naveens1908@gmail.com

Lead Enterprise Database Architect

Decisive, strategic and performance-driven professional, targeting leadership roles as **Technical Manager or Technical Architect**, with a keen interest in leveraging both technical prowess and managerial skills to drive organizational success.

PROFILE SUMMARY

- **A focused professional offering over 18 years of experience** in Database Architecture, Consulting, Best practices Implementation, Migration, High Availability (HA) and Disaster Recovery (DR) strategy, Performance tuning & Upgrades. Proficient in a wide range of database technologies, including Microsoft SQL Server, MySQL, PostgreSQL, AWS RDS, Aurora PostgreSQL/MySQL, MongoDB, Cassandra, Oracle, SAP HANA, Sybase ASE, Big Data Hadoop, and BI Systems.

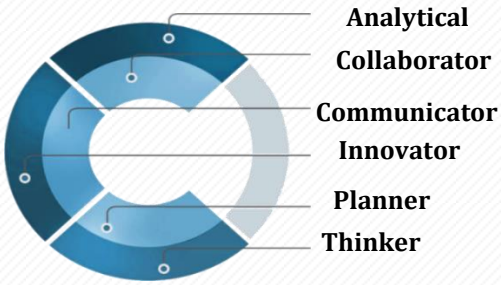
  Experience with AWS RDS (Relational Database Service) for SQL Server, MySQL, PostgreSQL, Oracle, AuroraMySQL/PostgreSQL, Google SQL & Azure SQL.
- Experience in End-End Implementations, Migrations, Upgrade & Administration of Microsoft SQL Server, MySQL Server, PostgreSQL, Cassandra and Cloudera Hadoop Ecosystem for Big Data Applications.
- Experience in implementing High Availability (HA) and Disaster Recovery (DR) for critical databases on SQL Server, MySQL, PostgreSQL, Cassandra & MongoDB. Hands on Experience with MMP Databases such as Greenplum, Apache HAWQ, Presto & Oushu.
- Experience with cloud databases and related implementations, including high availability, disaster recovery, scalability, and extensibility. Proficiency with AWS Aurora/RDS, AWS Database Migration Service (DMS), Schema Conversion Tool (SCT), Cloud Watch and performance Insights.
- Develop and execute comprehensive migration plans to transition databases from on-premises environments to AWS Cloud using Databases Migration Services (DMS + CDC) for minimal downtime.
- Responsible for assessing existing On-Premises Databases to develop a migration strategy to Cloud native solutions.
- Lead database migration projects to AWS, integrating with existing applications and services.
- Experience in migrating Large databases from On-Premises to AWS Cloud for SQL Server, PostgreSQL & MySQL.
- Expert in DB Log Shipping, Replication, Mirroring, Always On Cluster Setup, Distributed AG for SQL Servers.
- Expertise in **setting up and troubleshooting Active-Active Multi-Site Multi-Master Maria DB/MySQL Clusters**, ensuring HA/DR and Resiliency for SaaS environments.
- Experience in ITIL Foundations with subject matter expertise in Event, Incident, Problem, and Change Management processes.
- **Forward-focused Enterprise architect** with expertise in managing projects from scope management to activity sequencing, effort & cost estimation and risk analysis to quality; managed implementations and provided business analysis solutions to client accounts
- **Delivery Anchor** with career success in delivering solutions that remedy core business issues and position the organization to reach the next level of profitability **through technology introduction.**
- Interfaced with **C-suite of executives** for mapping business value chain & process and formulating strategic solutions while ensuring delivery excellence.
- Proficient in overseeing the **entire database infrastructure lifecycle**, including backup management, implementing best practices, adhering to CSI benchmark standards, security enforcement, system hardening, and ensuring high availability and disaster recovery with a proven track record of maintaining systems with 99.99% uptime.
- Proven excellence in **automating build** and deploying activities of applications on various environments using various tools.
- Track record of directing **IT initiatives** while participating in planning, **root cause analysis** and implementation of infra solutions.
- Excellent in **Database Designing**, Performance optimization, Database Security, and DR Planning, with a talent for executing Best Practices Installation/Upgrade procedures.
- Hands-on experience in **Automation, Virtualization, and Cloud Technologies**, with a comprehensive grasp of VMware products such as vSphere, vCenter, SRM, HCX, and DRaaS solutions.

- Well-versed in **Database Migration, End-End Workload deployments, and No-Downtime Upgrades Blue/Green deployments** on Private/Public/Hybrid Cloud Environments.
- Impeccable record of **leading high performance cross-functional teams** towards accomplishment of common goals and **managing multiple stakeholders** across leadership & engagements.

CORE COMPETENCIES

- Database Architecture
- Database Reliability Engineering
- Automation Strategies
- ITIL Service Management Practices
- Disaster Recovery Planning
- Infrastructure Optimization
- Virtualization Technologies
- High Availability Strategies
- Data Governance / Cloud Implementations
- Team Building & Leadership

SOFT SKILLS



EDUCATION

- Bachelor of Technology (IT) from Thangavelu Engineering College, Madras University, Chennai in 20xx
- Diploma (Electrical and Electronics) from Valliammai Polytechnic, Kattangalathur in 20xx

IT SKILLS

- Databases: Microsoft SQL Server 2022/2019/2016/2014, PostgreSQL 15.x/14.x/13.x/12.x, MySQL Server 8.x/5.7/5.6/5.5, Percona MySQL, MariaDB, Oracle, ASE 16.x & SAP HANA
- Hadoop/Big Data Stack: Databricks, Azure Synapse Analytics, Snowflake, Redshift, Cloudera (CDP 7.1.7), Hortonworks (HDP), Ambari, Cloudera Manager 7.7.1, Hive, Apache HAWQ, Zookeeper, Greenplum, Oushu, Sqoop, Kafka, Ambari Metrics
- NoSQL Stack: Cassandra 4.x, ScyllaDB, MongoDB 5.x & Elastic Search 7.x
- Cluster Technologies: WFCS - SQL Server Always on, SQL Server Distributed AG, Always on Multi Subnet, Tungsten Cluster, Galera Cluster, Oracle MySQL InnoDB Cluster & Patroni Cluster
- PaaS Environments: Kubernetes, Cloud-foundry
- Application Servers/Web servers: Tanzu Application Services/OpsManager, Tomcat, Apache, IIS
- Cloud Technologies – AWS RDS/Aurora/EC2/DMS/SCT, Azure SQL & Google Cloud SQL.
- Data warehouse (ETL) Tool: Informatica (Power Center), SQL Server SSIS, Log Stash
- Scripting Languages: Powershell & Python
- Operating Systems: RHEL/CentOS 7.x/Windows 2022/2019
- Monitoring: Wavefront, log insight, Splunk, Ignite, Manage Engine & vROps
- BI Visualization: Power BI, SSRS & Tableau

WORK EXPERIENCE

Lead - Database Administration (Associate Director) || ANI TECHNOLOGIES PVT LTD, Bangalore || Mar'25

Key Result Areas:

- Lead the strategy for migrating databases from Cloud to Onprem DC. This includes assessing the current environment and ensuring the migration meets business objectives.
- Design and implement scalable and highly available cloud database architectures.

- Work closely with DevOps, application developers, network engineers, and security teams to align database architecture and management practices with organizational needs.
- Oversee the technical aspects of moving databases, ensuring minimal downtime and data integrity throughout the migration process.
- Define and test failover procedures to ensure that the database environment can quickly recover from any unexpected incidents.
- Assign tasks based on team skills and project requirements, ensuring efficient use of resources.
- Maintain detailed and up-to-date documentation for all database environments, migration processes, DR plans, and audit processes
- Provide regular updates to senior leadership on the status of database operations, migrations, DR readiness, and compliance audits.
- Ensure comprehensive backup strategies are in place, including automated backups, off-site storage, and periodic testing of restore processes
- Oversee the implementation of logging and auditing mechanisms for database activities, ensuring that changes and accesses are tracked and recorded.

DBA Architect || Cloud Kinetics, Chennai || Sep'24-Feb'25

Key Result Areas:

- Evaluate current on-premises database environments to pinpoint migration challenges, identify optimization opportunities, and determine best practices for cloud architecture.
- Develop and execute comprehensive migration plans to transition databases from on-premises environments to AWS Cloud.
- Oversee database migration projects to AWS, ensuring seamless integration with existing applications to cloud database services.
- Monitor cloud performance and cost, identify areas for optimization, and implement solutions to improve efficiency and reduce expenses.
- Migrated databases to AWS RDS, Aurora MySQL/PostgreSQL, EC2 by utilizing AWS services such as S3, VPC, Database Migration Service (DMS), schema Conversion Tool (SCT), CloudWatch and performance Insights.
- Build and document innovative database solutions as a POC showcasing the capabilities and integrations as per client needs.
- Spearhead database migration efforts and establish best practices that promote excellence within the organization.
- Create and maintain technical documentation, including reference architectures and best practices, to support the implementation and adoption of database solutions, migrations and security hardening.
- Apply company security policies and harden the database (RDS) to qualify as per the company standards.
- Manage multiple priorities and tasks within a dynamic work environment, ensuring timely and effective delivery of projects
- Expertise in Database optimization concepts such as partitioning, Indexing, Fragmentation, clustering, high availability, and replication.

Lead Application Administrator || VMWARE by Broadcom, Bangalore || Sep'11 – Sep'24

Key Result Areas:

- Deploying HA Solutions such as DB Replications, Log-Shipping, Mirroring & Clustering for critical applications.
- Spearheaded major projects such as **Data Centre migrations and multi-data centre migration** initiatives, showcasing strong project management capabilities and the ability to deliver complex projects on time and within budget.
- I was part of a Center of Excellence (CoE) team responsible for defining and implementing policies, standards, and best practices focused on cost optimization and enhancing database performance. This included developing migration strategies and performance improvement initiatives to drive efficiency and reduce costs across database systems
- Experience in End-End Implementations, Migrations, Upgrade & Administration of Cloudera Hadoop Ecosystem for Big Data Applications.
- Lead database migration projects to AWS, integrating with existing applications and Cloud Database services.
- Familiar with AWS analytics platforms like EMR, Glue, S3, Redshift & building high performance end to end data pipelines for a Data Lake/Data Lakehouse.
- Strong experience in Data warehouse architecture implementation and Data Integration.
- Develop and execute comprehensive migration plans to transition databases from on-premises environments to AWS Cloud.

- Strong experience on AWS RDS, Aurora PostgreSQL, EC2, S3, VPC, by using the AWS Services, migrated some of the on-prem databases to AWS Cloud using Database Migration Service (DMS) by implementing Change data capture for incremental changes to reduce downtime.
- Provision and manage RDS, Aurora, and various other databases within the AWS Cloud environment.
- Monitor cloud performance and cost, identify areas for optimization, and implement solutions to improve efficiency and reduce expenses.
- Experience in migration of Pivotal (PHD)/ Hortonworks Data Platform (HDP) and HDP3.x to Cloudera (CDP - CM 7.x & Cloudera runtime 7.x).
- Perform Quarterly DR Activity for the Entire Hadoop Ecosystem with ISILON Storage Replication for HDFS file system and SRM Replication for the VMs.
- Orchestrating automation strategies to boost efficiency and streamline manual tasks.
- Orchestrating No-Downtime Database Upgrades/patches & Migrations.
- Contributing to Quarter/Year End War Rooms, facilitating critical issue resolution.
- Advising as Infrastructure and Architecture Technical Review Board member.
- Enforcing Data Quality, Archival process, Performance tuning, Governance, Security & Privacy to ensure compliance and system security.
- Revising Security policies quarterly, collaborating with Security team, Governance Team & Application teams/Owners to mitigate risks.
- Participating in Customer Briefings on Best practices implementation on Hadoop/Big Data stack Setup for DR, Microsoft SQL Server & other databases.
- Automating Routine/Daily Maintenance & Monitoring tasks related to multiple Database environments and Hadoop. (Includes Installation, Configuration, Service Auto-Recovery/DR etc…)
- Directing Enterprise Database Engineers and Architects to implement top-tier solutions for Database and Big Data Engineering.
- Establishing Central Monitoring & Live Dashboards (Ignite, vRops, Wavefront & Manage Engine).
- Implementing Proactive monitoring alerts & Self-Healing Scripts.
- Continuously evaluating and implementing cutting-edge technologies and methodologies to improve database security, resilience, and scalability, proactively mitigating potential risks and vulnerabilities.
- Playing a pivotal role in driving digital transformation efforts by leveraging advanced database solutions to support agile development, DevOps practices, and continuous integration/continuous deployment (CI/CD) pipelines.

PREVIOUS EXPEREINCE

Senior System Engineer - GBS || IBM India Pvt. Ltd, Bangalore || May'09 – Sep'11

Senior Consultant || Encora Technologies Inc, Bangalore || Oct'08 - May'09

Senior DBA || Wipro InfoTech, Bangalore || Dec'04 – Oct'08

Regional Tool Specialist for Client Wipro InfoTech || Abhinand Computer Systems, Bangalore || Aug'03 – Dec'04

Key Result Areas:

- Oversaw/Supported Multiple Databases Infrastructure for US/Europe Clients - LandAmerica Financial Group, Inc, Ericsson Sweden, Wipro Infotech & Wipro Technologies.
- Executed Infrastructure Operations/Support at esteemed organisations.
- Acted as SPOC for Business Critical Database Infrastructure over 100+ Production Database Servers of Global Clients across multiple sectors.
- Demonstrated expertise in executing Installation, Configuration, Performance Tuning, applying patches, troubleshooting servers, Backup/Recovery, Monitoring Replication, Log shipping, Migration & Upgrade Process of Multiple database servers of SQL Server, MySQL & PostgreSQL.
- Played a pivotal role in Designing backup & Recovery of Databases during crashes and DB Corruption.
- Engineered DTS & SSIS packages to Load SAP employee Data into the application database. Devised Automated DTS packages to generate reports for LEAN project on Change management process.
- Automated Manual Activities by Integrating SAP data & E-Asset with Service desk SQL database for configuration Management using the SSIS.

ACHIEVEMENTS & AWARDS

- Earned CIO award for successful implementation of Active-Active DR system.
- Received recognition with the feather in my CAP award from the WT customer.
- Acknowledged with the GEM award from Ericsson Customer.

CERTIFICATIONS

- Cloudera Certified Administrator for Apache Hadoop (CCAH).
- ITIL V4 (Foundation) Certified.
- VMWARE Certified Professional – vSphere 5.0 (VCP)
- Microsoft Certified Professional in SQL Server

TRAININGS

- Trained on Kubernetes and Pivotal Cloud-foundry.
- Trained on Mongo DB Administration
- Trained on VMware vSphere (Datacentre Virtualization)
- SAP HANA Administration.
- Trained on Pivotal Greenplum Database, HADOOP Administration & EMC Storage Foundation (ISM v2).
- Undergone Training on MySQL Server & PostgreSQL
