EDUCATION

- B.E. in Mechanical Engineering, Loyola Institute of Engineering and Technology, 2021

CORE COMPETENCIES

- Quality Assurance
- UX/UI Testing
- Software Development
- Test Planning
- Performance Testing
- Continuous Integration and Deployment
- User Experience Testing
- Compliance and Security Testing
- Defect Life Cycle Management
- Test Case Design and Execution
- Agile Development Processes

CERTIFICATIONS

ISTQB Foundation Level Certification

TECHNICAL SKILLS

Programming Languages: JavaScript, Java
Automation Tools/Frameworks: Cypress, Selenium
Version Control Systems: GitLab
API Testing Tools: Postman
Database Knowledge: SQL
Project Management/Tracking Tools: JIRA
Markup/Data Formats: YAML, JSON
Operating Systems: Windows

PERSONAL DETAILS

Languages Known	:	English, Tamil
Date of Birth	:	3rd September, 1999

PROFILE SUMMARY

- Possess over 2 years of experience in Software Testing, with a strong emphasis on automation methodologies within the Technology Sector.
- Worked as an Automation Test Engineer at ANB Systems, actively contributing to the development and execution of testing strategies for software applications.
- Developed a robust skill set encompassing various testing methodologies, including manual and automated testing, regression testing, and user acceptance testing, while also gaining proficiency in utilizing advanced automation tools and frameworks.
- Maintained comprehensive expertise in various automation frameworks and tools, including Cypress and Selenium, facilitating the execution of complex test scenarios.
- Skilled in test case design, regression testing, and end-to-end testing with a strong focus on ensuring software quality and functionality.
- Experienced at utilizing programming languages like JavaScript and Java, implementing CI/CD pipelines, and conducting comprehensive web and UI/UX testing for energy domain products.
- Proficient in a variety of automation tools and frameworks, including Cypress and Selenium, which enables the execution of complex test scenarios and ensures comprehensive test coverage, ultimately contributing to the delivery of high-quality software products.
- Exhibited exceptional analytical and problem-solving capabilities, skilled at identifying software defects and implementing effective solutions to enhance product quality.

WORK EXPERIENCE

ANB Systems, Chennai, India | Aug'22 – Dec'24
GROWTH PATH:
Automation Test Engineer | 2023 – 2024
Trainee Automation Test Engineer | 2022 – 2023
Role:

- Designed, wrote, and maintained automated test scripts using tools like Selenium and Cypress to ensure comprehensive testing coverage.
- Configured and implemented robust test automation frameworks to streamline the software testing process and improve efficiency.
- Integrated automated tests into the CI/CD pipeline to enable consistent execution with each build and identify issues early in the development cycle.
- Utilized programming skills in languages like Java and JavaScript while working with testing tools such as Selenium, Cypress, and Postman to deliver effective automation solutions.
- Applied strong analytical skills to troubleshoot issues, optimize test scripts, and ensure the reliability of automated testing processes.
- Performed functional, regression, and performance testing to ensure the software adhered to specified requirements and quality standards.
- Detected and documented defects with clear and detailed descriptions, facilitating prompt resolution by the development team.

ACHIEVEMENTS

- Developed and optimized test cases, ensuring thorough and consistent manual software testing approaches, resulting in improved test coverage and efficiency.
- Streamlined manual testing processes by enhancing test case design, leading to a higher success rate and reduced testing cycle times.
- Automated all software components and features, ensuring comprehensive software quality validation, and successfully generated regression reports through Git execution.
- Completed automation of the software's PII security features, achieving seamless validation and obtained detailed regression reports via Git for consistent tracking.
