SUMMARY

Quality Engineer with over 3 years of experience in manual and automated software testing, with a focus on REST APIs, Mobile, and IoT applications. Skilled in designing and executing test cases, identifying performance and security issues, and validating complex data flows using Kafka. Hands-on experience in automation using Rest Assured with Java and TestNG, and integrating test suites into CI/CD pipelines with Jenkins and CircleCI. Strong contributor to test planning, with a proven track record of improving test coverage and release efficiency.

SKILLS

Programming Languages	: Java, Python
Automation framework	: Rest Assured, TestNG
Manual Testing	: Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, Performance Testing, Security testing, API Testing, White Box Testing
Tools & Technologies	: Postman, JMeter, ZAP, Burp Suite, AWS
Test Case Management	: TestLink
Defect Tracking	: JIRA
Version control	: Git, Github
CI/CD & Build tools	: CircleCI, Jenkins, Docker, Maven
Methodologies	: Agile (Scrum), Test-Driven Development
Operating system	: Linux, Windows
Database	: PostgreSQL

PROFESSIONAL EXPERIENCE

RENTLY

Quality Engineer | April 2022 – Present

Project: Rently Smart Lock services, HVAC monitoring system

- Designed and executed manual test scenarios using **Postman** for REST APIs managing AWS Cognito user flows, smart locks, and IoT devices.
- Performed **end-to-end validation** of **HVAC performance insight systems**, including **test data generation**, Kafka-based data streaming, and microservice-level validation.
- Created and executed **manual test cases** for **Bluetooth-enabled mobile applications** used to configure and control smart lock devices, ensuring compatibility and usability across platforms.
- Conducted **functional, regression, smoke, sanity, and integration testing** to validate software functionality, ensure system stability, and maintain end-to-end application quality across API, web, and mobile platforms.
- Conducted **performance testing** using **JMeter**, identifying and resolving issues related to database query performance and backend application response times.
- Performed **security testing** on REST APIs using **ZAP & Burp Suite**, validating against **OWASP Top 10** vulnerabilities.
- Validated **database synchronization** across distributed systems using Kafka
- Experienced in REST API automation using **Rest Assured** with **Java and TestNG.**
- Integrated automated test suites with **CI/CD pipelines** using **Jenkins and CircleCI** to enable nightly test runs and faster production releases.
- Participated in **test planning**, contributed to defining QA strategies, and collaborated with cross-functional teams to ensure comprehensive test coverage.
- Actively participated in all **Agile ceremonies** including daily stand-ups, sprint planning, backlog grooming, sprint reviews, and retrospectives to ensure alignment with the development team and contribute to continuous improvement.

EDUCATION

- **B.E - Electronics and Communication Engineering**
  Sri Ramakrishna Engineering College | 2019 – 2023 | CGPA: 8.5

KEY ACHIEVEMENTS

- Received **three commendations** from management for consistently delivering high-quality work.
