Profiles

Shreyas Kumar

Summary

Senior Frontend Engineer with 7+ years of experience building responsive, user-centric web applications. Known for delivering high-quality code, optimising performance, and collaborating effectively across teams to bring design concepts to life. Passionate about creating seamless and engaging user experiences.
Key Skills: HTML, CSS3, JavaScript, ReactJS, TypeScript, TailwindCSS, NodeJS.

Experience

Rakuten India — **04 May, 2023 - Present**
Senior Software Engineer - II — Bengaluru, India.
https://music.rakuten.co.jp/

As a Lead Frontend Engineer on Rmusic, Rakuten's music platform, my role involves:

- Enhancing user experience and expanding product capabilities.
- Participating in architectural decision-making and driving performance optimizations.
- Mentoring and guiding junior team members.

Tech Stack
ReactJs, TypeScript, TailwindCSS, Vite.

Postman — **05 April, 2020 - 01 May, 2023**
Software Engineer — Bengaluru, India
https://www.postman.com/buy

Worked as a Frontend Developer on the Billing and Subscription team at Postman.

- Developed the entire subscription purchase experience to provide seamless user onboarding.
- Maintained and optimised the post-purchase experience, focusing on billing and subscription management interfaces for tracking current subscription and usage.

Purchase page is an independently hosted SPA (Single Page Application) built for desktop experience. It powered by **ReactJS, Mobx** for state management, **styled-components** for styling and **stripe SDK** for payment processing.

Piktorlabs — **04 April, 2019 - 03 April, 2020**
Product Engineer — Bengaluru
https://piktorlabs.com/

- Leading the client-side development team for VERA. VERA was the in-house product of the company for smart recommendation on apparels.
- Worked on the company's website that is live at present.

Link to another side project that I worked on. (**https://amazing-aryabhata-98292c.netlify.app**)

Moonraft Innovation labs — **01 June, 2017 - 01 April, 2019**
Software Engineer — Bengaluru
https://moonraft.com/

- Worked on client side web apps and mobile applications. Main objective was to create pixel perfect applications with cross-browser functionality.
- Most of the applications I worked on were for T-mobile internal teams.
