts to monitor database and system performance.
- Improving Query Performance by rewriting the problematic queries.
- Implemented invalid login attempts auditing.
- Detecting/Resolving Blocking Locks
- Design and implement DB security, user management
- Write procedures in PL/SQL to modify production database/application tables.
- Develop process to move database changes from development to production.
- Planning and scheduling backup, checking logs for errors, ensuring maximum uptime of 24x7 databases, database recovery if needed.
- Export / Import of Tables, Tablespaces and Databases
- Recovery of lost objects
- Maintained the data integrity and security using integrity constraints and database triggers.
- Involved in data loading using SQL * Loader from various formats of flat files to the oracle database.
- Solved Network related problems.,coldbackups
- Worked and maintained on DataGuard
- Implemented and worked on Real Aplication Clusters,Added,removed,upgraded to non-rac to rac (4 Node Cluster)
- Worked on partitions of of tables and indexes (online redifnation).
- PSU and CPU patches.
- Worked on oracle 11.1.0 to 11.2.0.3 upgrade and grid implementation
- Supported and Worked in implementation of different technologies like vertica(OLAP),mongodb(nosql database) and postgres.
- Automated monitoring shell scripts and other shell scripts for all technologies and for rman backup's,automated clonings.
- Worked on Oracle metrics (For both customer and oracle metrics) using graphite.
- Worked for setting up different tenants vm's and on BIGIP and HAPROXY (load balancer)
- Worked on migrating oracle data to different technologies like vertica.
- Worked on all hardware maintainces and switchovers etc.

- Worked on releases using perforce tool.
- Ganglia,gomez,splunk etc for OS monitor tools
- BIGIP, HA proxy,icinga configs (Load balancers)to vertica and mongo DB environment.
- Got trained and Worked on Oracle Exadata in 11g
- Worked on ruby pearl scripts cookbooks,recipes(chef server/client) for automation of environments (mongodb,postgres and oracle) on tenant VM's
- Implemented, Supported and maintained as Apps DBA in Apps tier and database tier for AT&T project in installations, patches, cloning and database refreshes, adhoc requests and integration in RAC.
- L1 & L2 support for Apps 11i and 12.1 Env as Apps DBA(EBS).

- Hands-on experience using networking, storage, and database AWS services
- Hands-on experience with AWS deployment and management services
- Ability to identify and define technical requirements for an AWS-based application
- Ability to identify which AWS services meet a given technical requirement
- Knowledge of recommended best practices for building secure and reliable applications on the AWS platform
- An understanding of the basic architectural principles of building on the AWS Cloud
- An understanding of the AWS global infrastructure
- An understanding of network technologies as they relate to AWS
- An understanding of security features and tools that AWS provides and how they relate to traditional services
- Migrations AWS RDS /On premise to GCP Cloudsql/VM for Oracle,postgres.sqlserver,Mongo (Atlasian cloud to GCP)
- Cloud DB Heterogenous Migrations using manual and using SCT &DMS tools
- Code build and Code deployments – Devops Tools CICD process.
- Migrations with DMS Utility, Cross Platform Migrations

PERSONAL DETAILS:

Father's Name: Maddula Rama Krishna Rao
Languages Known: English, Telugu, and Hindi. Marital Status: Married / Male
References: Available upon request
Pan card : AMAPM2839F
Aadhar : 8260 3980 6999
Salary Expected : As per company norms (30%)
Notice period : Immediately
Passport number : P6669856
Visa catagory : B1 (Business Visa) valid upto 2024 year - USA
Social Visa (Multiple Entry), validity 12 months – Malaysia
Valid upto 2017 jan 10th.
