Total Experience
3+Years in Testing

Work History

9i web Solution PVT LTD
Jan 2022 to Oct 2024

Better World Technology PVT LTD
Oct 2024 to Feb 2025

Designation

- Quality Analyst
- Quality Assurance Engineer I

Career Objective

Seeking an exciting and challenging career in IT industry where in my knowledge will prove effective towards the growth and development of the organization and myself

Summary and Accomplishments

- **3+ years of professional experience** in the IT industry.
- Worked on **e-Commerce and Banking domains** with Agile methodology.
- Designed and executed **API automation frameworks** integrated with TestNG, validating **CRUD operations, JSON/XML schema, headers, cookies, and multiple authentication mechanisms**.
- Hands in experience in postman for API validation
- Improved automation efficiency by implementing **Page Object Model (POM)**, reusable methods, and **dynamic locators** in Selenium frameworks.
- Integrated automated suites into **CI/CD pipelines (Jenkins)**, enabling continuous testing and faster sprint feedback.
- Validated **authentication and authorization mechanisms** (OAuth2, Token-based, Basic Auth).
- Used **Hamcrest assertions** and integrated **Rest Assured** with **TestNG/JUnit** for structured execution and reporting.
- Actively contributed to **Agile ceremonies** (stand-ups, sprint planning, retrospectives) and maintained **requirement-to-test traceability** for 100% coverage.
- Collaborated with developers to identify, log, and resolve API defects through **comprehensive Rest Assured testing**, ensuring smooth integration with backend services.
- Expertise in **manual testing** – Smoke, Component, Integration, End-to-End, Ad-hoc, Regression, and Re-testing.
- Proficient in the **Bug Life Cycle**, defect logging, reporting, and tracking using **JIRA**.
- Knowledge of **RDBMS concepts** like Joins, Sub-queries, and CRUD operations.
- Strong knowledge of **Core Java, OOPS concepts, and Collections**.
- Expertise in **Selenium automation** (POM, TestNG, waits, dynamic XPath, pop-ups, iFrames, dropdowns), writing and maintaining UI and backend scripts.
- Experience in **mobile testing** using Appium, TestFlight, and both real devices and emulators.
- Hands-on experience on mobile testing using **Appium**, **Postman**, **TestFlight,** and devices/emulators..
- Strong experience in API testing with Postman, including CRUD operations and **JSON/XML** validation.
- Solid understanding of HTTP protocol.
- Experience in API automation using **Rest Assured.**

Collaborated with development teams to identify and resolve API defects through comprehensive Rest Assured testing.

Technical Skills

Testing Tools	Selenium IDE/Web Driver
Scripting	Java
Frameworks	BDD, Data-Driven
IDE	Eclipse
Test Case Management Tool	Test Rail
Web API Testing	Postman
Bug Tracking Tools	JIRA
Database	Oracle SQL

Project Details
Sodexo Benefits& Rewards

Role
Automationand Manual Testing

Process
Agile Methodology

Domain
Banking

Project Description:

- Corporate Benefit Solution - This product is for providing the tax benefit solution to the corporate employees where the employee can use the Zeta App and purchase various products like meal, communication, fuel etc. By making the payment via the App, the user can save the tax on the purchase. The benefit solution provides several configuration features to handle the payments at various pos terminals. The Corp HR is provided with the crop dashboard where he can set limits on the spends of the user and do several other configurations.

Responsibilities:

- Understanding the Functional Requirements and Clients Business Work Flow
- Involved in reviewing Test Cases of Team members
- Involved in implementation and execution of **Selenium WebDriver** automation framework (Hybrid) for Regression Test Suites (TestNG and Maven)
- Used **Try Xpath** to inspect the **XPath** of the dynamic and static web elements
- Involved in Test Execution across differentphases of testing both manually and through Automation
- Defect Logging and Tracking using Jira
- Generating Work Progress Reports and communicating the reports to the Test Lead
- Participated in locating web elements using selenium locator (xpath) to interact with the element on web page
- InvolvedinWriting and Execution of Testcase across differentphases of testing.
- Preparation of Test Case Execution and Defect Report

Project Details
Gymnago (NARITA)

Role
Manual Testing

Process
Agile Methodology

Domain
E-Commerce

Project Description:

- The most advanced gym and fitness management software for businesses of all sizes. It helps various gyms and fitness centers manage their branches in a centralized system. This comprehensive product is easy to use and highly scalable for future purposes. **Responsibilities:**
- Understanding the Functional Requirements and Clients Business Work flow
- Prepared Test Scenario and Test Cases for **Smoke Testing, Component Testing, Integration Testing, End-to-End Testing, Ad-hoc Testing**
- Worked on converting scenarios into efficient test cases.
- Involved in reviewing Test Cases of Team members
- Handled Defect Tracking Process using Jira tool.
- Defect tracking using Jira tool and retesting the bug fixes.
- Involved in various meetings such as daily stand-up meeting and Retrospective meeting
- Identified and analyzed issues during test execution.
- Defect Logging and Tracking
- Preparation of Test Case Execution and Defect Report

Educational Qualification:

- Completed MCA from Balasore college of Engineering and Technology Odisha, Affiliated to BPUT.
- Completed B.Sc in Physics from FM University Balasore, Odisha.

Declaration:

I do hereby declare that the above information is true and complete to the best of my knowledge and belief.
