Lead Cloud Solution Architect AWS \ SQL Azure\SQL server DBA Cloud Technologies

SUMMARY

Career Summary

Experienced Cloud Solution Architect having total of 16.8 years of experience, Strong business and technical vision with effective people management skills and closely working with senior management and Business Stake holders.

- A team builder who motivates team members to excellence using a proactive management approach. Dedicated to translating changing business.
- objectives into leading-edge technical solutions that are practical and efficient.
- *ITIL Certified with complete process-oriented structure related to the Incident Management, Change Management, Problem Management, Knowledge
- Management and well versed other ITIL related processes and implementation of ITIL process at the organization level.
- Certified in Agile Methodologies with Good Exposure to the Automation process using PowerShell and Reporting services\Python. Good exposure to PAAS and IAAS.
- Good Experience in Cloud Computing architecture-SQL Azure and AWS Solution Architect and Database specialty (Certified).
- Certifications completed in AWS Solution arch, AWS Database specialty, Terraform, SQL Azure DP 300, Cockroach labs.
- SQL Server installation, Trouble shooting of SQL installation standalone and Cluster environments.
- SQL Patching Activity for all the SQL Servers 2005, 2008, 2008R2, 2012 and 2014.(Developed Tool for Patching Activity).
- Performance issue fixes Joining MIM (Major Incident Managements), RCA for the issues and providing development support to the Application teams.
- Migrating of the SQL Server from 2000, 2005, 2008 and 2012 with minimal downtime to the business.
- Incident, change and Problem Management standards dealing with Severity issues.
- Having Good Experience on Tivoli storage Management (TSM), TDP, backup and Recovery strategies.
- Experience on DR (PATS) and windows Patching activity.
- Vast Experience on Clustering, Replication, Mirroring, Log shipping and on complete HA and DR activities. Setting up new environment for HA and DR.
- Worked on DMS(Data Migration Services) from On premise to cloud Environment using DMA.

KEY SKILLS

AWS Cloud skills	SQL Azure skills	SQL Server DBA	Tools\Monitoring
EC2, ECS, EBS, S3,VPC,Security Groups, NACL's	VM, MI, Azure Databases	Always on\Cluster	Datadog
RDS management API	API Calls	DB Mirroring	Grafana\Prometheus
Aurora Postgres(Global and Regional Clusters)	Azure DB, MI, SQL VM	Log shipping	PowerShell
Major and Minor Version upgrades	Major and Minor Version upgrades	Performance Tuning	Python
Terraform IAC Resource provisioning.	Terraform IAC Resource provisioning.	Coding\Stored procs	ITIL
Backups\snapshots\Cloning of databases	Backups\snapshots\Cloning of databases	Aurora Postgres	Agile Methodologies
Auto scaling\Certification creation\NLB\ALB	Autoscaling Resources	DTA\Profilers\Extended Events	PG Admin
Switch over\Failover using Lambda function	IAM\Roles	Logs Analysis\	Liquibase\Intellij
EKS and ECS Deployments	Database Maintenance\DETA	Migration from on Prem\VLDB's	
Migration of databases from On prem to cloud	DMV's\Extended events\Performance Tuning	Migration on prem to cloud	
CloudWatch\Performance Insights	backups\Storage Containers\Intelligent Insights		
Lambda Functions\Step Functions\State machines	IQP\Security\Migration of databases		

PROFESSIONAL EXPERIENCE

UST Global:

Infrastructure Database Lead (SQLDBA, AWS Database Specialty, SQL Azure): **Jul 25--Present**

- Working with UST Global (SQL server DBA, SQL Azure, AWS) providing complete support for Pre Prod and Production servers .
- Expert in high-availability, backup & recovery, performance tuning, migrations, and automation to ensure reliable, secure, and high-performing database platforms.

- Managing 2000+ SQL Server instances supporting OLTP and OLAP workloads; maintained 99.99% availability through Always On and automated monitoring.
- Designed and implemented backup and restore strategy ,reducing recovery time objectives (RTO) by 40%.
- Performed query tuning and indexing improvements that reduced avg. query latency by 80% for critical reports.
- Led migration of databases to Azure SQL Managed Instance with phased cutovers and minimal downtime; validated data integrity and performance post-migration.
- Automated routine DBA tasks (backup checks, index maintenance, health checks) with scripting and tools
- Implemented capacity planning and growth forecasting, coordinating storage and compute upgrades proactively to avoid outages.
- Created runbooks and executed DR drills; managed failovers and documented post-incident RCAs.
- Performing Ransomware testing activities by building new SQL server instance using market place.
- Automating deployment of SQL server instances using Bicep\ARM Templates. Setting up the Complete high availability of instances replica of the effected environment.
- Migration of SQL servers from On-prem to Om-prem and onto Cloud environments SQL azure and AWS using DMS.
- Performing Audit and Compliance reports adhering to the company security standards.
- Leading MIM P1/P2 incidents raised by the service now teams interms of technology and management, providing updates to business and stake holders.
- Building of EC2 Instances and configuring EC2 instances connectivity to the Cloud Databases using Sophia Methodology as part of security standards.
- Working on EBS attachments to the EC2 instances for persistent storage activity in terms of EC2 restarts and configuring EBS with lesser cost.

Database Lead (SQLDBA, AWS Database Specialty, SQL Azure) Jun '16 – July '25

J.P Morgan chase & Co. Hyderabad

Worked with J.P. Morgan chase involving in providing complete support for PRODUCTION AND NON-PRODUCTION environments for Digital and Merchant banking on AWS, SQL Azure and SQL Server.

- Setting up the DEV\Test and Prod environments by developing security standards using Security groups\NACL and communicating Public \Private IP's using IGW.
- Setting up Private and service end points while communicating across regions and availability Zones and working on Data Engineering.
- Vast Experience in setting up Aurora Postgres Global and Regional clusters and converting the clusters from Regional to Global and Global to regional.
- Maintenance of the cloud Databases for Aurora Postgres\SQL Azure Databases like Vacuum, Auto Vacuum, Dead tupl.
- Implemented the Cost Optimization methodologies like LIGHTSWITCH, Aurora Serverless and saved cost of around 30 % to the teams and Storage Cost optimization by using IA S3 buckets in terms of Go-Green Initiatives.
- Building of EC2 Instances and configuring EC2 instances connectivity to the Cloud Databases using Sophia Methodology as part of security standards.
- Working on EBS attachments to the EC2 instances for persistent storage activity in terms of EC2 restarts and configuring EBS with lesser cost.
- Working on EKS and ECS building instances for Application and Datadog connectivity, ECS with lesser cost in terms of Task, Task Def, Services for running of batches and for application smooth running.
- Implemented Automated Switchover and Failover for Aurora Postgres Databases using Lambda Functions integrating with Application code for database and Application in region specific.
- Working on Backup(Manual and Automated Snapshots)\Restore\Cloning of databases for building new instances and cross region snapshot.
- Working on Major and Minor version upgrade of the Databases with minimal downtime by using the Automatic switchover option and reduced the time of failover to 2 mins for the writer instances.
- Migration of databases from on prem to cloud environments using DMA, DMS and SCT on both AWS and SQL Azure with minimal downtime for cutover.
- Implementation of IQP on Azure, Intelligent Insights, Cloud watch, Performance in sights in AWS and collecting the metrics using different monitoring tools like Datadog, Grafana.
- Having Vast knowledge on Datadog and Grafana Monitoring tools implementing Dashboards , Creation of alerts\Monitoring, APM, Datadog Integration with Cloud database to collect metrics and also integration with service-now to generate tickets and escalating them to priority.
- Working on SQL Azure Managed Instances, Azure Databases, SQL server VM's as per the customer requirements and building up the servers as per the requirements maintain the Firewall, security principles in terms of Audit and Compliance.
- Working on TLM\FARM breaks in line with the Audit and compliance and resolving them as per the audit policies across the organization.
- Auto scaling of resources (Secondary instance) as per the thresholds and building new reader instance for OLAP operations.

- Working on Resource provisioning using the Terraform and having vast knowledge on Terraform implementation and generating public modules using the existing Terraform modules.
- Working on Different versions of SQL server installations and performing SQL Patching and CU on the servers.
- Working on Major Incident calls (P1S3 to P1S1) involved in RCA and prevention of the issues. Certified in ITIL process
- Working with business users for better performance and reliability of the application by maintaining better server configurations and maintenance activities including HA and DR Capabilities like Always on, Mirroring, Logshipping.
- Strong Skills on Performance tuning of SQL server Databases and using tools like DETA, Profiler, DMV's on both on prem and SQL Azure Databases\MI.
- Excellent working knowledge on handling VLDB's migration and highest databases handled for DB migration with 300 TB on both HA and DR servers with minimal downtime to the Application teams.
- GMSA Migration of Databases servers as part of security and audit and code written in python as per the business requirement.
- Global write forward, Promoting Read replica to Write Replicas and Cost optimization on Cloud resources. Cloning of Databases to new Aurora Postgres cluster, Snapshots point in time restore.
- Having strong skills in developing RDS Management API for Automation purpose and implementing various automation test cases using postman.
- Working on Postgresql, migrating of the databases Oracle to Aurora postgres using the Golden gate replication.
- Patching the Postgresql servers minor and Major version upgrades with minimal downtime to the business by coordinating the regional\Data center failovers.
- Backup the databases to maintain the recovery strategies using pg_dump and many other utilities which includes the manual and automatic snapshot as well in terms of cloud adoption process.
- Query Performance tuning of the Postgresql database using EXPLAIN, ANALYSE, VACUMM, AUTOVACUMM etc.. to maintain the health of the databases and any issues arises as part of the performance tuning.
- Design and Data modeling of the databases and indexes in Postgresql using different types for index scans only, spatial indexes like GIN,BRIN etc…
- Supported the deployment and maintenance of Oracle databases assisting with a 30% increase in cloud adoption
- Collaborated in the optimization of Oracle 19c databases, yielding a gain in overall efficiency for several mid-sized business applications.
- Coordinated with different DBAs to execute backup and recovery strategies, decreasing potential data loss by 90% in simulated disaster scenarios.
- Participated in upgrading Oracle Database instances while achieving zero downtime, praised for meticulous planning and execution.
- Assisted in developing an automated patching schedule for Oracle environments, ensuring compliance with the latest security standards and reducing patch time.
- Extensive experience in deploying, managing and developing MongoDB clusters. Creation, configuration, and monitoring Shards sets.
- Analysis of the data to be shared, choosing a shard Key to distribute data evenly.
- Architecture and Capacity planning for MongoDB clusters. Implementing on-premise MMS monitoring and backup solution.
- Worked on MongoDB database concepts such as locking, transactions, indexes, Sharding, replication, schema design.
- Experience in managing MongoDB environment from availability, performance, and scalability perspectives.

SQL DBA Technical Lead — Dec'09

Barclays Technologies Ltd. — Pune and England

Complete Support to the Production environments for Retail, Corporate and investment banking along with active participation into Pre-Production Environment operating across the globe providing 24X7 Database support. Supporting the environment from initial phase of Design the Database Architecture and Allocation of SAN and RAID Levels Suitable for the SQL server basing on the Editions being used for Production and Pre-Production environments.

- SQL Server installation, Trouble shooting of SQL installation standalone and Cluster environments.
- SQL Patching Activity for all the SQL Servers 2005, 2008, 2008R2, 2012 and 2014.(Developed Tool for Patching Activity).
- Performance issue fixes Joining MIM (Major Incident Managements), RCA for the issues and providing development support to the Application teams.
- Worked on all Editions of SQL server and windows operating system trouble shooting, DHCP and Networking.
- Migrating of the SQL Server from 2000, 2005, 2008 and 2012 with minimal downtime to the business.
- Incident, change and Problem Management standards dealing with Severity issues.
- Having Good Experience on Tivoli storage Management (TSM), TDP, backup and Recovery strategies.
- Experience on DR (PATS) and windows Patching activity.
- Vast Experience on Clustering, Replication, Mirroring, Log shipping and on complete HA and DR activities. Setting up new environment for HA and DR.
- Good Exposure and Experience on Cloud based Environment (SQL Azure and Windows Azure) and SQL FARM (HCE). Setting up new environment on Cloud based and handling the performance related activities on SQL Server side by Scaling up and scaling down the resources.
- Adhering to ITIL V3, maximised compliance with Service Level Agreements (SLAs) and Operational Level Agreements (OLAs) by improving performance.
- Worked on DMS(Data Migration Services) from On premise to cloud Environment using DMA.
- Setting up the SQL server Enviornment from On Premise to Cloud Environment.
- POC for IAAS and PAAS to setup the Infrastructure and service objects.
- Very strong knowledge on PR-Problem Record Management by providing RCA (Root cause) and preventing the issue for reoccurrence by maintaining the ITIL Standards.

Support Lead Jun '06 - Dec '09

Microsoft India Hyderabad

Worked as Support Lead at Microsoft India R & D Ltd. Involving in Providing the Complete Support to the Test and Production environments.

DBA for SQL Server serving 2 remote locations (India and Redmond) and 63 Microsoft SQL Servers including the Test and Production environments. Worked as a Support Lead with other DBA's to ensure 24 hour x 5 day a week.

- Migrating the MS-SQL Server 2000 to MS-SQL Server 2005.
- Building the Cluster nodes in MS-SQL Server 2000 and MS-SQL Server2005 and also Testing the Cluster Environment by doing Failover Clustering Technology.
- Applying the SQL Server Security updates on all the Test and Production environments.
- Building the Replication in Test and Production environments. Trouble Shooting the Replication Failures in the Test and Production Environments.
- Backup the Database by writing the appropriate scripts and also by using the SQL Lite Speed Tool.
- Restoring the Databases by writing the appropriate scripts and also by using the SQL Lite Speed Tool.
- Application support as well as the Database support Related to the Microsoft Products and also debugging the Applications and the stored Procedures whenever the support is needed by the Testers and the Developers.
- Experience in Database programming
- Experience in MS-SQL Server 2000/2005 server.

EDUCATION

Qualification	Percentage	Passed out Year	University
Master of science(computer Science)	77.8	2005'Mar	Andhra university
Bachelor of science(Computer Science)	70	2001'Mar	Andhra univeristy
ITIL Certified			PUNE
Agile and Lean training programs Certified			PUNE

Hyderabad

Certifications

AWS Solution Architect Certified --- Candidate ID: **AWS02963545** Registration Number: **427881177**

AWS Database Specialty Certified -- Candidate ID: **AWS02963545** Registration Number: **455884876**

ITIL Certified. Agile Methodologies

Accomplishments

- Major Accomplishment is with working with Microsoft about the Licensing of the SQL server.
- Migrating 300 TB of Databases from On-premises to Cloud and On Premises to On Premises Environments.
- Automating the SQL Patching Activity.
- Automating the TSM with SQL backups fixing different error codes.
- Working closely with the management in analyzing the root cause of the issue and fixing them on Permanent basis.
- Taking Business crucial decisions by completely following the process and participating in enhancing the Process which is best suitable for the organization to make the business work smoother and efficiently.
- Leading team members of 44 people from the current location making sure the support will be provided 24 X 7 across coordinating with the different regions across the globe for Barclays environment.
- Good hands on in implementing IAAS, PAAS with complete integration driven in integrating the Platform teams as Windows, Storage and database teams.
- Good Leadership skills in driving the Team members and also having good training knowledge on Leadership skills.

Thanks & Regards
Chandra.
